and then, but most of the victims lose their lives because they are not able to swim. As between the swimmer and the non-swimmer the chances for escape in an emergency are as ten to one. The point of the important lesson is driven home with emphasis every summer, and still it apparently needs urging as much as it did twenty years ago. Most people seem to me gard swimming not as an important accomplishment, but merely as an op-tional recreation, like golf, tennis or china painting. And yet any of us may be confronted at any time was more important for the moment that of walking. The folly of the common neglect is heightened by fact that it is an art as easily acquired as the ability to walk. And once as quired it is never lost.

AUTO MOTOR NOT ALL

Other Parts That Owners Need Understand

A writer on motor cars says: It has often been said that owners know too much about the motor, and their knowledge of it tends to remove their sttention from the clutch gearing and more about the running gear and its

Universals, brakes, wheel bears and many other parts not as ac sible as the spark plugs, seem to with them. The owner does not wait for a bearing cap to fall of 1 he fills the crankcase with ofl, and similarly he should not wait until government will be performing a similarly he should not wait until manifest duty, and it can well afbefore it gets its supply of grease or graphite. It is difficult to keep uni-versals well lubricated, even when the housing is periodically filled. These parts are just as important as the motor, and should receive just as much attention and at frequent inter-vals. There will be no bucking, due to end play in the propellor shaft as-sembly or clutch, if the parts, are

"SPRING ONIONS": POET

Famous Police Court Rhymster of London, England

"Spring Onions," or to give him full title, Mr. William "Spring" Onions, the police court poet, and a well known character in East London, died at Ratcliff. Mr. Onions, after making police court history with a "record" of 500 appearances, came under the influence of the Church army, and from that time onward a magistrate to "report progress," and record his spiritual pilgrimise in strange verse—a kind of spring song of his own composition.

Enormous waste is caused both material and nutritive value by peeling of potatoes before cooking of potatoes wasted every day three the peelings. To be convinced of the it is only necessary to note the but of the peelings when you peel the po-tatoes before cooking. But this is not the only waste. When peeled poss toes are boiled in the ordinary way, there is a loss of nitrogenous and saline matter by extraction into the water, which does not occur when potatoes are boiled in their skins, or baked.

Northern Potato Seed Best Authorities agree that northerngrown seed will give the best results in old Ontario and that immature seed does better than mature seed. 'In parts of Scotland," said Professor Zavitz of Guelph, speaking on this point, "they grow an early crop of potatoes and then plant a later crop for seed purposes, and they find that for seed purposes, and they had the immature potatoes make the best seed, and the same result has been found at the college; potatoes not built had a well matured make better seed than a matured potato."

Arm is For Food A rather curious fact is that the bones of the arm are arranged pri-marily for the purpose of carrying the hand to the mouth-food being, course, the first necessity of life. If you do not believe it, try it for yourself, and see how much more naturally, when your arm is bent, your hand moves in that direction than in

any other. The first the second

Rheumatism Disappeared!

Rheumatism is the scourge of many lives. Generally it is brought on by impurities in the blood, which means that the kilneys are not performing their proper function. In all such cases the remedy is

To pick one example—Mrs. Salsbury, of Camden East, was so crippled up in her feet and ankies with Bheumatism that she could not walk upstairs. She writes to us to credit Gin Pills with the fact that after six years she has had no return of Bheumatism. Rheumatism.

Every sufferer from Rheumatism, swellen foints and ankles should profit by this example and try Gin Pills without delay.

MINING IN MANITOBA

The Western Province Has Possibili-ties in its Mining Lands

I am interested in the new mining province of Manitoba, the development of which can take place under ideal conditions. Hitherto Manitoba has been regarded as the finest agricultural province, but it has now arrived at that stage when it is in a position to take advantage of the newest thought on mining development What is needed is for the province to secure the right to have control of its mining lands. You should deelop the mining interests of the whole province, both directly and indirectly; directly, by obtaining dividends from the mir and obtaining metals for use in pr by supplying the mines and the suaded to have a valuation made fore they put up their money. is done, mining is a clean and p able business, and will yield larger returns from investments than any other securities offered on the market What Manitoba needs to develop its manufactures and to be able to utiliz its magnificent water powers, is a sup-ply of cheap metals obtained close at hand.—J. B. Tyrrell, B.Sc.

> The Men who buy MELAUGHLIN GIXES A good idea of the quality, efficiency and popularity of McLaughlin Sixes can be formed from a knowledge of the type of men who buy McLaughlin Sixes. As a class they investigate before they invest. They are strong men of good judgment and keen discrimination, who approach the task of purchasing a car with the same clear analytic reasoning that they use in any business' venture. Unswayed by glowing accounts and glittlering generalities clothed in high sounding phrases, in newspaper print or salesmen's talk, these men assimilate the facts and recognize in the McLaughlin Six the combined qualities of the car they wish to own. Abundant power is a necessity and these men realize that the McLaughlin valve-in-head engine developes more power with less gasoline consumption than any other type of motor of the same bore and stroke. Moreover the power of the Six is flexible power, easily controlled, making gear shifting almost unnecessary. The long wheelbase and deep wide seats, luxuriously upholstered in genuine leather, provide supreme comfort. The spring suspension smooths out the rough roads. With twelve branches and hundreds of service stations all over Canada the McLaughlin Company gives the kind of service that appeals to the men who buy McLaughlin Sixes.
