

THE EMERALD
SUNDAY, JULY 18, 1853.

OUR COUNTRYMEN
We are glad to hear that our countrymen are all well and happy. We have not heard from you for some time, and we are sure you are all well. We are glad to hear that you are all well and happy.

NAPOLEON THE THIRD

The Public Career and Influence upon the Affairs of Europe.
In the year 1808, Hortense, Queen of Holland, gave birth to her second son, Louis Napoleon Bonaparte. Nothing extraordinary marked the birth, excepting the child's descent from two illustrious families, and no one would have predicted for the boy a very brilliant career of exalted station. His father, Louis Napoleon, was a quiet, humane person, untroubled for the pomp and parade of war, and devoted to scenes of bloodshed and oppression.

His marriage with Hortense Bonaparte, Josephine's daughter, by the first marriage, was an unhappy one. He was in love with another lady, and she, it is said, was engaged to a young officer in Napoleon's service; but the great Emperor could not brook a rival, and he broke domestic ties with the same supple hand he broke heads and crushed kingdoms, and it furthered his ambitious ends. Thus he compelled his brother to marry his step daughter, and hold out the glittering diadem of Holland as the golden price, with a solemn pledge that he would not be his son-in-law as his heir. This pledge he at first fulfilled, but afterwards broke. He proclaimed Prince Napoleon of Holland (the present Emperor's eldest brother) his heir, but subsequently he was so infatuated as to seek a matrimonial alliance with the Royal Family of Austria, and married Maria Louise.

All that need be said further about the father of the present Emperor, is that he refused to be too in his brother's hands to squeeze the last guilder from poor Napoleon, and was consequently destroyed. Holland was incorporated with France, and Louis Napoleon (parted from his wife) retired into private life.

It is not our purpose to write the biography of the present Emperor, but merely to notice a few of the most prominent events of his life. He was born seven years old when his uncle fought and lost his last battle. The Bourbons were restored on the throne of France, apparently as firmly as ever, and the Buonapartes were in exile. After a few years, however, a cloud arose on the horizon, and murmurs loud and deep were heard at arbitrary conduct of Charles the Tenth. In 1830 the storm broke, the "last of the Capets" was driven from France, and the Crown placed on the head of his cousin Orleans, who was styled "the Citizen King," and who pledged himself to preserve the liberties of the people. The revolution in France convulsed half of Europe, and the Italian States were among those who took up arms to gild their independence. The Prince Napoleon and Louis Buonaparte joined the insurrectionary party, and in one of the skirmishes with the Austrian troops the former lost his life. By this event Prince Louis became his uncle's heir.

THE FRENCH AND THE POLAR

Our countrymen to-day contain a report of a ship which took place in the Polar Court on Tuesday last. It was in consequence of an unfortunate accident which all good men must deeply regret.

There is—there can be no doubt—no ship which has one of the best organized and most effective Departments that any city in North America can boast of. A few years ago, a boat of young men voluntarily banded themselves together, not only to give their services gratuitously, but to incur very considerable expenses in addition thereto, that they might by their united energies more effectively check the red monster when he appears, and save their fellow citizens from the ravages of the pestilential disease. This good organization has been the means of saving countless thousands of the city property, and the safety of saving human life. What, then, is the saddest occurrence that has hitherto befallen these men together. It is the epidemic disease, Destructo that has down-tumbled the whole fabric. Surely, that great down-tumble should be allowed them in passing along the streets when on duty, and our policemen should be extremely careful how they interfere with them on those occasions.

And now for the other side. Every person who reads in St. John some six or eight years since, and will witness the slight scenes of riot and disorder, and that period with the peace and quietude that now reigns, will be surprised to find that they were the result of a very simple cause, and we believe that it is possible that some of the men may remember the occasion. It was the result of a very simple cause, and we believe that it is possible that some of the men may remember the occasion. It was the result of a very simple cause, and we believe that it is possible that some of the men may remember the occasion.
