

PRINCETON AND HARVARD CLASH ON GRID TODAY

Over 30,000 People Will Witness Struggle Between
Two Big Colleges For Rugby Supremacy
at Princeton.

[Canadian Press.] Princeton, N. J., Nov. 8.—Rain was falling here this forenoon, but the precipitation was light and intermittent and was not expected to interfere with the players in the annual Harvard-Princeton football contest this afternoon. The gridiron was covered and was in good condition.

While Harvard was conceded by man critics to have the stronger team both on the offense and defense, Princeton supporters were decidedly optimistic, and took nearly all the Harvard money offered, at odds varying from 10 to 6 to 4 to 3.

The crimson squad accompanied by six coaches and the usual retinue of trainers and rubbers, arrived in Princeton shortly before noon, having

spent last night in New York. A big crowd of Harvard undergraduates also came over to witness the battle, the delegation being one of the largest that ever journeyed from Cambridge to Princeton.

The entire 26,000 seats in the temporary stadium at University Field were sold last night, and the demand had not been nearly satisfied, according to the athletic treasurer.

Today's game between the two universities was the 187th. Several breaks in the football relations between the two institutions have taken place, today's contest being the third since 1896. Of the 17 games played between the two institutions, Princeton has won 13 and Harvard 4. Harvard won last year, 16 to 6.

THE RING

TWO MONSTERS FIGHT DEC. 2

New York, Nov. 7.—Promoter Billy Gibson was figuring today on whether he would have to renege on the ring at Madison Square Garden before Dec. 2, when Carl Morris and Jess Willard, the two heavyweight "hopes," will be brought together in a 10-round bout. They are two of the big men in the ring at the present time. Willard will weigh about 225 pounds and Morris about 230 when they get into action.

Gibson was being anxious for the mill for some time and finally closed it for the December date.

MCCARTY-FERNS MATCH.

Denver, Nov. 7.—Johnny McCarty, welterweight champion of the Pacific coast, who has defeated some of the best men in the west, has been matched to box "Wildcat" Ferns here in the middle of this month. The men will appear before the State Athletic Club.

But Nelson, who has quit the fight game many times before and has finally decided never again to appear in the ring—and this one goes—blames it all on his hands. With a pair of hands that would probably be able to go into the ring again and win back the title. Every other part of him that counts—his jaw, eyes, heart and strength—they're all there. But the mitts that have put many a fighter under an anesthetic are feeble and broken now, and they have become useless as a means of earning a living in the ring. Everyone knows what a wonderful fighter Bat was when going at his real clip. He would be just as good today if he had a pair of hands he could use. Every bone in them has been broken at least once. "I've made quite a bit at fighting, and I guess I can quit now," says Bat. "But if my hands had been able to stand up under the wear and tear as well as my legs and jaw and eyes and heart, believe me, I'd still be there. I've stalled about quitting the ring a good many times, but this time it goes. There's no fun in being a second-rater, and a guy can't fight without a pair of mitts."

PLAGUE AT PANAMA

Yellow and Bubonic Fevers Cause Grave Concern to Officials.

[Canadian Press.]

Washington, D. C., Nov. 7.—Presence of bubonic plague and yellow fever on the great trade routes from the south converging upon the Panama Canal, is giving grave concern to American health officials. Consul Baker reported to the State Department today that during the month of October there were 112 cases of plague in Guayaquil and that yellow fever was on the increase.

VARDON AND RAY AT DENVER.

Denver, Col., Nov. 8.—Henry Vardon and Edward Ray, English golf professionals, played a series of exhibition games with local golfing experts here today. A large gallery watched the play.

THE NEW PUBLIC HEALTH

The Advertiser Bureau of Public Health Information.

QUESTIONS, ANSWERS, COMMENTS.

Conducted by Institute of Public Health.

(The Public Health Faculty of Western University, London.)

Questions should be addressed "The New Public Health," care The Advertiser, London, Ont.

Private questions accompanied by a stamped, self-addressed envelope, will receive private answers. Medical diagnosis or treatment for individual cases cannot be prescribed.

Will you tell us about the disease called garget? Is it right or safe to have garget on our farms? What is done to prevent it, or to safeguard our health? A MILK CONSULTER.

A—Garget is a general name given to inflammation of the udder of cows, often of the teats rather than the udder, and is due to the same type of germs that produce pimples, pus, erysipelas, blood poisoning, and other such affections. These germs usually belong to one or other of the two groups of germs which are known respectively as staphylococci and streptococci.

