

CFSI INTERACTIVE CALENDAR

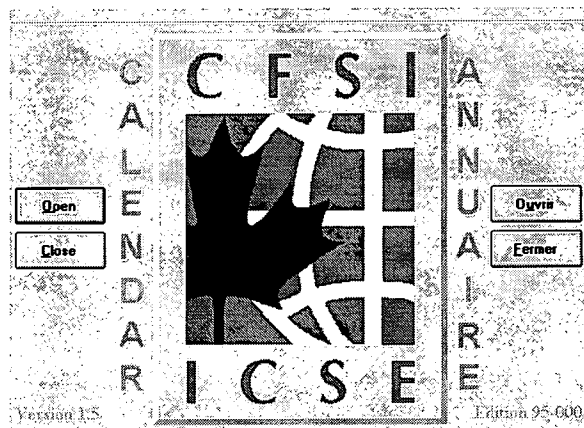

The Canadian Foreign Service Institute introduces a SIGNET application called the **Interactive Calendar**. This calendar will provide, in June 1995, SIGNET users with access to the department's learning policies and up-to-date Institute and Training Centre course information. The Interactive Calendar will allow the reader to view course lists, descriptions and schedules. The Calendar will also permit the readers to offer on-line feedback to CFSI. The Calendar is designed to be self-explanatory and using it should not require any training.

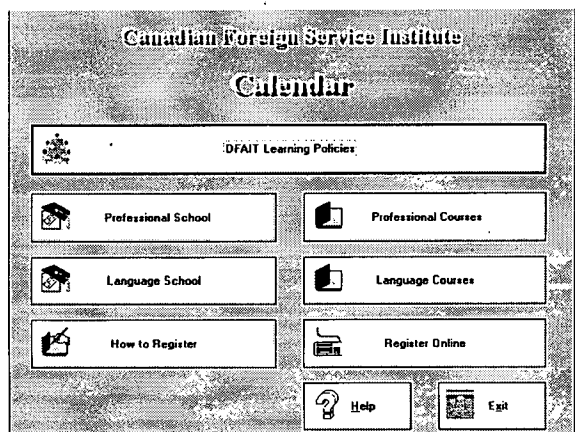

THE ICON

The CFSI Calendar icon, found in the CORPAPPS window, will present the opening screen (right):

THE OPENING SCREEN

This page permits the selection of English or French for subsequent displays with a single click on OPEN or OUVRIR.

MAIN MENU

The main menu contains a button for each module within the Calendar. The DFAIT Learning Policy is presented as a draft only for the moment. Two modules describe the schools and two others describe the courses offered by the schools. The on line registration button calls another application that will be available only later this summer. The How to Register button serves to describe the registration process.

TABLE OF CONTENTS

The table of contents (called with a single click on a main menu button) is in two levels. The first level includes the major headings, such as the names of the training programs.

Professional Courses
