NOTE.—The Reporter of the House of Assembly begs leave respectfully to call attention to the fact that this Pamphlet, containing the Debates of the Session of 1866, is the most complete publication of the kind that has ever been issued since the reports have been given in this country in an official form. The amount of matter reported is largely in excess of that actually contracted for. The debates on the Pictou Railway, and Union of the Colonies, have been given verbatim, in view of the interest attaching to these questions. Mr. Bourinot also thinks it but just to add that he has been ably assisted in the performance of his work by Mr. John S. Thompson.
