

PROROGATION OF THE QUEBEC LEGISLATURE NEW LAWS ASSENTED TO.

QUEBEC, April 2.—The Legislature was prorogued to-day with the usual ceremony. At 3 o'clock sharp the Lieutenant-Governor drove up to the House in a sleigh drawn by four fine horses and accompanied by an escort of cavalry. As he arrived at Battery, which had been drawn up opposite the front entrance, presented arms and a salute of fourteen guns was fired. His Honor, attended by Captain Sheppard, B. C. C., and Mr. Taohs, private secretary, proceeded to the Legislative council, where he took his seat on the throne surrounded by his brilliant staff and several of the ministers. The members of the assembly were summoned, and the clerk of the Assembly read the list of bills submitted to His Honor for sanction. Out of 125 bills passed this session four have already been sanctioned, 120 were sanctioned this afternoon, and the remaining one, that to legalize the marriage of Miss Bourassa, was held over for sanction by the Governor-General. The Speaker of the Assembly then submitted for sanction the bill of supply, after which His Honor read the following speech from the throne:—

Honorable Gentlemen of the Legislative Council:

Gentlemen of the Legislative Assembly: I come in Her Majesty's name to sanction the numerous acts which you have passed during the session, and to thank you for the zeal and intelligence you have displayed in the performance of your legislative duties.

Gentlemen of the Legislative Assembly: You have generously voted the supplies asked of you for the various branches of the public service. I thank you for them, and will see that the sum placed at the disposal of the Government be expended with economy and according to law.

Honorable Gentlemen of the Legislative Council:

Gentlemen of the Legislative Assembly: In Her Majesty's name I terminate your labors, relieve you from your legislative duties, and tender you my warm wishes for your individual happiness and that of your families and for the welfare of this province.

His Honor then drove off in the evening escorted by his staff and some of the Ministers to dinner at Spencer Wood. It was remarked that the attendance at prorogation was very slim, both of members and the general public. Only half a dozen councillors and about a dozen assemblymen were present. They only other persons of importance on the floor of the House were Bishop Williams, ex-Lieutenant-Governor Masson, Judge Plamondon and Mr. Kyder, the American consul.

The following is a statement of the work of the session:

THE WORK OF THE SESSION.		
	1890.	1889.
Length of session, days.....	86	72
Number of working days.....	62	53
Number of divisions.....	72	64
Petitions presented.....	300	429

An act to amend the Code of Civil procedure respecting proofs.  
An act respecting the construction of a bridge over the River St. Lawrence at or near Quebec.  
An act respecting the conversion of land subsidies to railway companies into money subsidies.

