54 Oliver St., BOSTON, Mass., U.S.A.

We manufacture Barker's Patent Noissoles
Fast-running Doffing Comb

Barker's Patent Double Apron Rubbing
Motions for Condenser Cards

Are in successful operation on all grades of stock, being generally
adopted because they change carding and spinning
rooms for the better.

James Barker, Cotton and Woolen Machinery

Second and Somerset Streets, PHILADELPHIA, Pa.

mainly due to the delay in shearing and the lateness of our season in general

There can be no doubt that at the end of the statistical year (30th June, 1895) the export figures will show a substantial gain on last year's figures, as a large increase may be looked for from both New South Wales and Queensland, whilst it is expected that the Victorian production will not differ materially from last season's, owing to the wet weather having caused an abnormally heavy death rate among sheep.

Steamer freight to Boston, via San Francisco or Vancouver, or, via London, is quoted $\frac{1}{2}$ to $\frac{3}{4}$ d. per lb. grease Exchange— $\frac{1}{2}$ per cent. for 60 days' sight on London.

TORONTO WOOL MARKET.

No foreign demand; locally, very little doing yet. There are some indications of an improved demand, but up to the present sales are small. Prices are unchanged at 18 $\frac{1}{2}$ c. for fleece combings, 17c. for fleece clothing Pulled super is worth 18c. to 19c., and combing same prices. Extra, 20c. to 21c.

NEW DYESTUFFS.

Wm. J. Matheson & Co., Limited, of New York and Montreal, call your attention to a sample card with dyeings, which they are distributing to the trade, illustrating another very valuable addition to their list of Diamine Colors, namely, Diamine Fast Yellow B. The color dissolves readily, and is dyed as follows.—

Cotton may be dyed in copper or wooden vats, in alkaline or neutral baths—that is to say, with soda and Glauber's salt, or with the latter only—which property distinguishes it advantageously from competing products

Diamine Fast Yellow B is distinguished by its great fastness to light, surpassing in that respect all other yellow dyestuffs, including Alizarine Yellow. Severe washing does not influence the shade of dyeings done with Diamine Fast Yellow B, and white washing together with such dyeings is scarcely tinted. Its fastness to hot ironing is good, and the color will even resist the passage through a strong solution of chloride of lime. The above properties, in connection with the low price of this dyestuff, render it one of the most desirable colors not only for self colors but for mixtures. Diamine Fast Yellow B does not change by diazotising and developing, and is well adapted for mixtures with dyestuffs that are to be diazotised, for instance, in combination with Diamine Black or Diamine Brown.

Cotton and Wool or Cotton and Silk.—It gives the same shade on the different fibres, with the advantage of covering the vegetable fibre on wool and silk.

Wool and Silk.—Its fastness to washing and water should make it welcome to the silk industry. Wool and silk are dyed with the addition of 10 per cent. Glauber's salt and 5 per cent. acetic acid.

Printing.—Diamine Fast Yellow B can be applied as a print color on all kinds of fabrics by simply printing and steaming. It should be of particular advantage for printing mixed goods composed of animal fibres. It is well adapted for padding, on account of its ready solubility, and producing the important cream and straw shades on cotton. Diamine Fast Yellow B can be as easily discharged as our Diamine Yellow N and Diamine Gold.

They will be glad to send further particulars to those interested.
