hed! It is an outrage alike on humanity and common sense. If you wishied to keep two duellists from fighting, or a ganig of desperadoes from nutual mischief, wouid you arm thom all from head to foor with weapons of deith? Is full prepration fur a duel the best means of preventing it? Doss the practice, prevalent in the southern and sotith-western states of America, of wearing pistols, dirks and bowvie kniyes, hold back men from bloodshed, or make the uumber of bloody and fatal affrays thore less than the opposite practice nocasions in New England? Every clild can answer these questions; and yet the rulers of Christendom are contrudicting this plainest dictate of common sense in their war methods of preserving peace. The whole war-system rests on this very contradiction of common sense; and still do the wise nen of this worid plead for its necessity as a guarantee of peace, and scout the idea of insuring peace by pacific means !

Augusfa, March 20, 1839.
The resolve on the Boondary, which passed our Senate on Tuesday, oane up in the Ilouse the same day, on its passage to be engrossed. An amendment was offered by Mr. Delesdernier, to the effect that the militiary force shall not be withdrawn, until The Lt. Governur of New Bunswick shall abandon his claim to reclusive juristiction over the disputed territory, which led to much debate, hut the house aljourned without taking any question. - This morning the mover of the athove amendment withdeew it and offered another, striking nut all the original Resolve and insertiag new oues, which are in substance as follows: They affirm the indefansible right of Maine to esercise exclusive jurisdiction over the whole of the dispated territory, but waive for the present the exercise of such jarisdiction over that portion of the territory heretnfore in British possession. They, however, declare it to be the duty of Maine to exercise jurisdiction over the whole territory, so far as jurisdiction is involved in the expulsion of trespassers and the protection of public property. They furhermore authorise the Governor to withdraw the military when he is satisfied that they are not necessary to sustain the civil force on the terriony.
All expressed themselves satistied with tha Resolves as they would stand by the amendment-afier which they were unanimously adopted. hfr. Vose, of A luqusti, then oflered two additional rasolves to the rezolves as amended, by way of amendment and these also wero adepted, afeer $n$ slighit alteration. Thee, $p$ ur port of the Rasolyes ofered by Mr. Vose, is, that Maine will not consent tio a conventional line, and that in the event of a refusal by Great Brituin to assent to a joint commission for the survey of the line, as described ly the traty of ' 83 ---ilhen it, wiil be the duty of the Genemal Government to take and maintain jurisdiction of the whole territory in dispute.
The Resolves are still kept before the Uouse, as the nucleus around which members are prouring pitriotic "war" speeches. They will pass wihnotany material amendment, by an almost unanimaus vote. Whether they will go through the other braneh, timo"alono will determine.

From the Canadtas we have no news of any inportanco. It is shated in one of the papers that the Ifon. Chief Justice O'Sallivan died in consequence of a wound received ibout uineteen years ago, in a duel. A ball which he then received had not been extracted, find he was consequenly subject to the nost cxeruciating pains.-A Court of Inquiry has benininstituted, to examine the accusations preferrect against Cotonal Prinee in' a pampllet eatitled "The Batte of Windsor," and vouched by a letter sent to Governor Arthur, accompanied by the signatures of the authors of that publication. The charges have reference to the conduct of Col. Prinse in shootiag the priscoers in the most barharous manner long after the bettle was ended. For the sake of our common bumanity we hope the clarges will prove to be wiffounded.

The report concerning Col. Prince of U. C. having killed Mr Baby in a duel, we are glad to find, is incorrect.

We shall be happy to comply with the request of " $A$ member of the Colchoster Literary and Scientific Society." A portion of the Essay will appaar next week.

At the last neeling of the Institute Dr. Teulon resumed his former subject-the prevention of disease. The lecture was studded with useful and judieious remarks; Dr. Teulon will lecture nest Wednesday evening.

Our youllful readers of both seres will find the tale on our first page by Mrs. Caroline J.ee !lentz, one of a most amusing character. We hope, however, they will not devour the amusement, without imbiling also the instruction of the piece. Our author has a most hideous nume. and yet sle contrives to write most sweetly. Our young friends have not forgoten the Blind Girl's story, by the same author, in our first volume. The present tale will be concladed in our next number.
"Marmion," in refutation of our opiuions on thic unlawfulness of all war on christian principles, will receive our euricest at ention. The letters of 'Lilian Ching' agninst war will be concluded in our next number; ; after which we shall have space for the interesting aud ablo paper of our friendly antugonist. Our correspondent, we doubt not, will be too generous to suppose tha we defer his article, merely to gain time to prepare our answerWe can assure him that his objections to the principle of total abstinence from all war, are old nequaintauces, and for a long time were entertained in our own bosom; and it was not until we hid been bronglt 10 view the whole subject by the clear light of the Gospel, unobscured by the doctriue of expediency, and the darkness o fail human rouson, and in view of the unspeukable, perlaps we should say infinte, value of the immortal soul, that we were brought, very reluctantly to part with them. In saying 'ilis, we do not mean to claim any superior discornment, or devotion to the eause of truth; but we have made the war-question a distinct subject of long and rigid examination $n_{2}$ and before forming our judgnont on the matter, we read every thing we could procuro which has been written since the Reformation on both sides of the subject.
** In the last number of the Pearl, our publisher, by omitting o mention the source from which the piece was obtained, made as to say that we had delivered a " very interesting lecture on the Bones of the Iluman Body." Perhaps, however, he thought that we were decidedly of that opimion ourselves, nad so neglected to give credit to the Novascotian for the assertion.

By the Industry from Bosion we have dates one day later han by previons arrivals. There is no addition of news of any impurtance.

The steame: Mnid of the Mist commenced her regular trips on Monday to St Andrews, Eastport, and Novil Scotia. 'This hiont has been fitted up in complete order, and no expence has been spared by her enterprising owner to malic her ready for the reception of passengers.-Nov.

## From the Novascotian