offense to one's neighbors. True liberty consists not in flaunting your own rights in the face of your neighbors, as if you were defying him to "break on the tail of your coat," but in avoiding all occasion that may have even the semblance of trenching on his.  
No one challenges the right of these zealous but indiscreet ladies, or of any other man or woman, who fancies the split moves him, or who, as happens in the great majority of cases, is too lazy to earn his bread by honest labor, to hold religious, or for the matter of that anti-religious, assemblies when and where they please, until they exhaust themselves in fruitless efforts at reformation of morals. Every intelligent person will admit that the best and wisest plan would be to let them do so, not only unmolested, but unnoticed. Treat their follies with silent contempt. If human beings were bereft of feelings, like statues, this is assuredly what they would do. But moralists in their digresses must not ignore the frailties of human nature. Unfortunately a living organism is composed of flesh and blood; and there in their turn are endowed with feelings which, despite the salutary restraints of law and religion, kick against the yoke.  
But having a legal right to do a thing, and insisting, *coute que coute*, on carrying it out under all conceivable circumstances, is a very different thing from many projects, excellent in theory are found practically impossible. In all crimes, moral and legal, it is the intention which constitutes guilt. No person has any right to act in any manner offensive to his neighbor. Buy what moral right do these people intrude on their neighbor's vineyard? What impels them to invade the quiet of a peaceful neighborhood? Have they been invited? They will plead forsooth that they have a mission to preach the gospel, that they are chosen apostles filled with the Holy Ghost. They are on a chase, a wild goose chase; that, for the lost sheep. Their hearts yearn, hunger and thirst for the conversion of those poor benighted pagans, for whose unhappy fate their benevolent souls languish and are filled with woe. Well, but for the welfare of others is worthy of all praise, a high order of excellence. It is the qualities of the great moral precept—"Love one another." Every attribute of the mind exercised in moderation is a holy and blessed heritage; unduly stimulated a curse. These over-zealous people—the female portion, at least, it is more than probable fancy that it is their duty to give up all and follow after a "will-of-the-wisp"; and perhaps see nothing incongruous in their conduct. Intellectual blindness is the distinguishing characteristic of hobbies. Such zeal is execrable, it may be commendable, in attempts to emancipate savages, who intellectually are not too finely strung, with moral susceptibilities blunt or rather eslimatory; and not likely to take offence, but rather see attractions in the spirits of the white man. But so differently constituted are human beings in the various stages of development; that what is right and proper in dealing with the savage may be criminal and dangerous to the peace in dealing with civilized people. It may fairly be assumed that every christian sect believes his own is the right one. At least he will be apt to believe so. Every sect has its own labor as a going to a fair if another tribe force him into another path, even though it were a much softer and pleasanter road to travel. He will be repelled instead of attracted. He will judge the soil by the crop. Here is where the difference comes in between the Ottawa evangelist and the Hull papist. The evangelist, like Johnna Souza, believe they are full of Christ; the Hull catholics believe them impious fanatics full of satan. It is impossible harmony could exist between such opposites, and in every interest, public and private, it is desirable that they should be kept as far apart as possible. For if they come in rapid or violent contact, like flint and steel, a spark will be omitted, which falling on inflammable material, may cause a wide-spread conflagration.  
It is in the best interests of society, and becomes the paramount duty of legislators entrusted with the preservation of society, that means be devised to prevent the awful calamities which may at any moment result from these conflicts. It should, it must, be the right of every individual to worship God in his own way, without fear or hindrance of the interference of others. Not only that, but if any one's preferences substantially differ from the duty of Christians, things, animals or inanimate—Sun, Moon, Apis, Osiris, Isis, he shall have like protection. But in the paramount interests of society itself, in the interests of law and order, in the interests of peace and harmony, street and other open air preaching should be prohibited. They are an intolerable public scandal, a danger and a menace to the peace of any but a highly enlightened homogeneous community. It is singular that whatever we borrow from the United States is that which is least adapted to our circumstances. Their street preaching is conceived, at least, as a mischief come of it. The people are too intelligent to be led by the nose by maniacs. The ravings of the half-witted preacher are listened to amid the jeers and laughter of the comic loiterers, his sole audience. He is a but for the sake of satire and ridicule from every point of the compass. He submits, perhaps unconsciously, to a torture which would by the patience of an elephant, with a humility and resignation worthy of an anchorite. He enters into serious disputes with street gamins on the most abstruse and abstruse questions of metaphysics. In a word he and his conjuring and sleight of hand out of court. There street and open air preaching is innocuous, here it is mischievous, and dangerous to the public peace. The meeting-house or conventicle of unauthorized or unordained preachers, male and female, should be under municipal control. Meetings should be held under license, and only in such places as the license designated. While this arrangement could not interfere with national freedom of worship, it would prevent the danger of setting up the tabernacle among inflammable materials, which might cause an explosion. The corporate control to be restricted to assigning a suitable locality for holding forth.  
What brings the evangelists to Hull? It is to be feared that, disguised as we may, the question is susceptible of but one answer. The magnet which attracts to Hull is of a kind with the anima which invites the naive Chiniquy and the best Flon to Ottawa—Intense fanaticism and a deep religious hatred under the guise of mild christianity. Well may it be asked, whether are we drifting? Are we going back to the cruel and wasteful scenes which disgraced Europe in the sixteenth, seventeenth and eighteenth centuries? It is difficult to contemplate with serenity the future of our country, when we see leading citizens, grave senators recognized public mentors set by the ears by half-demented religious enthusiasts. It is a mistake, perhaps willful, to attribute disorders, riots and commotions to the lower orders of the people. They are at best but the instruments, the weapons, with which society makes its protests and marks its disapproval. Few men are bold enough or strong enough or courageous enough to defy public opinion. There was never yet a pre-concerted tumult which had not the sympathy, active or tacit, of its class, party or faction at its back. Will anyone believe that the evan-

JERUSALEM AND THE HOLY LAND AT THE TIME OF THE CRUCIFIXION.

