From the Christian Memenger. Denominational Seminaries.

Unless our people have the Higher S-mi nary to finish the education of such of their of ildren as show an aptitude for learning and the most promising tale t for future me cess in life, the purposes of lower General Education will be to a great extent lost, and our br ghtest youth will be driven from the country in all probability never to return, But among the most cogent reasons is the fact that unless we possess among ourreless the means of educating competent teachers for the various branches of learning, from the lowest to the highest, the education of the country must necessarily be left to choose, and fall into the hands of mere adventures or persons wholly unfitted for the business; isoto in a moral and intellectual point of view, Denominations have set up Colleges and Academies hitherto from the necessity of the case, and many of them have made large and praiseworthy exertions to sustain them, and in this way alone do we believe that the sym pathies and affections of the people can effectually be enlisted to do their part in so inportant a cause. As long as Establishmente of Learning thus situated shall be conducted on a liberal and unrestricted principle, rejecting all exclusiveness and sectarian views in the management of Education, they will be entitled, not only to the confidence of the people at large, but to receive from the gene ral revenues of the country such moderate assistance as shall enable them with the tive exertions of the different bodies under whose sanction they have been founded, to diffuse and perpetuate the benefits which can be obtained in no other way with half their advantages.

CORRESPONDENCE.

Original Matter is particularly requested for this Paper such as, Local Intelligence—Bir graphies - Notices of the introduction, rise, and progress of Methodism in Cacuits, Revivals, and remarkable Conversions—Articles on education, temperance, literature, science, as religion-libustrations of Providence-Sketches of Scrip ture characters—interesting anecdores—descriptions of natural scenery—Papers on any prominent feature of Methodism, &c. &c.

a fulcions variety in each number is the secret of some paper popularity and usefulness.

For the Wesleyan.

Rev. R. Knight's Missionary Tour.

MR. EDITOR,- I perceive in your No. of the 19th ult. you give " a word or two to our mi nisters.". That " a whole must include all its parts" is a self-evident maxim :- the conclusion then must be irresistible, (i. c.) you say " word or two" to me, standing as I do, in the WESLEYAN "apostolical succession."

One of your "respected correspondents" wishes you had more "local intelligence" to present to your readers. This brings you out equipped to the very tips of your fingers, in je tifiable, and I must say, effective defence. When selected by your brethren to the editorship of the "Wesleyan," you could not conceive them to be "Egyptian taskmasters," requiring you to make "bricks without straw," nor could they assume, that you possessed the attribute of ubquity; hence your rejoinder is full both of fact and fairness, leaving not an inch of room for a delinquent brother, to edge in the question, "le whom can he refer ?" As regards myself, if among the acquitted, I know I can be only on the very brink of exemption. Sure I am, I have no work of supererogation to justify delay, and therefore I now sit down to serve you up a

little "local intelligence." g On Wednesday the 13th ult. I left this City for the purpose of attending the missionary meeta ings in the Sussex Vale, Petiteodiae, and Hope well Circuits. The weather was of the most favourable kind, on the day of my departure.-The state of the roads however was more danat gerous than I had ever before seen them, are ing from an intense frost following upon the usual January thaws. They were literally cased with ice, of almost more than glassy sip-a-periness. Our equipments were of excellent o- quality, comprising a well furred sleigh, draws de by a span of fine horses with manes and tails of nt more than usual exuberance. For them the e- roads could not be better. They had but little o- more to do than to keep out of the way of the vehicle (apparently instinct with life.) to which m, they were attached. Barring the acclivities to say that the sleigh drove the team, would be m well nigh as correct a form of speech, as to state nat that the team drew the sleigh. Heave you then m- to judge, of how comfortably, and speedily we
