the cause of a telegram received at the offices of the local government Saturday, from a resident of that city asking that the government look into the matter. The inspector of mines at Fernie made an examination and stated that it was but a small fault due of natural settling along the natural lines of cleavage, and that it did not portend a landslide. The following message from G. G. S.

Lindsey in reply to a message of in quiry from the Colonist, is self ex-"Colonist, Victoria, B. C.—There is not the slightest possibility of a mountain slide, nor has there been one at Coal Creek mine. A small fissure, due to natural settling along natural lines of cleavage shows in the mountain but is quite harmless. The reports of our officials and of an eminent expert brought from Illinois to report, state after thorough investigation that in their opinion this is nothing more than a natural settling of rock and there is absolutely no danger whatever to life or property at either the mine or the town of Coal Creek from the existing conditions or from any result of the

conditions, which, in their opinion could happen. Government Mine The spector Thomas Morgan made a close examination yesterday and entirely en-dorses the foregoing opinion and states that he has seen many such fissures in this province before and that where the rock lies horizontally and is of the same strong sandstone formation as here, the possibility of a slide is absolutely out of the question.

G. G. S. LINDSEY."
