

	streaks and layers of coal	2	8				
	Coal, bright, hard and black	0	8				
				2	10	1	6
	Heavy bedded grey sandstones or grit	5	0				
	Carbonaceous shale and coal, much confused apparently a slip in strata here with a repetition of No. 7	2	0	1	0		
	Loose shaley sandstone, with thin layers of clay	30	0				
		Ft.	In.				
No. 8.	Coal	1	2				
	Loose shale	0	10				
	Coal	0	6				
				10	1	8	
No. 9.	Shale and clay	2	0				
	Thin bed of sandstone and shaley rock, with clay intercalations	19	0				
	Bed of dirty fire clay, containing six inches good coal	9	0	6			
	Thin layers sandstone and shale	5	6				
No. 10.	Fire clay, containing six inches of coal	1	0	0	6		
	Loose shaley sandstones, with shaley and clay partings, two dirt streaks in middle, with just a sign of coal in each	21	0				
No. 11.	Dirty clay band, with three in. hard coal	7	0	3			
	Sandstones and shales, with one dirty clay band, containing streaks of impure coal	10	0				
		Ft.	In.				
No. 12.	Fire clay	0	2				
	Coal	0	3				
	Clay	0	1				
	Coal	0	4				
	Clay	0	1				
	Coal	0	6				
	Clay	0	3				
	Coal and clay mixed	0	4				
	Clay	0	2				
				0	11	1	3
	Sandstones and shales in thin layers, one thin coal streak in middle	8	3				
		Ft.	In.				
No. 13.	Coal and carbonaceous shale mixed, 6 in. good coal at bottom	1	9				
				1	3	0	6
	Sandstone and shale alternating, bed of fire clay mixed with coal	3	6