The grandest work of Art in America, pronounced by the clergy of all creeds, and by the thousands of people who have visited it, as unequalled anywhere for magnificence, conception, beauty of colors, harmony in composition, and so LIFE LIKE that one feels actually as if on the sacred ground. THE CRUCIFIXION scene is a marvelous work, alone worth coming many miles to see, apart from the CITY, MOUNT OLIVET, MORIAH, MIZPAH and ZION. This grand PANORAMA to be seen at the OYOLORAMA, corner St. Catherine and St. Urban streets, Montreal. Open every day from morning till 10:30 p.m., and on Sundays from 1 to 10:30 p.m. Street cars pass the door.

HOW MUCH MEAT IS ONE POUND JOHNSTON'S FLUID BEEF EQUAL TO.

JUST THIS: One pound of Johnston's Fluid Beef contains as much actual and real nourishment as 14 lbs. Prime Beef Steak, and it follows, therefore, that one Teaspoonful (or 1/2 an ounce) of Johnston's Fluid Beef contains as much nutrition as 1/2 lb. Prime Beef Steak. The value of a Food like this to Invalids, Dyspeptics and all needing strong nourishment in an easily digested form, must be apparent.

gellists would return to Hull, if they felt not assured of the support of Ottawa Protestants? Is it likely that the Hull mob would make a second resistance if they had any doubt of the direction of the public opinion of their town?

FRENCH-CANADIAN CHARACTER.

Tell me not that French Canadians are bigoted. Only nose-marinés will believe it. Every person, at all conversant with their character, knows that there is no today on the face of the globe a more kindly and tolerant people. Bigotry has no place in their vocabulary, the idea is so foreign to their nature that they can with difficulty comprehend it. Indeed their tolerance, blended with innate politeness, is so extreme, that not infrequently it verges on to a condition of subservency. Examples are so familiar, of every day occurrence, that an enumeration seems a waste of time, an unwarrantable trespass on the reader's patience. The selection of Protestants for legislative and municipal honors, in constitencies overwhelmingly French and Catholic, is so common as to excite neither surprise nor comment, except by contrast. Nor is this generosity limited to honorary appointments; it comprises lucrative also. This is as it should be in all civilized communities. Yet the example seems not very contagious, being only sparingly followed by people of much higher pretensions. It is well known when a Protestant with a drop of the milk of human kindness in his carcass takes up his abode in a French parish, though he were the sole representative of his class for miles round, he is not only treated neighborly, but hoisted on the people's shoulders, loaded with honors, favors, thick and fast, showered upon him, and that with a refined, fine-tact, delicacy, which vastly enhances its worth, as if he were obliging them and conferring a favor by accepting benefits at their hands. Every place of honor is open to him except the pulpit; no honor is shut against him but the salary, and the notary. He is the welcome guest of the clergy, and the notary. He occupies the place of honor at their public assemblies, convivial gatherings and festivities. He and his family are safe from the boorish interference and impertinent advances of the proselytizers. His ears will never tingle at indecent ribaldry, scurrilous references or lewd displays against his race or creed. No sense will be wounded by banners, song or music. His finer feelings will not be harrowed with such Christian greetings as "To hell with the Pope," "Croppies lie down." Such humane and enlightened partisans are the inherent privileges of the superior race. When French Canadians stoop to the carriage of a Protestant bishop on his lawful business to the streets of Quebec, then, and not till then, will I, at least, believe them to be heretic.

IRISH CITIZENS.

