An Interesting Cow Census.

FIGURES FROM CANADIAN HERDS. SOME STRIKING CONTRASTS.

Department of Agriculture,
Ottawa, Jan. 26, 1905.

At the Eastern Ontario Dairymen's
Convention, Mr. F. C. Whitley, of the
Dairy Commissioner's Branch, Ottawa,
gave a very interesting account of a
cow census which he conducted in the
vicinity of Cowansville, Que., during
the summer of 1904. Under his supervision seventy-two farmers kept daily
milk records of their cows and three
times a month took samples for testing from the milk of each individual
cow in their dairies. In this way
reasonable accurate figures were obtained.

For the month of June the general
average of all the herds tested was
652 lbs. of milk, yielding 25 lbs. of
fat. In one case twenty-two cows had
a yield for the month of 17,845 lbs. of
milk and 722.5 lbs. of fat, an average
per cow of 811 lbs. of milk and 32.4
lbs. of fat. In another herd of eleven
cows, every animal was below the general average, the range being as low
as 280 lbs. to 805 lbs. of milk per cow,
and this herd consisted of Jersey,
Guernsey. Ayrshire and Holstein

Tipurose power engine, a silage cutter
and a 23-foot elevator. The silo being
in one corner of the barn right beside
the door, I built an ell 10x23 feet beside the driveway to the barn and put
alorge door opposite the cutter, I could
drive a load up alongside and take
from the load to the cutter.

This makes filling the silo very simple and easy. I also bought a steel
frame saw bench and saw, and when
wood-cutting time comes I remove the
cutter and put the saw in its place. I
hall my wood directly to the saw, and
when it is all hauled it is all sawed.
After this is done I can load my machine onto a sled and go out and cut
about 125 cords for my neighbors.
When I return home I can put a rip
saw in the place of the wood saw and
sue it through the winter.

I purpose to buy a small mill and do
my own grinding. Another plan is to
build an ell on the other side of the
driveway parallel with the cuttingroad and easy. I also bought a steel
frame saw bench and saw, and when
wood-cutting time comes I remove the Department of Agriculture,

and this herd consisted of Jersey Guernsey, Ayrshire and Holstein SIX YEARS WITH A GASOLINE ENgrades and natives. In contrast to this, another herd of twelve cows of similar breeding yielded from 830 to 1115 lbs. per cow, so that every cow in the herd was above the average. This shows that the flow of milk depends upon the individuality of the cows even more than upon their breed-six years.

My five-horse power gasoline engine has given me excellent service for six years. We use it to cut 4-foot wood, for running bench saws, a feed mill and slage cutter. It has cost us comparatively nothing for repairs in the six years. similar breeding yielded from 830 to

In the month of July a herd of twenty-seven cows, Jersey, Ayrshire. Holstein and Shorthorn grades, gave according to the amount of work you are doing. With gasoline at 12 cents per gallon to saw 4-foot wood, it will cost about 36 cents for ten hours' Holstein and Shorthorn grades, gave 13,760 lbs. of milk and 473.7 lbs. of fat, an average of 509 lbs. of milk and 17.5 lbs. of fat per cow. This was fat, an average of 509 lbs. of milk and 17.5 lbs. of fat per cow. This was typical of several herds consisting of mixed grades. The average record per cow is poor, noticeably below the average of the whole 1120 cows for July. The best showing was made by a Holstein grade, whose record is more than double that of the poorest cow. This dairy had five more cows than This dairy had five more cows than that first mentioned, and yet produced that the first mentioned, and yet produced engine very valuable. 4,000 lbs. less milk in the month. Another July record showed that one herd of six cows gave 2515 lbs. cf milk, while another dairy of twelve milk, while another dairy of twelve cows gave 8,020 lbs.; twice as many cows gave over three times as much milk. In September one lot of twenty-three cows gave 8,120 lbs. of milk, and profiner lot of twenty-three yielded 11,200 lbs. These records emphasize the need for knowing definitely the production of each individual cow.

The average production per cow must be improved by weeding out the poor ones. Figuring goes well with farming. With forethought and figures the production of butter in the average will be applied. Along in January I go over my orchards carefully, and cut all surplus wood from the trees, dead limbs, unnecest the production of butter in the average growth, etc., and also prune and size of the competition against their line.

81,550 to put the Marconi system on the steamers Stanley and Minto. It works well. The Anglo-American Telegraph Company were protesting because of the competition against their line.

