PATENT ARTIFICIAL SLATE, And Unchangeable Metallic Paints: PROOF AGAINST FIRE & WATER!

THE ARTIFICIAL SLATE is the product of a mixture of mineral substances known to be the best non-conductors of heat as well as the most impenetrable to the chemical affinity of which covers the surface of materials covered, into a coating of Artificial Slate—Proof against FIRE and WATER.

THE METALLIC PAINTS, Purple and Red, are offered as Weather and Water Proof. They surpass all Paints yet discovered from Galvanic action so far to hold and other Points on Iron work—and their chemical combination makes it impossible, that any change should take place from atmospheric influence or the action of Salt Water and Sulphureted hydrogen as prevalent in Sea Ports and Tidal Harbours.

THE METALLIC PAINTS have been analysed by Professor Hays of Boston. The following is an extract from his Certificate:—"As a permanent pigment, this mineral salt rank with the most indestructible and unchangeable bases. For covering Metallic Ware, its composition shows that it is eminently fitted."

DEAR SIR,—Please send us two more barrels of your Artificial Slate. We have seen some of the good effects of it at the last fire. Some of the roofs covered with it did not catch at all, and when the walls were burnt some of the roofs came down in one piece.

ROSE METALLIC PAINTS.—We have already called public attention to the high estimation in which the Metallic Paints, manufactured by John Ross, Esq., are held by those who have had occasion to use them.

THE METALLIC PAINTS are mixed and put on like an ordinary paint. JOHN ROSS, Patentee, Agents for Prince Edward Island, Geo. T. HASZARD, Queen Square, KENNETH McKENZIE, Pictou Street, Charlottetown, Oct. 8, 1851.

National Loan Fund Life and Equitable Fire Insurance Companies of London. Incorporated by Act of Parliament.