Having no authority to speak for Irish Canadians in this or any other public emergency, did I venture to offer gratuitous advice, it would be, if they take any hand in this unpleasant business, their part should be to stand shoulder to shoulder with their French fellow-citizens. For two reasons—1st. That that course will lead them to the side of morality, order and toleration; 2nd. That whatever political right they may enjoy in this "Canada of ours" is in no small measure due, indirectly it may be, to the influence of French in council and legislature. Were I foolish enough to take any physical part in the conflict, I would take my stand on Ottawa bridge, not ingress to Hull, and turn back the straying cattle into meadows of Hull might be more inviting to break the fences and make trespass. Breachy cattle sure lead to trouble among neighbors. This I would do in the interests of law and order to promote peace and harmony amongst the people.

Yours, &c., &c., J. L. P. O'BANLY.

Ottawa, February 16th, 1890.

TO THE DEAR.

A person cured of Deafness and noises in the head of 23 years' standing by a simple remedy. Will send a description of it FREE to any person who applies to NICHOLSON, 30 St. John street, Montreal.

DISTURBANCES IN RUSSIA.

Hooting Students Arrested and the Czar's Life Attended.

St. PETERSBURG, April 2. Count Dleanoff, minister of public instruction, has refused to receive the petition of the university students asking for a reduction of entrance fees, unrestricted admission of Jews and equality of males and females. Three hundred excited students assembled to-day, intending to march to the ministry of public instruction, but the police arrested 175 of them. Three hundred students of the Technological Institute and many pupils of the School of Forestry and the Academy of Medicine have been arrested for taking part in seditious meetings.

STUDENTS TO GO TO SIBERIA.

MOSCOW, April 2.—Fifteen of the student-arrested here will be tried on the charge of being political revolutionists. Forty-two have been expelled from the university. Of this number thirty-seven have been allowed the right to enter other universities. Forty-four will be subjected to minor punishments and the remainder will be released. The disorders are considered to be a sign of revolutionary plots in connection with the agitation in foreign countries regarding the treatment of political prisoners in Siberia and the letter of Madame Thebrikova to the Czar. It is not thought that the movement has the slightest prospect of success. The people are thoroughly loyal. Sixty-seven students

at the Charkoff university have been arrested and eleven expelled. Order has been restored there.

RUMORED ATTEMPTS TO KILL THE CAZAR.

LONDON, April 3.—A Berlin correspondent says a partially successful attempt has been made upon the life of the Czar. The name of the would-be assassin and the kind of weapon used are not known.

A St. Petersburg despatch says the peasants are rising in Kazan, and blood has already been shed. The agitation is spreading to Finland and Poland, and gendarmes and Cossacks have been sent to quell the disorder. The excitement is intense. Everybody sympathizes with the peasants.

