SOLUTION

Iron Peptonate and Manganese

A Palatable,
Permanent and
Efficacious . .
Compound.

CONTAINS 0.6 PER CENT. METALLIC IRON

. AND 0.1 PER CENT. METALLIC MANGANESE

In our Solution, Iron Peptonate and Manganese, we offer to the medical profession a combination of exceptional value in the treatment of anemic conditions, where the digestive and assimilative functions of the patient are impaired.

It is hemoglobin-producing, and promotes corpuscular nutrition, and in cases of chlorosis and neurasthenia it has accomplished most encouraging results.
