

- (d) Regulation (*Ontario Environmental Protection Act* Regulation 323/94) requiring environmental training for dry cleaners.
- (e) Implementation of the CCME guideline for new and modified combustion turbines.
- (f) Implementation of the CCME guideline for new commercial/industrial boilers and heaters.
- (g) Regulation (*Ontario Environmental Protection Act* Regulation 227/00) to be applied to the electricity sector requiring annual monitoring and reporting of 28 pollutants of concern with a commitment to extend the monitoring and reporting requirement to other industry sectors.

B. For the United States:

1. Specific NO_x Reduction Commitments

- (a) The United States shall require States that are located in the PEMA and that are subject to EPA's NO_x regulation (referred to as the "NO_x SIP Call") to implement that regulation in accordance with 40 Code of Federal Regulations (CFR) sections 51.121 and 51.122 including any modifications as a result of any court decision. The NO_x SIP Call requires States to ensure that seasonal NO_x emissions do not exceed specified levels ("budgets").
- (b) The United States shall implement a motor vehicle control program in the PEMA that meets the requirements of 40 CFR Part 80, Subpart D (reformulated gasoline), 40 CFR Part 86 (control of emissions from new and in-use highway vehicles and engines); and 40 CFR Part 80, section 80.29 (controls and prohibitions on diesel fuel quality).
- (c) The United States shall implement standards for non-road engines in the PEMA as provided for in 40 CFR Part 87 (aircraft), Part 89 (compression-ignition engines), Part 90 (spark-ignition engines), Part 92 (locomotives), and Part 94 (marine engines).
