Lightning Rod Protection.

An insurance authority, in speaking of the fire losses of April last, said: "Lightning has caused considerable loss during the month, especially throughout central and eastern Ontario and western Quebec. On the 25th and 26th of the month, 34 barns and nine dwellings were damaged in Ontario, and on the 27th, 18 buildings were struck in the province of Quebec. If enquiry were made it would doubtless be found that none of these buildings was rodged. When it is remembered that lightning loss upon farm property in Ontario and Quebec costs the insurance companies well over \$400,000 a year and that losses not covered by insurance probably amount to an equal or even greater sum, it seems strange that farmers do not more generally adopt so simple a means of protection as the lightning rod."

Much has been said and written of recent years as to the value of lightning rods as a means of fire protection. This question has especially interested insurance companies, who have to provide for the primary loss. When, however, insurance officials make such statements as that quoted above it is apparent that only a small part of the ultimate loss is borne by them. Farmers, especially in eastern Canada, are paying this loss. True, the insurance companies collect the money from a large number and pay it over to those who suffer from lightning, but the farmers pay the price, as well as the cost of making the collection. The heavy loss by lightning must be provided for through an increased premium paid by farmers for their insurance. It is therefore advisable for those who must pay this heavy charge to take precautions to protect property.

The data collected by United States Farmers' mutual fire insurance companies demonstrated that lightning is one of the principal causes of fire in rural districts.

Canadian farmers' mutual insurance companies are also taking a great interest in lightning losses, and almost unanimously make a reduction in premium on protected risks.

In European countries, particularly in France and Germany, all public buildings are protected; school authorities insist upon lightning rods upon all school buildings.

With a very heavy fire loss in Canada, at a time when such wastes should be reduced to the minimum, some action should be taken to protect rural property against this destructive element.—Conservation.

Questions and Answers.

Miscellaneous.

Recipe for Tanning Hides.

What is a good recipe for tanning hides?

A SUBSCRIBER.
Ans.—Stretch the skin smoothly and tightly upon a board, hair side down, then scrape off the loose flesh and fat with a blunt knife. Work chalk freely in with hard rubbing. When the chalk begins to powder and fall off remove the skin from the board and rub in plenty of powdered alum. Wrap it up closely and keep in a dry place for a few days. By this means it will be made pliable and will retain the hair. However, we would advise having the work done at a tannery, where, with the proper facilities, a better job can be obtained than by home tanning.

Tuberculosis—Trimming a Hedge.

I have a cow which I bought recently. She has a dry cough, does not eat very well, and is losing in flesh a little.

1. Is this tuberculosis?
2. If tuberculosis, will I or the man from whom I bought her be liable? She had the cough when I got her home?

3. When is the proper time to trim a hedge?
Ans.—1. The symptoms of tuberculosis are a dry cough, loss of appetite, and a general loss of condition. The purchaser would be liable for tuberculosis if the animal was found to be diseased when it was bought.

2. The proper time to trim a hedge is when the grass is growing and the soil is moist. This is usually in the spring or early summer.

DISPERSION SALE OF 36 Head of Pure-bred Holstein Cattle

Mr. C. C. Kettle, of Wilsonville, Ont., will sell by public auction, his entire herd of show-ring and high-producing Holsteins on

TUESDAY, MAY 2nd, 1916

Included in this offering are several first prize winners at London in 1915, and several have been prize-winners at Toronto Exhibitions. The cattle offered are all young, bred in the purple and in the pink of condition. This herd consists of descendants of such sires as Starlight Schuiling De Kol, Grace Fayne 2nd, Sir Mercena, Fairview Mercedes Korndyke and Ourville Colantha Sir Abbecker.

Trains will be met at Vanessa Station, T. H. & B. R. on day of sale. Connections made at Waterford, M. C. R. and G. T. R. at Brantford. Catalogues ready on April 20th.

COL. WILBY ALMAS, Auctioneer **L. H. LIPSIT, Manager** **C. C. Kettle, Prop.**

RIVERSIDE HOLSTEINS

Herd headed by King Johanna Pontiac Korndyke, a grandson of Pontiac Korndyke, and a brother of Pontiac Lady Korndyke, 38.02 lbs. butter in seven days, 156.92 in 30 days—world's record when made.

J. W. Richardson, R. R. No. 2, Caledonia, Ontario

HOLSTEIN CATTLE

The only herd in America that has two sires in service whose dams average 119 lbs. milk a day and over 35 lbs. butter a week. Cows that will give 100 lbs. milk a day are what we are trying to breed. At present we have more of them than any other herd in Canada. We can supply foundation stock of this breeding. Visitors always welcome. Long-distance Phone.

D. C. FLATT & SON, R. R. 2, Hamilton, Ont.

Lynden Farm Holsteins

The home of Plus Pontiac Artis, the champion 3-year-old in R.O.P. work with 21,000 lbs. milk, 90 lbs. butter one year, 30.85 lbs. butter 7 days at 4 years old, the only cow in Canada to produce 20,000 lbs. milk in 1 year, and to make over 30 lbs. butter in one week at next freshening. We are offering Plus Inka Artis, champion bull at Guelph, from same dam as above cow. He is a brother to May Echo Sylvia, 36.33, on sire's side. Also King Korndyke Evergreen, sired by son of Plus Pontiac Artis. He has 7 dams in pedigree over 20,000 lbs. milk each in one year. Also a few well-bred young females.