One person in each locality can earn a goodly base of gold at work for an hour or two a day. Some earn \$20 a day and upwards, and all get a single ticket, and receive the following gold: Four ounces of Gold, one ounce of Silver, one ounce of Copper, one ounce of Brass, one ounce of Iron, one ounce of Lead, one ounce of Tin, one ounce of Zinc, one ounce of Nickel, one ounce of Platinum, one ounce of Palladium, one ounce of Iridium, one ounce of Rhodium, one ounce of Selenium, one ounce of Tellurium, one ounce of Vanadium, one ounce of Chromium, one ounce of Manganese, one ounce of Magnesium, one ounce of Calcium, one ounce of Strontium, one ounce of Barium, one ounce of Potassium, one ounce of Sodium, one ounce of Lithium, one ounce of Rubidium, one ounce of Cesium, one ounce of Francium, one ounce of Actinium, one ounce of Thorium, one ounce of Radium, one ounce of Polonium, one ounce of Astatine, one ounce of Tellurium, one ounce of Bismuth, one ounce of Antimony, one ounce of Arsenic, one ounce of Tellurium, one ounce of Selenium, one ounce of Sulfur, one ounce of Phosphorus, one ounce of Nitrogen, one ounce of Oxygen, one ounce of Hydrogen, one ounce of Helium, one ounce of Neon, one ounce of Argon, one ounce of Krypton, one ounce of Xenon, one ounce of Radon, one ounce of Francium, one ounce of Actinium, one ounce of Thorium, one ounce of Radium, one ounce of Polonium, one ounce of Astatine, one ounce of Tellurium, one ounce of Bismuth, one ounce of Antimony, one ounce of Arsenic, one ounce of Tellurium, one ounce of Selenium, one ounce of Sulfur, one ounce of Phosphorus, one ounce of Nitrogen, one ounce of Oxygen, one ounce of Hydrogen, one ounce of Helium, one ounce of Neon, one ounce of Argon, one ounce of Krypton, one ounce of Xenon, one ounce of Radon, one ounce of Francium, one ounce of Actinium, one ounce of Thorium, one ounce of Radium, one ounce of Polonium, one ounce of Astatine, one ounce of Tellurium, one ounce of Bismuth, one ounce of Antimony, one ounce of Arsenic, one ounce of Tellurium, one ounce of Selenium, one ounce of Sulfur, one ounce of Phosphorus, one ounce of Nitrogen, one ounce of Oxygen, one ounce of Hydrogen, one ounce of Helium, one ounce of Neon, one ounce of Argon, one ounce of Krypton, one ounce of Xenon, one ounce of Radon, one ounce of Francium, one ounce of Actinium, one ounce of Thorium, one ounce of Radium, one ounce of Polonium, one ounce of Astatine, one ounce of Tellurium, one ounce of Bismuth, one ounce of Antimony, one ounce of Arsenic, one ounce of Tellurium, one ounce of Selenium, one ounce of Sulfur, one ounce of Phosphorus, one ounce of Nitrogen, one ounce of Oxygen, one ounce of Hydrogen, one ounce of Helium, one ounce of Neon, one ounce of Argon, one ounce of Krypton, one ounce of Xenon, one ounce of Radon, one ounce of Francium, one ounce of Actinium, one ounce of Thorium, one ounce of Radium, one ounce of Polonium, one ounce of Astatine, one ounce of Tellurium, one ounce of Bismuth, one ounce of Antimony, one ounce of Arsenic, one ounce of Tellurium, one ounce of Selenium, one ounce of Sulfur, one ounce of Phosphorus, one ounce of Nitrogen, one ounce of Oxygen, one ounce of Hydrogen, one ounce of Helium, one ounce of Neon, one ounce of Argon, one ounce of Krypton, one ounce of Xenon, one ounce of Radon, one ounce of Francium, one ounce of Actinium, one ounce of Thorium, one ounce of Radium, one ounce of Polonium, one ounce of Astatine, one ounce of Tellurium, one ounce of Bismuth, one ounce of Antimony, one ounce of Arsenic, one ounce of Tellurium, one ounce of Selenium, one ounce of Sulfur, one ounce of Phosphorus, one ounce of Nitrogen, one ounce of Oxygen, one ounce of Hydrogen, one ounce of Helium, one ounce of Neon, one ounce of Argon, one ounce of Krypton, one ounce of Xenon, one ounce of Radon, one ounce of Francium, one ounce of Actinium, one ounce of Thorium, one ounce of Radium, one ounce of Polonium, one ounce of Astatine, one ounce of Tellurium, one ounce of Bismuth, one ounce of