HOUSE AND HOUSEHOLD. A MYSTERY.

Over a quarter of a century since a box of lace in the custom house attracted much attention and inquiry. It contained, among other things, a lace dress of exquisite heauty, with flounce and shawl of corresponding pattern. The box was lett unredeemed in a pawnbroker's shop in Washington. Knowledge of its valuable contents coming to the Treasury Department, it was sent to the Custom-house in New York for safethe Custom-nonse in New York for safe-keeping until its owner should come forward to claim it. It was shrewdly suspected that these costly laces were brought into this country free of duty, the owner knowing he had cheated the revenue, was afraid to ap-

Pear.
A story was told that gives romantic interest to this mysterious treasure. It is remembered that when Louis Napoleon was at the height of his power, and his Empress dictated fashions to France and France to the whole world, Eugenie wished to encourage the industrial arts and a taste for the beautiful as

Among other things she, she offered a fabulous sum for the revival of a certain kind of lace which had long been among the lost arts. Thereupon certain artists the lost arts. Increupon certain artists in lace set to work to restore the lost sitch, and, having found it after long search and tedious experiments, they determined to plead for its revival in a dress of marvelous harness for their fair sovereign. Frenchmen are given to nomenclature, and they soon also decided that the name of Montijo should be perpetuated in this resurrected art. The work of years was devoted to making this royal robe. The lace-makers labored upon their cobweb, spending day and night in the damp cellars that are of necessity the lace-makers' workshop, dry air might have been more grateful to lungs and more wholesome to their hodies, but, alas! it would have rendered their gossamer threads too britle, and so they weve health and sunshine and life itself into the web before them-this levely Montijo dress. But while they worked and the years passed, changes came to France. The war came, and the Empire fell. Eugenie was uncrowned and exiled a widow. And finally, when the marvelous garment was completed, she who had conjured up the fairy thing had little money and less heart to purchase it. Thus far is history. What was done with this dress has been a

MATTER OF CONJECTURE

since. And now the story goes—and with an air of probability—that this historic robe, fashioned for the Empire. found its way from one republic to another, and was part of the contents of the green paper box in the Custom-house. Certainly the dress-skirt stored there was of rare imeness, and had stitches hitherto unknown to experts in lace except by tradition, and heirlooms that are cen-turies old. The foundation was roundmeshed, like Lyons silk tulle, yet finer and thinner than the airiest, filmiest tulle ever seen. In this tulle were wrought the loveliest figures of round point lacewrought there, be it remembered, not mere ly applied. The border was a vine showing every filament of each leaf entwined therein; next a band-like insertion of stars, open circles and crescents; next a matchless design covering the skirt up ward to the waist, with all drooping flowers—fuchsias, harebells, convolvall, leader for the stars of the skirt up ward to the waist, with all drooping flowers—fuchsias, harebells, convolvall, leader for the stars of the st cluster of invosotis, the graceful, slender foliage of terns, and more than all else, lilies—sweet lilies-of-the-valley and of the be used as a drapery upper skirt, falling open over satin or velvet. It was no lenger than the skirts of women of average height. The accompanying flounce was half a yard deep, and, like the shawl, repeats the floral device of the dress. A titled Spanish lady, familiar with European courts, examined this dress and pronounced it of great value, haughed at the suggested appraisal of \$10,000, and said it deserved to be used as altar-lace in some rich cathedral. Another gem in this box was a shawt of white Oriental gauze covered with silk embroidery, done in such dainty stitches that upon a casual glance it was mistaken for painting, such as is seen on priestly robes. The colors were as delicate as those that decorated Sevres China. The centre was covered with this floral profusion, wisterias, pale roses of Provence, heliotrope, acacia and ferns; its border was a positive marvel. And with all this work the shawl was so fine, that it could easily be drawn through a wedding ring. The other contents of the box were a shawl and flounce of point-aplique, a round point handkerchief, a lace for garaiture, with many small collars. But to whom did it all belong? What finally became of the box and its contents was never known.

THE KITCHEN.

