## When a Vacuum Cleaner Comes Into the Home Dirt and Dust Depart

A Vacuum Cleaner Gets Into the Nooks and Crannies behind radiators with the greatest ease, and cleans thoroughly. Cleans places where, without a vacuum cleaner, it would be practically an impossibility.

AND the one who formerly swept and cleaned is relieved of these heavy tasks, and she becomes merely an interested spectator and guiding hand.

### WHAT A BOON A VACUUM CLEANER IS

Especially for use in the Big Spring Housecleaning which at this date is in some stage of operation in most every home.

### AND SO YOU ARE RECOMMENDED TO TRY

### The 'Eureka' or 'Ohio' Vacuum Cleaners

Which Are Described Below

The "Eureka" Cleans and Purifies With Large Volumes of Air Moving at Great Speed AND

- Is Easy to Handle
- Is Simple to Operate
- Saves Much Labor
- Saves Much Time

- Is Durable and Free From Mechanical Troubles
- Is Economical
- Is Welcomed By Anyone Who Looks After the Home

Is a well-constructed machine that with care should last for years. The price of the "Eureka" machine is \$56.50. The four attachments for cleaning curtains, upholstery, walls, etc., are extra, at \$9.50.

### The "Ohio-Tuec"

Has a pistol-grip handle which contains an oiling can. The motor is started by lowering the handle, and stopped by raising it. This avoids the necessity of coming into contact with current by turning a switch with the fingers.

The Dust Bag is of double thickness, so as to be dust-proof; it is also easily emptied. The Nozzle is adjustable to the different surfaces of the various kinds of rugs. The Revolving Brush removes

clinging particles of hair or thread, and there are many other features to be found in the "OHIO-TUEC."

The price of machine is \$55.00.

Full set of attachments (7 Pieces) for above machine extra, \$12.00.

See the above machines demonstrated on the Second and Main Floors of the House Furnishings Bldg.

THE T. EATON CO LIMITED

With a Vacuum Cleaner One May Renovate Draperies, Curtains and Hangings, without taking them down, a feature that saves such endless bother and work; moreover, it cleans without danger of injury to these hangings; truly the virtues of a vacuum cleaner are many.

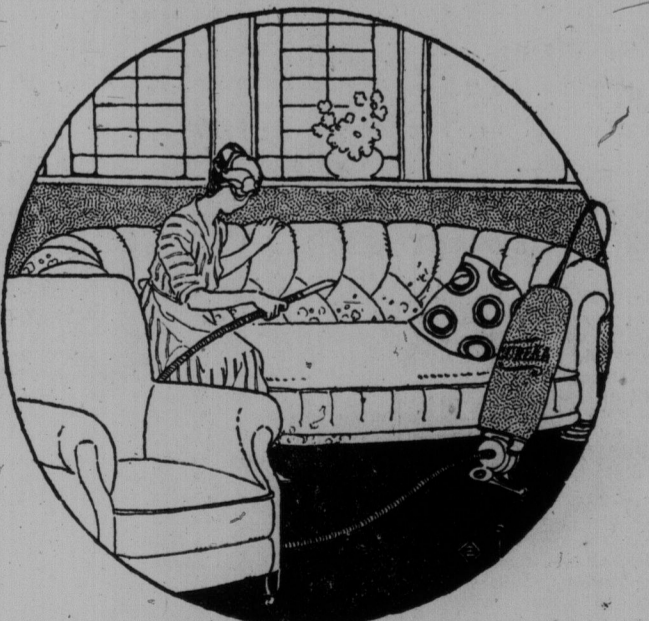

A Vacuum Cleaner is Easily Manoeuvred with one hand, and one may operate it here and there under beds and pieces of furniture without exertion and without the exertion of moving furniture, which one would have to do if cleaning with a broom.

A Vacuum Cleaner Cleans Mattresses and Helps to Keep Them in Shape, consequently making them more comfortable to sleep on, and lengthening their life by keeping them free from dirt or dust, which, if allowed to remain, would sap the strength of the coverings, and be the direct cause of rents and tears.

A Vacuum Cleaner Works Wonders on Upholstered Furniture, searches out the dust and dirt in the crevices, and brightens up the upholstery, without causing the slightest flurry of dust in the air, or allowing it to drop on the floor or settle on the cushions.

What a Contrast There Is Between the Cleaning of Furniture done with a brush or whisk and that done with a vacuum cleaner. The Vacuum Cleaner keeps the dust in its bag; the whisk or brush simply moves the dust on to another place, at the same time filling the air with germs, and menacing the health of the worker.
