

A Prosperity farmer says: "It is an all important matter. Sheep are harmless, perfect to handle, are managed in droves that need no tying or leading, come to call, need very little water, thrive with a cheap straw-and-pole shelter, require only weeds and scrub in summer and straw and screenings in winter, digest all seeds swallowed, afford palatable nutritious meat in a handy sized carcass, convert waste into wealth, and are altogether the most profitable of stock."

A Wynyard farmer says: "Sheep raising should be practised more as there is more money in it than anything else."

A Logberg farmers says: "The time is coming when sheep will be kept on every well tilled farm. They eradicate weeds, cultivate the soil and under ordinary conditions return 100 per cent. profit."

A Nesscliffe farmer says: "The advantages in keeping sheep are that wool and mutton are a good side line and sheep are weed destroyers costing little to keep compared with profits made."

A Hobart farmer says: "Sheep husbandry will increase as the province grows older. There is profit in sheep to the extent that they keep down weeds and produce mutton and wool on feed that other stock will not eat. They also require very little care except at lambing time."
