

# FELLOWS' HYPOPHOSPHITES!

(SYR: HYPOPHOS: COMP: FELLOWS.)

## To the Medical Profession of Canada:

In submitting to you my Canadian combination, Fellows' Compound Syrup of Hypophosphites, permit me to state four facts:

- 1st. The statements contributed are founded upon experience, and I believe them true.
- 2nd. This compound differs from all hitherto produced, in composition, mode of preparation, and in general effects, and is offered in its original form.
- 3rd. The demand for Hypophosphite and other Phosphorus preparations at the present day is largely owing to the good effects and success following the introduction of this article.
- 4th. My determination to sustain, by every possible means, its high reputation as a standard pharmaceutical preparation of sterling worth.

## PECULIAR MERIT.

FIRST.—*Unique harmony of ingredients suitable to the requirements of diseased blood.*

SECOND.—*Slightly Alkaline re-action, rendering it acceptable to almost every stomach.*

THIRD.—*Its agreeable flavour and convenient form as a syrup.*

FOURTH.—*Its harmlessness under prolonged use.*

FIFTH.—*Its prompt remedial efficacy in organic and functional disturbances caused by loss of nervous power and muscular relaxation.*

## GENERAL EFFECT.

When taken into the stomach, diluted as directed, it stimulates the appetite and digestion, promotes assimilation and enters the circulation with the food—it then acts upon the nerves and muscles, the blood and the secretions. The heart, liver, lungs, stomach and genitals receive tone by increased nervous strength and renewed muscular fibre, while activity in the flow of the secretions is evinced by easy expectoration following the stimulant dose. The relief sometimes experienced by patients who have suffered from dyspnea is so salutary that they sleep for hours after the first few doses.

## NOTICE—CAUTION.

The success of Fellows Syrup of Hypophosphites has tempted certain persons to offer imitations of it for sale. Mr. Fellows, who has examined samples of several of these, finds THAT NO TWO OF THEM ARE IDENTICAL, and that all of them differ from the original in composition, in freedom from acid reaction, in susceptibility to the effects of oxygen, when exposed to light or heat, in the property of retaining the strychnine in solution, and in the medicinal effects.

As these cheap and inefficient substitutes are frequently dispensed instead of the genuine preparation, physicians are earnestly requested, when prescribing to write "Syr. Hypophos. FELLOWS."

As a further precaution, it is advisable that the Syrup should be ordered in the original bottles: the distinguishing marks which the bottles (and the wrappers surrounding them) bear can then be examined and the genuineness—or otherwise—of the contents thereby proved.

For Sale by all Druggists.
