Both Theory and Practice

Prove the Superiority of the U. S. Cream Separator

In Theory, its one piece frame, enclosed gears running in oil, few parts, three-separators-in-one bowl, and superior construction in general make it the

Cleanest skimming, most substantial, safest, easiest operated, and most durable Separator made

In Practice, it is daily proving the correctness of our theory, as testified to by pleased users everywhere. If interested, write for catalogues containing hundreds of letters to this effect.

Made in all sizes for either the Dairy or the Creamery.

REMEMBER, there is No Duty on Improved U. S. Separators shipped into Canada.

THE IMPROVED UNITED STATES CREAM SEPARATORS are worth more than their cost, and are bought in preference to all others by the best farmers. Nearly every machine sold brings a letter similar to the following:

Wm. Scott, Esq., Winnipeg, Man., Middlebury, Vt., April 17th, 1901.

Dear Sir,—The Improved United States Cream Separator, No. 7, which I purchased from you a short time ago, is giving perfect satisfaction. As a cream separator I consider it as near perfection as anything could be. It skims exceedingly close, in fact, there is practically no butter-fat left in the skim milk. One great advantage it has over several other makes of machines is the few parts inside the bowl, and the ease with which it can be cleaned. I find that it will skim fully as fast as the makers claim for it (viz., 240 lbs. per hour), as I have timed it several times. It is a machine that is made to last, being very strong and simply made; all running parts being enclosed, which not only protects it from dust and dirt, but renders it impossible for any accident to happen, such as getting wound on a shaft or caught in the gears. It is also very light running, which is a great consideration in a cream separator.

Yours truly,
H. O. ALEXANDER, breeder of Shorthorn Cattle.
