Other machines are stored away, dry and covered, yet many of them work for short seasons only. The wagon works the year around, is always under the strain of heavy burdens, always getting rough treatment. It can't stand the strain of such a life for many years, unless, like I H C wagons—

It has built into it the utmost of endurance, toughness, and sturdiness. I H C wagons are built of wood without a single flaw, every bit as good as they look. Examine them closely; you find no cross grained, knotty split, or faulty timber. Every stick—oak and hickory for the wheels, yellow or bay poplar for box sides and long leaf yellow pine for bottoms, is selected from first grade lumber and carefully inspected. Every stick is toughened and seasoned by two or three years of airdrying. No brittle kiln-dried lumber has any part in I H C wagon building.

All steel and iron parts are chosen with the same end in view—greatest durability and longest life. Experts test and verify every part. Before the wagon is ready for you it must pass many thorough inspections. The timber, metal, shaping and fitting, painting, every detail down to every brace and bolt, must be just right.

Buy one now, watch its steady service on your farm, and mark this your future reliance will be on the I H C wagon. That future order is our ultimate aim. Ask the I H C local agent to show you the I H C wagon best suited to your needs. Get catalogues from him, or, write the nearest branch house.