Antimony, one ounce of Arsenic, one ounce of Tellurium, one ounce of Selenium, one ounce of Sulfur, one ounce of Phosphorus, one ounce of Nitrogen, one ounce of Oxygen, one ounce of Hydrogen, one ounce of Helium, one ounce of Neon, one ounce of Argon, one ounce of Krypton, one ounce of Xenon, one ounce of Radon, one ounce of Francium, one ounce of Actinium, one ounce of Thorium, one ounce of Radium, one ounce of Polonium, one ounce of Astatine, one ounce of Tellurium, one ounce of Bismuth, one ounce of Antimony, one ounce of Arsenic, one ounce of Tellurium, one ounce of Selenium, one ounce of Sulfur, one ounce of Phosphorus, one ounce of Nitrogen, one ounce of Oxygen, one ounce of Hydrogen, one ounce of Helium, one ounce of Neon, one ounce of Argon, one ounce of Krypton, one ounce of Xenon, one ounce of Radon, one ounce of Francium, one ounce of Actinium, one ounce of Thorium, one ounce of Radium, one ounce of Polonium, one ounce of Astatine, one ounce of Tellurium, one ounce of Bismuth, one ounce of Antimony, one ounce of Arsenic, one ounce of Tellurium, one ounce of Selenium, one ounce of Sulfur, one ounce of Phosphorus, one ounce of Nitrogen, one ounce of Oxygen, one ounce of Hydrogen, one ounce of Helium, one ounce of Neon, one ounce of Argon, one ounce of Krypton, one ounce of Xenon, one ounce of Radon, one ounce of Francium, one ounce of Actinium, one ounce of Thorium, one ounce of Radium, one ounce of Polonium, one ounce of Astatine, one ounce of Tellurium, one ounce of Bismuth, one ounce of Antimony, one ounce of Arsenic, one ounce of Tellurium, one ounce of Selenium, one ounce of Sulfur, one ounce of Phosphorus, one ounce of Nitrogen, one ounce of Oxygen, one ounce of Hydrogen, one ounce of Helium, one ounce of Neon, one ounce of Argon, one ounce of Krypton, one ounce of Xenon, one ounce of Radon, one ounce of Francium, one ounce of Actinium, one ounce of Thorium, one ounce of Radium, one ounce of Polonium, one ounce of Astatine, one ounce of Tellurium, one ounce of Bismuth, one ounce of Antimony, one ounce of Arsenic, one ounce of Tellurium, one ounce of Selenium, one ounce of Sulfur, one ounce of Phosphorus, one ounce of Nitrogen, one ounce of Oxygen, one ounce of Hydrogen, one ounce of Helium, one ounce of Neon, one ounce of Argon, one ounce of Krypton, one ounce of Xenon, one ounce of Radon, one ounce of Francium, one ounce of Actinium, one ounce of Thorium, one ounce of Radium, one ounce of Polonium, one ounce of Astatine, one ounce of Tellurium, one ounce of Bismuth, one ounce of Antimony, one ounce of Arsenic, one ounce of Tellurium, one ounce of Selenium, one ounce of Sulfur, one ounce of Phosphorus, one ounce of Nitrogen, one ounce of Oxygen, one ounce of Hydrogen, one ounce of Helium, one ounce of Neon, one ounce of Argon, one ounce of Krypton, one ounce of Xenon, one ounce of Radon, one ounce of Francium, one ounce of Actinium, one ounce of Thorium, one ounce of Radium, one ounce of Polonium, one ounce of Astatine, one ounce of Tellurium, one ounce of Bismuth, one ounce of Antimony, one ounce of Arsenic, one ounce of Tellurium, one ounce of Selenium, one ounce of Sulfur, one ounce of Phosphorus, one ounce of Nitrogen, one ounce of Oxygen, one ounce of Hydrogen, one ounce of Helium, one ounce of Neon, one ounce of Argon, one ounce of Krypton, one ounce of Xenon, one ounce of Radon, one ounce of Francium, one ounce of Actinium, one ounce of Thorium, one ounce of Radium, one ounce of Polonium, one ounce of Astatine, one ounce of Tellurium, one ounce of Bismuth, one ounce of Antimony, one ounce of Arsenic, one ounce of Tellurium, one ounce of Selenium, one ounce of Sulfur, one ounce of Phosphorus, one ounce of Nitrogen, one ounce of Oxygen, one ounce of Hydrogen, one ounce of Helium, one ounce of Neon, one ounce of Argon, one ounce of Krypton, one ounce of Xenon, one ounce of Radon, one ounce of Francium, one ounce of Actinium, one ounce of Thorium, one ounce of Radium, one ounce of Polonium, one ounce of Astatine, one ounce of
