ZOEDONE.

A Delicious Beverage

The BRITISH MEDICAL JOURNAL says:

"We can confidently recommend it to the attention of physicians and others w_{ho} are occasionally at a loss what to direct their patients to take when parched by feverish thirst or depressed by exhausting ailments—notably in cases where alcoholic stimulants would be prejudicial. We feel that it would be found exceedingly useful in mitigating the discomfort of times experienced by those suffering from the thirst, loss of appetite, and general malaise connected with the last stage of phthisis and chronic bronchitis. We would also, from our observations and experience, advise its introduction into clubs, taverns, and places of public amusement, where it would judiciously supersede vinous and alcoholic stimulants, seeing that it contains, as its name implies, life-giving ingredients in a form easily assimilated."

A BRAIN AND NERVE TONIC.

The LANCET says: "ZOEDONE contains the soluble phosphates of lime, iron, soda, and potash in medicinal quantities. Very efficient and pleasant."

The MEDICAL PRESS AND CIRCULAR says: "Is commendable equally for the style in which it is put up and the delicate flavour which it possesses, and also on account of its special merits as a nervine tonic."

NON-ALCOHOLIC. STIMULATES BY STRENGTHENING

CAUTION.— Dealers should be on their guard against numerous Imitations of ZOEDONE, put up in the same style and offered as substantially the same article. The composition of ZOEDONE is protected by Letters Patent, and the Zoedone Company will proceed against infringements.

Every Chemist that has introduced ZOFDGNE has found a large and regularly increasing sole for it.

It is put up in Champagne Bottles, and there is no trouble with empties, as the bottles are included in the price.