Mr. Fitzpatrick stated that the Bill respecting British Columbia immigration, which was recently passed, was formed the received and surplus wood from the trees, dead limbs, unnecestated that the Postman and the production of butter in the average quantity of the farming. With forethought and figures the production of butter in the average production of butter in the average production per cow must be improved by weeding out the poor ones. Figuring goes well with farming. With forethought and figures the production of butter in the average production of butter in the average production of butter in the average production of the deal of winter caring for the steamers Stanley and Minto. It works well. The Anglo-American Telegraph Company were protesting because of the competition against their line.

Mr. Fitzpatrick stated that the Bill of the cause rank growth and does not improve the yield or quality of the fruit. However, an average quantity of fertilizer should be applied. Along the production of butter in the average production of the desirability of instituting the production of the de

ent in the records for longer periods

least 40 lbs. per year in five years. It

herds, and well above the census average of 115 lbs. per cow for fiv twelve cows in this herd exceeded the general average, ranging from 147 to This man's record can be, and should be, equalled on a thousand farms in the next five years. Such results are obtained by using the scales and Babcock tester to detect the robber cow and get rid of her. Then, by the use of a good dairy-bred sire, and aiming at a standard of say 6,000 lbs. of milk and 250 lbs. of butter per cow annually a good herd can speedily be annually and annually a good herd can speedily be annually and annually an sults are obtained by using the scales annually, a good herd can speedily be graded up. There are hundreds of dairy farmers who have thus raised the butter production of their herds in a few years from 150 or 175 lbs. to

300 lbs. per annum.
W. A. CLEMONS, Publication Clerk

Evenings at Home. Recipe for making farmers' boys ove to stay at home in the evenings:

1. Treat them as partners with you. Give them to understand that they are interested in the success of the farming operations as much as you are yourself. 2. Converse freely with them. Get their opinions, and give them yours. If at all prudent, make use of their plans, and when you think your own best, explain to them why you do not adopt theirs. Don't keep them altogether in the dark with reference to your plans for the future.

3. Don't require them to stay at home in the evenings all the time. When there is any meeting or entertainment from which they might receive benefit, be sure to let them go.

4. Provide them with plenty of good books and papers; especially referring Sick Headache

Sick Headache

This distressing ailment results from a disordered condition of the stomach. All that is needed to effect a cure is a dose or two of Chambherlain's Stomach and Liver Tablets. In fact, the attack may be warded off, or greatly lessened it; and it will be better for you and them to let them have it.

7. A little rational amusement now and then, such as croquet, cricket, a sail, and a swim, will give variety, health and contentment.

Afraid of Strong Man.

Sick Headache

This distressing ailment results from a disordered condition of the stomach. All that is needed to effect a cure is a dose or two of Chambherlain's Stomach and Liver Tablets. In fact, the attack may be warded off, or greatly lessened in severity, by taking a dose of these Tablets as soon as the first by S. N. Weare.

Boston, Jan. 30.—At a leave tended legislative by process.

Many people suffer for years from rheumatic pains, and prefer to do so rather than take the strong medicines usually given for rheumatism, not knowing that quick relief from pain may be had simply by applying Chamberlain's Pain Balm and without taking any medicine internally. For sale

HOG PROFITS

The hog is a machine to make pounds of pork. In raising hogs for the market, the profit is rapid and healthy growth. Feeding to simply sustain life makes you no profit. A food that will fatten your hogs in the shortest time, and with the least waste, is the profit maker. To get the most good out of its food, the hog must thoroughly digest and assimilate it. It is this assimilated food that makes the pounds of pork. The addition of Clydesdale Stock Food will enable it to do this. It creates an appetite for a full ration. Many farmers seem satisfied to let the hog "root" for itself. There is no better money maker on the farm if given half a chance. Clydesdale Stock Food will enable you to get your hogs to the market at least thirty days sooner; this is money saved. Mr. A. D. McDonald, Fericho, Ont., says: "I fed it to six fattening hogs as a test and found the hogs that received Clydesdale Stock Food made a decided gain over those that received none." This is "WISE FEEDING." Don't neglect the "RUNTS", they can be made to grow, and be kept growing, by using Clydesdale Stock Food. It will also keep your hogs in such healthy condition as will enable them to withstand Hog Cholera the greatest menace to hog raising. Keep your hogs and pens clean by using Carboline Antiseptic; as hogs thrive better when clean. If not satisfied after using, your money will be cheerfully refunded by our dealers in your district namely:

least 40 lbs. per year in five years. It has been done scores of times. It is safe to say that almost every farmer milking twenty cows has three on which he loses money. Until he keeps records, he cannot tell which they are. It will pay him to find out.