Now is a good time to make the orange marmalade which is such an appetizing breakfast dish. The common, dark thin skinned oranges make the best, such as can be gotten "20 for 25 cents," and they should also be a little fart. Get the oranges, peel them so as to leave the peels in very large pieces. Then put the peeled fruit into cold water to prevent its turning a dark color. Now take the peels and put them into a strong solution of cold salt and water and leave them in it for about 12 hours. Then drain off this water and wash the peels well in clear cold water so that no taste of the salt remain. Now put the peels to boi and they should remain boiling until soft. Then take the peels out and save the liquor they have been boiled in. Then take each piece of peel and a sharp knife and cut the inside white off from the peeling until down to the yellow part. Now cut the peel up in tiny pieces with a knife or seissors. When all cut put the peeling back into the syrup that it was boiled in. Then take the fruit part of the oranges and cut each orange in half and scrape out the inside and avoid putting in the pips, as they make it bitter. Put all together now and boil until very tender, and put a pound of sugar to every pint of juice, and when timished put in jars, glass cans or pots.

Bright eyes and dull; near sighted; far sighted; anybody (except those who won't, and they are worse than blind) can see at a glance the advantages gained by using PEARLINE. We do not expect everyone will see it, but millions do, and the number increases every day.

Delicate women and strong, wonder at the amount of work they can do with the aid of PEARLINE—the time saved; the satisfactory results, and when they have used it for years they realize that everything that is washed or cleaned with PEARLINE lasts longer. This is very simple—PEARLINE does away with most of the rubbing—the greatest wear and tear that clothes are subjected to is the repeated rubbings necessary to keep them clean with ordinary soap. Your own interests should lead you to use it, if you do your own work and value your fine linens and flannels; the latter reason should surely convince any bright woman that it is to her interest to see that her servants use it. PEARL-INE makes a saving all around.

Marmalade made this way is not bitter. YOUTHS DEPARTMENT The imported marmalades are generally made of those oranges which are of a bitter nature, and that is doubtless the reason that Americans do not always like marmalade.

BOUF A LA MODE.

Take a round of beef or the rump; trim off all the fat; rub all sorts of sweet herbs together very line, and mix them with plenty of spice, pepper, salt, allspice, cloves, mace, nutmeg, all in fine powder; put them upon a plate; cut fat bacon or larding pork into long slips and roll them well in the herbs and spices; now lard the beef with these slips on both sides, and in order that it be thoroughly flavored, rub the beef all over with the herbs and spices, flour the meat and place it in a deep pan; add a pint of water; bake in a moderate oven; strain the gravy and pour it over the beef, or the gravy may be boiled down to a glaze if prefer red. Serve hot or cold.

POTATO FIOTTERS.

This is a Scotch dish, and is a very tempting and savory form of dressing potatoes. Parboil half a dozen-or more if required—large, long-shaped potatoes. Pare and cut these in slices about as thick as a silverdollar. Beat up a couple of eggs with a tablespoonful of finely-grated bread crumbs and an equal quantity of cold boiled lean ham grated small. Dip each slice of potato in this some unknown stitches, representing mixture and ary in plenty of boiling land

THE WARMEST REGION ON EARTH.

There are many very warm spots in the Torrid Zone, but, Bohra, by the Gulf of Persia, seems to be, as far as the temperature goes, absolutely without a rival. For forty consecutive days in July and August last year, which was by no means an exceptional season, the thermometer was known not to fall lower than 101 degrees, Fahrenheit, night or day, and often ran up as high as 128 de-grees in the afternoon. Nature, as if to make the spot as intelerable to human beings as possible, has banished all water from the rocks of the locality, at least none has ever been produced by digging to depths of nearly 500 feet, and the numerous pits or dry wells in the neighborhood show how thoroughly the upper stratum has been tapped. In spite of these apparently unsuperable obstacles, however, mankind has contrived to flourish and multiply in the region to an amazing extent, and the necessary fresh drinking water which the land has refused to yield is obtained from the bottom of the Gulf of Persia, where, at a distance of more than a mile from the shore, innumerable copious springs burst forth.

In tempus old a hero lived, Qui loved puellas deux; He no pouvait pas quite to say, Which one amabat mieux.

Dit-il lui-seeme un beau matin, Non possum both avoir, Sed si address Amanda Ann, Then Kate and I have war.

Amanda habet argent coln, Sed Kate has aureas curls; Et both sunt very agathæ Et quite formosægiris.

Enfin the youthful anthropos, Philonn the doo malds, Resolved preponere ad Kate, Devant cet evening's shades. Procedens then to Kate's domo. Il trouve Amanda there, Kai quite forgot his late resolves, Both sunt so goodly fair.

Sed smiling on the new tapls. Between puellas twain, Cœpit to tell his love a Kate Dans un poetique strain.

