BETTER THAN HARD COAL

Soft coal so free from soot that it does not make whiskeys on stove covers or pipe and does not melt or cake when burning. Is far better than Hard Coal for general household use. Quicker to light, takes less to make a fire, cheaper in price and can also be used for open fires and small heating stoves. Such a coal is Broad Cove soft coal. The main thing is to insist on getting the genuine article. No other soft coal burns just like Broad Cove. You will know it by the above characteristics.