As in most other diseases, so in garget, there are all sorts of grades and varieties of mild inflammations of small areas in the teat or udder, up to very severe conditions in which much pus or "matter" is discharged. All careful dairymen watch for "gargety" cows, and exclude such milk from the supply they send their customers. Careless dairymen often neglect this, and "gargety" milk is not so rare as it should be in the mixed milk of our cities and towns.

The harm it does varies very widely. The germs that produce the disease vary very much in their effect on the cow, and even more in their effect on the human. It is probable that a great deal of "gargety" milk is used every day without any great harm resulting. On the other hand, there is reason to believe that at times "gargety" milk is responsible for a good deal of the trouble amongst the consumers of the infected supply. Probably intestinal disturbances are due to these germs at times, and it has been supposed that outbreaks of septic sore throat may develop from such milk, although the germs which produce this disease may get into the milk from other sources, particularly from persons handling the milk, who themselves have septic sore throat.

In order to exclude "gargety" cows from contributing to the milk supply of a city, two things are usually necessary: first, a well-educated and conscientious set of milk producers, who will watch their cows closely to prevent garget developing, and if it de-

duced from 18 inches diameter to 16 inches.

The council have decided to send a British rifle team to Australia next year, and have appointed Colonel Barlow commander, and Mr. J. P. Somers shooting captain.

McClary Foundry Carpetball League

Great interest is being evinced in the progress of the McClary Carpetball League, and during the week some capital games have been witnessed, without materially altering the position of the teams. Chief excitement attended the defeat of two of the unbeaten teams, the Sunbeam and the Sunshine, and at present the Chief team is the only one that has not tasted the bitter of defeat. The Sunbeams met their Waterloo from the Gladiators, and the Marines, after a stubborn contest, defeated the Sunshine. In the latter case the winning captain is understood to have thought a moving, kitty would have secured an easy victory for his side.

Positions for week ending Nov. 7:

Played	Won	Lost	Drawn	Points
Gladiators	4	3	1	0
Sunbeam	1	1	1	0
Saskatchewan	4	1	1	1
Pandora	4	1	1	1
Chief	2	0	0	4
Sunshine	3	1	1	0
Kootenay	3	1	1	0
Radium	3	1	1	0
Famous	3	1	1	0
Bell Oak	4	2	0	4
Ladies Aid	3	1	1	3
Marine	3	1	1	3
Regina	3	1	1	0
Magnet	3	1	1	0
Midway	4	1	1	0
Kitchener	4	0	3	1
Fairy Queen	4	0	3	1
Champion	3	0	3	0

TO WED ENGLISHMAN

Engagement of Sir William Mackenzie's Daughter Announced.

London, Nov. 8.—Much interest is taken here in the official announcement of the early marriage between Miss Gertrude Mary, second daughter of Sir William and Lady Mackenzie, and Mr. Cyril Kingston Floyd, second son of Rev. J. E. Andrews, rector of Bonchurch, Isle of Wight. Mr. Cyril Andrews is now in business in London. He is much esteemed in Anglo-Canadian circles. After leaving Cambridge University he went to Canada and won the tennis championship at Winnipeg.

SCOTT ACT VOTE

ON NOVEMBER 24

Ottawa, Nov. 8.—An order-in-council has been passed fixing the date of election under the Scott act in Peel, Welland and Huron counties for Nov. 24.

SURPLUSES SOON TO VANISH IN THE DOMINION TREASURY

Revenue For October Shows a
Big Decrease Over Last
Year.

Ottawa, Nov. 7.—During the month of October there was a decrease of over half a million in the revenue of the Dominion as compared with October of last year, while at the same time the expenditure for the ordinary expenses of administration increased by nearly a million and a half.

For the first seven months of the fiscal year revenue has increased by \$4,265,715, while the total expenditure has increased by \$21,826,947. The amount paid in subsidies was \$13,086,468, most of which went to the Canadian Northern Railway.

ministration has increased by over six million dollars. These are some of the significant figures of the Dominion's financial statement for the month of October, and for the first seven months of the present fiscal year. At the present rate of divergence between decreasing revenue and increasing expenditure, the era of big surpluses at the end of each year will cease in the past. The revenue for October was \$14,225,598, a decrease of \$533,348, as compared with the preceding October.