Mals, glancing ever et anon At fair Amando's eyes, Ilie non possunt dicere Pro which be meant his sighs.

Each virgo heard the demi-vow, With cheeks as rouge as wine, And off'ring each a milk-white hand, Both whispered, "Ich bin dein."

THE BEARS OF ALASKA.

Both the courage and brute strength of the Alaska Indian are phenomenal, as was recently displayed in one of the many instances that have come under notice, in which a powerful native of Alaska came out victorious in a hand-tohand struggle with a large and ferocious black hear. The Indian (Jim), with one companion, an Indian boy, about sixteen years of age, was out bear-hunting on Admiralty Island, south-east of Tuneau, when the dogs ran a large black bear out of the woods, when Jim, taking hasty aim, fired, slightly wounding the bear in the neck. The sting of the wound enraged the brute, and turning upon his assailants he reached Jim with a few bounds, and together the Indian and the bear went rolling over the ground in a life and death struggle. In the mean-time the boy had taken to his heels out of harm's way, and, supposing that his luckless companion was clawed into strings, hastened to camp with the news. immediately upon perceiving the bear coming, Jim whipped out his ponderous coming, Jim whipped out his ponderous hunting knife, and the first affectionate hug from the bear was reciprocated on the part of Jim by thrusting this murderous weapon to the hiltin the brute's side. In the struggle Jim managed to keep a firm hold of the handle of the knife, never withdrawing it, but using all his strength to push the blade in deeper, and finally it reached a vital

rolled over in the throes of death. Jim, mangled and torn, and bleeding from a dozen ugly wounds, lay exhausted upon the ground for some time; but finally he struggled to his feet, skinned his prize, and, throwing the skin over his shoulder, started for camp, meeting his com-panions on the way, who were coming to gather up his remains for cremation. Jim found that he had come out of the fight with two broken ribs, a deep gash in the thigh, and a horrible and dangerous wound from the brute's teeth, starting in on the left side of the nose, leaving the lower eyelid hung by a small particle of skin running back under the left temple, where a deep hole was made, and ending down under the jaw, where THE LOWER JAW BONE WAS BROKEN.

To the bear hunter the wilds of Alaska

part, when the bear relaxed its grip and

offer a paradise that can be found in no other country on the globe, as is attested by the yearly shipments of choice hides which reach an enormous amount. The most choice of these are the black bear, which roam the woods by hundreds, and prime skins of which bring from \$25 up io as high as \$100 each in the market. During the excursion season tourists from all parts of the globe make a thriving trade for Alaska merchants in the bear-skin line. There are five distinct species of bear in Alaska—the black, brown or cinnamon, and cross, which inhabit all portions of South-castern Alaska and the upper portion of the Yuken country. Further north, in the St. Elias Alps, is the home of the St. Elias grizzly, which, in size, ferocity, and color, much resembles the grizzlies of the Sierra Nevadas, and still further north, along the lower reaches of the Yukon and the ice fields of the Arctic ocean, is the white polar bear. As brave and skillful in husting bear as the Alaska Indianos, heseldem hunts the St. Elias grizzly, both for the reason that there is but little profit in the hides, and the ferocity of the beast makes hunting them a most hazardous undertaking. Their mode, however, of killing them is by sheeting into them from a heavily charged smooth-bore musket a heavy slug of either lead, copper or iron, then awaiting their charge, which never tails to follow the shot, with a long, beavy and strongly-made spear, resting the butt of the weapon on the ground and planting that, in these respects, the world has had one foot firmly against it. The point of to boast of." the spear rests on an angle to pierce the bear in the breast, and the bear's own weight, when it strikes the spear in its mad charge is calculated to drive the weepon through him or pierces him deep enough to cause death. As will be readily seen, if at this critical moment the hunter's courage should fail hum, or by a miscalculation the spear failed to impale the charging beast, the hunter would be knocked senseless and immediately tora to shreds. This made of bear hunting may have its advantages, but there is none but the Alaska Indian who has the norve and courage to try the experiment.

— Rocky Mountain News.

AS LIFE WORTH LIVING?