The wide variation in the total yields of butter by individual animals in the same herd is even more apparpays, as many insect eggs are thus routes all over the Union. Even with this governous cuttley it was only the ent in the records for longer periods.
For four months the cows in one herd of fourteen varied from 46 to 114 lbs., the best cow yielding nearly three times as much as the poorest. The average for the herd was 81 lbs. per cow, while the general average of all the cows tested for four months was 98 lbs. Would not this man le better off if he disposed of at least four the first of the work that had been to think it the best policy, but I begin when my trees are young and head them low. In my opinion this results in a sturdier tree and one that can bear up under a heavy yield of fruit better than a scrawny tree. Another item in favor of low orchards is that off if he disposed of at least four 188 lbs. Would not this hand to letter of the disposed of at least four cows? Another herd varied from 51 to 127 lbs. per cow, with an average below the census average. It is probable that both men think they have pretty good cows.

For a period of five months, one dairy made the creditable showing of 190 lbs. of butter per cow, more than double the average of some other

Comfortable Living Chatham Incubator. GOOD MEAT

Boston, Jan. 30.—At a largely attended legislative hearing on the reciprocity question here today, President Henry M. Whitney, of the Boston Chamber of Commerce, said that while in Washington recently President Roosevelt told him that he is in hearty accord with the movement for closer trade relations between the United States and Canada, and that he would do all in his power to assist in bringing it about.

Boston, Jan. 30.—At a largely attended to a very profitable and easily managed occupation. It needs but little of your time, unless you wish to go into it extensively.

REASON Nº 6

Red Rose

Because of the care in Selection and Blending.

My agents in the east are expert tea tasters, and every lot of tea that is sent down from the Gardens has to pass their inspection. They take samples from the chests and carefully taste them, then if the tea is fully up to the Red Rose standard, it is accepted and shipped; if not it is rejected.

The most important test of all, however, is when the tea arrives here, as during the passage through the Red Sea, the very great heat often affects the Tea very seriously. Immediately on arrival, samples are taken from each lot and subjected to the most rigid tests, and only those teas which have retained all their original flavor and strength are used for Red Rose (the balance is jobbed off in bulk).

When blended and ready to be put into sealed packages, it is tested again just to make sure no mistake has been made in the blending; nothing is left to chance. Will you test us by ordering a package?

OUR LADY OF THE SNOWS. "England has been snowbound for two days, with intense cold every-

where."-Cable despatch, Nov., 1904.

"The weather is awful over here,
It makes the people groan;
The blizzard goes like sixty,
The wind like fury blows!"
"Well, that's too bad, O England,"
Said Our Lady of the Snows.

Daily the deep sea cable
Spoke in the self-same strain,
It told of the snow-bound British Isles,
Beyond the raging main;
The railroads stalled, the children
With many a frozen nose.
"That's pretty tough on England,"
Said Our Lady of the Snows.

The author, Rudyard Kipling, Awoke from his healthful sleep, He scratched the frost from the

dow,
And outward he took a peep;
With shovel and broom he labored,
Recounting his many woes.
"Hey, clean your sidewalks, Rudyard,"
Wired Our Lady of the Snows. "Carry the word to my sisters,
To the Queens of the South and

East,
That England has Arctic weather,
While I haven't had the least.
That England is wearing mufflers,
While I'm in my autumn clothes,
And carry the word to Kipling,"
Said Our Lady of the Snows.

Mamma-Fighting again, Willie?

LOVERS' ALARM CLOCK. A Lorne Elm (Mo.) genius has in -Common table salt is excellent for vented a lovers' alarm clock. At 10 cleaning the teeth and removing tar-tar from them. It also hardens ten-doors open, and a figure of a man, der gums. Wet the brush and apply attired in a dressing gown, appears; to the salt, and use as any other holding in his right hand a sign which are inscribed the words, "Good

night." -"Now, don't let the baby cry, "Yes'm, but her crying seems to

ma'am."-Boston Journal.

The Steamer, "Kilkeel" has lately discharged for us a cargo of PORT HOOD COAL of superior quality.

We have a large stock of extra good Hard Coal.

J. H. LONGMIRE & SON

Right quickly nothing works so nicely as Nerviline taken real hot. It mends a glowing warmth all through the body, and when rubbed on th