The revenue for the seven months was \$101,163,214. Expenditure on revenue account was \$57,446,828, and on capital account \$30,720,490. The amount paid in subsidies was \$13,086,468, most of which went to the Canadian Northern Railway.

Proper pasteurization is undoubtedly the best safeguard we have as yet; but even proper pasteurization does not do away with the need for strict supervision of the milk supply by a well-trained veterinary inspector, with the proper skill to detect this condition when it arises, and the proper authority to prevent the use of the milk if the milk-producers neglect or refuse to exclude it themselves. But, of course, no inspector can continuously watch every cow all the time; and laboratory examinations of the milk help him to detect garget in cow in many instances where it would otherwise be overlooked. Thus a number of years ago, we examined the mixed milk of a herd of thirty cows, found a very high count, noted that the high count was due very largely to streptococci; and the veterinary inspector, going over the herd carefully, found one cow gargeted. This one cow being excluded, the other twenty-nine furnished milk which, when mixed as usual gave a good count, and few or no streptococci. In other words, the "gargety" cow was spoiling the milk of the whole thirty. In this case the milk-producer stated that he had given orders to exclude this cow, but one of his men had neglected the orders, and had poured this cow's milk in with the rest.

Many such experiences have taught us that a city supply requires, for proper safeguarding, bacterial supervision as well as veterinary inspection; and that the willing and appreciative co-operation of the milk-producer is very essential also. Unless the milk-producer himself understands what is meant by pure milk and heartily goes into the business of producing this and nothing else, success is hardly possible.

All authorities are now well agreed that the most practical solution of all the vexed milk questions which are so intricate and so difficult at the present time is first, to secure as pure a milk as possible, and then, second, to pasteurize it. So long as tuberculosis is prevalent in dairy cattle, so long will raw milk be dangerous even though every other point is attended to; and the very best of certified milk is liable to occasional infections from wild garget developing, and if it de-

N.H.A. MAY ABOLISH FINING PLAYERS

This Matter Will Be Taken Up
at Meeting To Be Held
Today.

BENCH PLAYERS INSTEAD

O. H. A. System of Penalizing Rough
Players Is Found To Be Most
Satisfactory.

[Canadian Press.]

Montreal, Nov. 8.—The annual meeting of the National Hockey Association will be held at Kestel's Hotel this evening. Among a number of important matters to be dealt with are the suggested abolition of the fine system and a return to the old system of penalizing players by sending them to the bench for varying periods, and the recommendation that the Maritime League be considered a minor association from which players can be drafted by the N. H. A. and the Pacific Coast clubs. The Maritime League itself is seeking to be recognized as a major association.

An amendment to the constitution is proposed by which the president shall be elected for a time of not less than one year and not exceeding three years. This will probably be carried. A permanent board of reference is also recommended.

The ownership of Wilson, a Pembroke player, claimed by Ottawa and Toronto, will come up for settlement.

"SHAG" TRIED TO LAND HARRY BRANT

Fort Wayne Put in Draft For
Ex-London Player, but It
Was Disallowed.

CHATTANOOGA GOT HIM

Same Method of Getting Bramble Was
Used in the Case of the Peter-
boro Shortstop.

It has just transpired that Manager Frank Shaughnessy, of the Ottawa Baseball Club, tried to land a good shortstop for next season by the draft route. Shaughnessy went after no less a player than Harry Brant, of the Peterboro Club, who was a member of London's first Canadian League team, but was released the following season by Manager Bowerman. The Fort Wayne club put in a draft for Brant, just as they put in a draft for Bramble, but the draft for Brant was disallowed. The Chattanooga Club, of the Southern League, beat Fort Wayne for Brant, and he goes there.

It was undoubtedly an attempt of Shaughnessy's to secure Brant for his 1914 Ottawa team. Fort Wayne secured Bramble by draft, but there is little doubt that the former Berling pitcher will be seen in an Ottawa uniform next season.

LILL DENIES HE WANTS PRESIDENCY OF A. A. U.

First Vice-President States That He
Is Not a Candidate, But Will
Lead If Chosen.

[Canadian Press.]

Boston, Nov. 8.—Alfred J. Lill, Jun., first vice-president of the Amateur Athletic Union, announced today that he is not an avowed candidate for the presidency of the organization, but is willing to give his best efforts to lead if chosen. Vice-President Lill made no reference to the candidacy of George W. Pawling, of Philadelphia, now second vice-president of the Amateur Athletic Union. The annual meeting of the union at which a president will be elected, will be held in New York Nov. 17.

