LOCAL NEWS NEW YORK DRESSMAKERS, reasonable prices. Telephone Main 1824-81. House 151 Hill St. 24-25. Case of hats, 25 and 25 cents each. Mrs. Brown, 235 Union street. Curtains done up for full housekeeping with homelike care at Ungar's, 7th St. To cure a headache in ten minutes use Kumfort Headache Powder, 10 cents. For the benefit of every customer we have had a special mantle manufactured especially for use in this city. City Light Co., Opp. Thorne's. If you want the use of a horse for the keep, the "want" ads. offer the means of securing what you need. A glass of iced "Selsa" Tea will be found most refreshing this warm weather. As cooling as a summer breeze. The regular meeting of the A. O. H. will be postponed until tomorrow night on account of the excursion this evening. E. O. Parsons, the West End dry goods and shoe merchant, has suspended payment. A meeting of his creditors was held this week to arrange for a settlement. Mr. Parsons carries a large stock of goods and his creditors look for favorable terms. Last night on the final trip across the harbor to the West Side the ferryboat Ludlow asserted her independence in a most striking manner by coming rather forcibly into contact with the piling. The thick fog made it rather difficult to judge distances, and the entrance to the frigate loomed up while the Ludlow had considerable headway, which resulted in a collision with the upright timbers, breaking several.

WOMAN IN THE WORLD'S PROVERBS Shakespeare somewhere says "Woman at best and worst as heaven and hell." A writer in the Paris Gaulois, who has been making a selection of proverbs from the literatures of various countries to illustrate the qualities of women, says to have found only those which treat of the darker or more superficial side of her nature, of the worst rather than of the best. On the whole the selections are far from complimentary. Take, for instance, the Spanish maxim: "One of the least offensive is 'Women and mules obey better when caressed and coerced.'" Another is, "The man who wins much who loses his wife." Here are a few more: "Man is to wife woman is fire, and the devil blows the bellows." "The tears of women are much more than they cost little." "The fox is cunning but the woman who loves knows more than he." "The proverbs of the Arabs place a very low value on women. Here are some samples: "The beauty of man is in his spirit; and spirit of woman is in her beauty." "Always consult your wife, but do as you please." "When you want to get square with a man, give him a handsome wife; when you want revenge on a woman, give her a handsome husband." "The Hindus are not much more respectful than the Arabs. They say: "The coquette is like your shadow; chase her and she flies from you, flee from her, and she chases you." "Do you want to test the fineness of gold? Use acid. The strength of an ox? Beat it. The nature of a man? Let him talk. The thoughts of a woman? There's no way." Next comes the cynical Chinaman with a cutting maxim: "The tongue of a woman is a dagger and she never lets it rest." "The spirit of a woman is of quicksilver and her heart of wax." "The Persian says: "When you go to war, say a prayer when you go to sea, say two prayers; when you get married, pray all the time." To a question, "What is a woman?" the Turk answers, "A prisoner;" the Albanian, "a slave;" the Servian, "a servant;" the Bulgarian, "a companion;" the Greek, "a queen."

ONE OF THE BEST GAMES OF SERIES

Fans Witness a Fast Game on the Every Day Club Grounds

MARATHONS, 3; CLIPPERS, 0.

On the Victoria grounds last evening the Marathons once more defeated the Clippers, and this time the score was three to one. In an hour and ten minutes teams played eight innings of good fast ball and the game was well worth seeing. Only in one inning did either side get their runs. It was in the third that the Marathons got their three runs, and it was not until the seventh that the Clippers made their only run. Harley Howe was in the box for the Clippers and he pitched an excellent game, having nine strike outs to his credit, and but three hits made off him. One of the hits was in the first by Bradbury. The second single was by Copelan in the third inning. He paced two men with bases on balls and but one man with a pitched ball. Nesbitt was equally even and his work was remarkable. For four innings he pitched a no hit, no run game, then in the fifth one a hit to Copelan at short. There was no hit or run in the sixth, but in the seventh Lynch got a single and Crosby a double and with one run the Clippers finished their hits. Nesbitt was pitched a double and with one run the Clippers finished their hits. Nesbitt was pitched a double and with one run the Clippers finished their hits.