The great frequency with which pale, sallow and enfeebled girls are met now-adays, is cause for genuine alarm. The young girls of the present generation are not the healthy, robust, rosy lassies their mothers and grandmothers were before them. Their complexion is pale and sallow or waxy in appearance, and they are the victims of heart palpitation, ringing noises in the head, cold hands and feet, often lainting spells, racking headaches, backaches, shortness of breath, and other distressing symptoms. All these betoken chlorisis or anæmia.-or in other words watery or impoverished condition of the blood, which is thus unable to perterm its normal functions, and unless specific enriched with those gatural remedies which give richness and redness to the blood corpuscies, organic disease and an early grave is the inevitable result. Is not this prospect sufficient to cause the gravest alarm? Mothers are your daughters suffering from any of the symptome indicated above, or from any of the irregularities incident to a critical of the irregularities incident to a critical collection. The process of the part of the collection of the irregularities incident to a critical collection of the irregularities. If they are as your content of the collection of t speedily enriched with those autural value their lives, do not delay in procur ing a remedy that will save them. Delays in such cases are not only dangerous but positively criminal. Dr. Williams Pink Pills for Pale People is a remedy compounded especially to meet such cases. These pills are not a patent medicine, but a remedy prepared with the greatest care from the formula of an experienced physician, who has used it for years in his daily practice with unvarying success. These pills are especially rich in those constituents which stimulate the blood and give it that rich, red color necessary to preserve health and life. They are in all cases a never-failing blood-builder and nerve tonic, acting upon the system in a natural manner and restoring health and strength to all who suffer from a watery or depraved condition of the blood or from any of those weaknesses peculiar to females. Dr. Williams' Pink Pills are sold by all dealers, or will be sent post paid on receipt of price (50 cents a box) by addressing the Dr. Williams' Medicine Co., Brockville, Ont.

An Ancient Prayer to Our Lady. The prayer which follows is probably as old as the time of Chaucer, and was much used by children when England was Catholic:

Hail be thou Mary, that high sittest in throne!
I beseech thee, sweet Lady, grant me my boon—
Jesus to love and dread, and my life to amend soon: And bring me to the bliss that never shall be done,"

Unlike any Other. Originated by an Old Family Physician.

The Stage Irishman,

An article under the above heading appears in Donahoe's Magazine for Febmary. It is from the pen of that versa tile writer and thorough Irishman, Mr. John C. Fleming, and calls the attention of the Irish people in America to the vulgar and insulting manner in which the Irish character is contorted on the

It is a regretable fact that, of all the creations of our mineteenth century playwrights and actors, the conception and representation of the Celtic character, s the most degraded and untrue.

We admire originality, but when originality takes the shape of vulgarity and sails under false colors we have double reason to be disgusted with it.

It devolves upon the Irish people in Canada and the United States to remedy this wrong by indiscriminately boycotting all dramas and variety entertainments in which the obnoxious stage Irishman, with his low language and monkey-like antics, is advertised to appear, and it is the duty of all Irish-American actors who have in the past sinned against their nationality and their own natures by their misrepresentation of the Irish character, to undo the harm they have done by endeavoring in the future to personate an Irish character in a conscientious and faithful manner, if they are capable of doing so; if not, let them, at least, refrain from making their profession the medium through which to lower their nationality in the eyes of others.

Gladstone's Tribute to the Church. Mr. Gladstone is a Protestant Churchman of the most rigid kind, yet his intellectral investigations compel him to pay this tribute to our Holy Church: "Since the first three hundred years of persecution, the Roman Catholic Church has marched for fitteen hundred years at the head of human civilization, and has driven, harnessed to its chariot as the herses of a triumphal car, the chief intel lectual and material forces of the world; its learning has been the learning of the world; its art, the art of the world; its genius the genius of the world; its greatnes, glory, grandeur and majesty have been almost, though not absolutely, ad

Religion and Education.

On the public school question Rev. B. Cressey, a most dis inguished Baptist minister, preacting recently at Spring-field, Ohio, said: "Cathoneism is right when she says that the education of the mind and heart cannot be separated We all agree that to educate the mind and not the heart is to make the rascal I recognize a justness as well as correctness in Cathoncism's fundamental thought that religion is an integral part of edication.'

Holloway's Pills.-Encebled Existence -This medicine embraces every attribute required in a general comestic stemedy. It overturns the foundations of disease laid by detective food and impure air. In obstructions or congestions of the liver, lungs, bowels, or any other organs these Pills are especially serviceable and eminently successful. They should be kept in readiness in every family, being a medicine of incomparable utility for young persons, especially those of feeble constitutions. They never cause pain or irritate the most sensitive nerves or most tender bowels. Holloway's Pilis are the best-known puriners of the blood, the most active promoters of absorption, and secretion, whereby all poisonous and obnoxious particles are removed from both solids and fluids.
