Adventures In Contentment

By DAVID GRAYSON

This is a story of a city business man who becomes tired of city life and purchases a farm. He looks at farm work and country life from a very bright and cheerful standpoint. David Grayson is the hero of the story, and he gives his own experience and describes the delights of country life in a manner that is fascinating beyond description. The account of his meeting with a book agent is a pleasure to read, and his story of the day the politician came to supper for his wife will delight the heart of every reader. The pleasure which he derives from the making of an axe-handle and the digging of a ditch shows the real joys of useful labor. One evening, as he sits at home with his book, contains a suggestion of how the loneliness of the farm may be dispelled. All the other chapters are equally good. There is no better book for reading alone around the family circle in the farm home, and after this book has been read and re-read and thoroughly enjoyed, there are others by the same author equally delightful. Handsomely bound and illustrated. Postpaid. 70c
