

LISTERINE

A SAFE
NON-POISONOUS, UNIRRITATING
ANTISEPTIC SOLUTION

LISTERINE

embodies a two-fold antiseptic effect, in that after the evaporation of its volatile constituents—thyme, eucalyptus, mentha, gaultheria and ethyl alcohol—a film of boracic and benzoic acids remains upon the surface to which Listerine has been applied, affording more prolonged antiseptic protection.

LISTERINE

is a trustworthy surgical dressing; it has no injurious effect upon the tissues in which the healing process is going on.

LISTERINE

in proper dilution is useful in the treatment of abnormal conditions of the mucosa and forms a suitable wash, gargle or douche in catarrhal conditions of the nose and throat.

LISTERINE

in teaspoonful doses will often afford relief in fermentative dyspepsia and is largely prescribed, with excellent results, in the various forms of diarrhoea occurring in infants and adults.

LISTERINE

literature, including special pamphlets upon **Disorders of Digestion** and **Respiratory Diseases**, may be had, by physicians, upon application to
