

The ONE Roof that is TIME-Proof

The Carey Roof cannot catch fire from falling sparks, blow off, rust, rot, melt or develop leaks. It defies the elements. Once on, your roofing troubles end. Lasts as long as the roof-boards hold.

CAREY'S MAGNESIA FLEXIBLE CEMENT ROOFING

is the oldest and best composition roofing for NEW buildings. You or your farm hand may easily apply it over your LEAKY shingle or hole-pierced metal roof.

"I have covered old shingles with it, making a perfect roof" — J. E. JUNGLUTE, Arlington Farm, Neb.

Carey's Roofing is composed of an always flexible asphalt body of cement, with a heavy woolen felt foundation and strong burlap, firmly imbedded into the upper surface—all compressed into compact and practically indestructible sheets. The Carey Patent Lap protects from sun-rays and rust, the nails driven in to stay, insuring a permanent, waterproof, smooth union.

Sold to farmers at manufacturers' prices from warehouses conveniently located all over the United States and Canada, insuring lowest freight rates. Write to-day for FREE Sample of Carey Roofing and interesting booklet.

The New and the Old

And it's pretty hard to say which is better

When we first put out the NEW FROST LOCK, we considered it an improvement over any other lock in the world. Privately, we still think so. But some of our old customers tell us they want FROST WEDGE LOCKS on the fences they are ordering. It's like trying to decide which is better—Holstein or Ayrshire cows.

Frost Locks on Frost Wire Fences

make the perfect combination for strength. FROST LOCKS lock the wires so they can't sag or hang. Do not bend, knot, crimp or kink them—the only device that honestly LOCKS two hard wires without injury to either.

We'd like to send you a copy of our booklet—FREE. It tells the facts about Frost Fence, and some others worth knowing.

COW PEAS draw nitrogen from the air in large amounts, if sufficient POTASH and phosphoric acid are supplied to the plant.

The multitude of purposes served by the remarkable cow pea, are told in the 65-page illustrated book, "The Cow Pea," which also tells of the splendid results obtained from fertilizing cow peas with POTASH. The book is free to farmers for the asking.

Address, GERMAN KALI WORKS, 93 Nassau St., New York.

It Pays to Buy a Deering

Gets All the Grain

Increases Crop Returns

YOU realize this when you come to figure up crop returns.

Preparing a good seed bed, sowing good grain, and propitious weather are not all that is necessary.

You must have a machine that will harvest your grain so that you will realize every dollar possible out of the crop.

A Deering binder does this.

It's built to get all the grain.

The reel will bring tall or short, down and tangled grain to the sickle without fail; the elevators will handle it whether it be light or heavy, and the binding attachment will throw out nice even butted bundles.

When a field of grain is harvested with a Deering, you won't find crow's feed scattered all about; you won't find the grain lying in patches where the reel never picked it up.

The Deering is built to harvest the crop in the right way.

The Deering wide cut binder is particularly adaptable for use where there are large fields of grain to harvest.

During harvest, time is worth money.

The loss of a day's cutting may mean the loss of many dollars, and no farmer can afford to take a chance on purchasing a poor binder.

The Deering line of harvesting machines is complete and includes, besides grain and corn harvesting machines, a complete line of haying machines, comprising mowers, tedders, sweep rakes and hay stackers.

Call on the Deering agent and let him explain why a Deering machine harvests in the right way.

These local agents are found everywhere, and will be pleased to give information and a catalog concerning the Deering machines.