Pimlico Results

Pimlico, Nov. 7.—Juverence, paying better than 3 to 2, beat a big field in the handicap steeplechase here today. Three of the flat races went to long shots. Summary:

First race, all ages, maidens and winners of one race, 6 furlongs—1 Kewness, 2 Ray o' Light, 3 Monmouth. Time 1:12 3-5.

Second race, selling, handicap, 2-year-olds, 6 furlongs—1 Armand, 2 Walter, 3 Excutor. Time 1:14 4-5.

Third race, all ages, 5 1/2 furlongs—1 Flittergold, 2 Besom, 3 Charleston. Time 1:06 2-5.

Fourth race, selling, handicap, 4-year-olds, 4-year-olds, 2 1/2 miles—1 Juverence, 2 J. C. Ewall, 3 Foxcraft. Time 4:53 3-5.

Fifth race, selling, handicap, 2-year-olds and up, 6 furlongs—1 Rod and Gun, 2 Agnier, 3 Captain Elliott. Time 1:14 2-5.

Sixth race, selling, handicap, 3-year-olds and up, 1 1-16 miles—1 Dangerous March, 2 Cliff Stream, 3 Col. Ashmeade. Time 1:48 4-5.

Tire Taxes Which We Pay for You in No-Rim-Cut Tires No Other Maker Does It

The cost of tire upkeep lies mainly in these three shortcomings:

Rim-Cutting—Blow-Outs—Loose Treads.

We spend fortunes each year—spent by no other maker—to minimize these costs.

We save tire users in these ways many thousands of dollars. And Goodyear tires, on this account, outsell any other.

Note now how we do it.

The Rim-Cut Tax

Our No-Rim-Cut tire ends rim-cutting completely, and we control the way.

The method we use—the only feasible method—is protected by secrecy.

The rim-cutting tax is enormous.

Careful statistics, made by public accountants, prove that rim-cutting ruins almost one clincher tire in three.

We wipe out all that tax.

The Blow-Out Tax

Most blow-outs are caused by wrinkled fabric, shirking its part of the strain.

The wrinkles are caused by curing, under fierce compression, on an iron core. All tires save Goodyears are cured on iron cores alone.

No-Rim-Cut tires are final-cured on air bags, shaped like inner tubes.

They are vulcanized on elastic air, as you use them.

Thus the fabric adapts itself to actual road conditions. Wrinkles are

stretched out. Every inch of every layer does its share of duty.

We add to our tire cost \$300 daily to thus save blow-outs for you.

Loose Tread Tax

Tread separation usually occurs close to the breaker strip—an essential fabric used at the base of the tread in all standard tires.

We use a patented fabric, woven with hundreds of quarter-inch holes. The tread rubber, in its plastic state, is forced down through these holes. Then the tire is vulcanized en masse.

Thus hundreds of large rubber rivets are formed to prevent tread separation.

\$50,000 was paid for rights to this method, and no other maker employs it.

We Pay It All.

All this extra expense is to save you expense—save you many times what it costs us.

At one time—on this account—No-Rim-Cut tires cost one-fifth more than others.

But multiplied output has cut cost of production until it balanced this extra cost.

Now no standard tire of any type costs less than No-Rim-Cut tires.

So you get these savings, without a penny of tax, by simply insisting on Goodyear No-Rim-Cut tires.

Read the facts again and judge if you want them. If so, bear in mind that no other tire gives them. Our dealers are everywhere.

THE GOODYEAR TIRE & RUBBER CO. OF CANADA, Limited

Factory, Bowmansville

London Address: Central House, Kingsway, London, W. C.

Head Office, Toronto

This Company has no connection whatever with any other rubber concern which uses the Goodyear name.

"STARR"

Canadian Made
Hockey Skates

The Symphony of Skating

On a winter evening, in almost every Canadian town, under the clear, starry sky, you can hear this beautifully fascinating rhythmic Symphony.

Hundreds of happy, red-cheeked couples go swinging round the curves of the rink, the bends of the river, or the broad stretches of the lake, their glittering "STARRS" flashing on their feet.

They skate lightly—gliding—alive and joyous—the merry skates of the "STARRS"—the happy laughter—the musical rhythm of the strokes all combine to make this wonderful Winter Symphony.

Have you ever heard this Symphony? Of course you have—then help us to be a joyous anthem—blithely yourself to a pair of "STARR" Skates, and swing out with the rest.