BOSTON NATIONALS CERTAINLY STARS

Lose a Double-Header to Brooklyn--Makes Four Out of Five

OTHER GAMES

BROOKLYN, N. Y., July 7--(National)--Brooklyn made it four out of five from Boston by winning today's double-header. Rucker went to sea-son's rescue in the first and then pitched the entire second, holding the visitors safe. The all-around playing of Rucker was the big feature. He saved the second game by a sensational catch off Beaumont with the bases full, and ran bases daringly. Home run drives by Lemoore and Hummel to the club house in deep left made the first game interesting. Scores: R. H. B. Boston... 1000101014 8 0 Brooklyn... 01000102 7 0 Batteries--McCarthy, Tuckey and Graham; Scanlon, Lister and Bergen. Time, 1:12. Umpire, Rigler. Second game--Score: R. H. B. Boston... 00000000 1 8 3 Brooklyn... 02000302 5 9 1 Batteries--Lindaman and Graham; Rucker and Marshall. Time, 1:40. Umpire, Rigler. LOSSES SIX STRAIGHT. NEW YORK, July 7--(American)--New York lost its sixth straight game today, Boston winning, 5 to 6, in a hot contest. Manning, who started to pitch for the locals, forced in three runs by his wildness. Chesbro, who succeeded him, was hit hard in the seventh. The score: R. H. E. Boston... 23000040 6-5 14 1 New York... 01000020 5-6 7 1 Batteries--Schiller, Chech and Donohue; Manning, Chesbro, Quinn and Sweeney and Kistner. Time, 1:40. Umpire, Evans and Perrine. CLEVELAND, July 7--(American)--Score: R. H. E. Cleveland... 51000000 4-11 3 Detroit... 10000110 0-8 7 1 Batteries--Joss, Liebhardt and East-wood; Miller and Schmidt. Time, 1:39. Umpire, Evans and Perrine. PITTSBURGH, July 7--(National)--Score: R. H. E. Pittsburgh... 11001011 12-4 11 0 Philadelphia... 00000200 2-5 2 Batteries--Liedfeld, Camnitz and Gibson; Hagerman and Mosher. Time, 1:40. Umpire, Johnston and Emale. PHILADELPHIA, July 7--(National)--Score: R. H. E. Philadelphia... 00010000 0-5 0 Philadelphia... 00000300 0-3 1 Batteries--Coveleski, Corridon and Martell; Raymond and Schell. Time, 2:05. Umpire, Klon and Kane. NEW TRIAL GRANTED ON MERE FLY SPECK, PROSECUTOR ASSERTS

MARTIN SHELDON LOSES 21 POUNDS

During the Time He Won the All Round National Championship

OTHER GAMES

NEW YORK, July 7--Martin Sheridan lost twenty-one pounds weight during the two hours and a half in which he won the all-around national championship at the Scottish Club games, Cetic Park, Monday, according to a story published here today. The Irish-American Athletic Club's champion weighed 205 pounds at the start of the 100 yards dash, the first event in the qualifying contest. He weighed 184 pounds immediately after he revived, after struggling over the line in the mile run, the tenth and last event in the fearful ordeal. He exhausted his strength and endurance. But he finished the mile run, in which alone he competitor Theodore Matzick, the giant Greek beat him. It is almost incredible that Sheridan burned up and sweat out 21 pounds of his fatty tissues in 100 minutes while rolling up 7,385 points and beating his own record for the all-around championship by 25 points, but it is remarkable that in an hour Sheridan regained ten pounds of the 21 he lost. Although he is a tremendous eater he had only a small meal, for he did not feel well and had drunk only two glasses of beer. At 10 o'clock he might be weighed 203 pounds after a good dinner. M. P. A. A. HALIFAX, N. S., June 26--With jurisdiction in the province of Nova Scotia, New Brunswick and Prince Edward Island governing amateur athletics under the definition adopted by the Amateur Athletic Association of Canada, and amateur squashes under the definition adopted by the Canadian Association of Amateur Squashers, President, J. C. Littlejohn, W. A. L. C., Halifax, N. S. Hon. Secy, F. W. Meyer, St. Mary's A. A. and A. Club, Halifax, N. S. Official Bulletin No. 477. Sanction--Sanction of this association has been granted as follows: LaTour Rowing Association, St. John, N. B.--For the following amateur events to be held on Lily Lake, St. John, N. B., July 1, 1909: Single scull shell race. Single scull boat race. Double pleasure boat race. Every Day Club, St. John, N. B.--For following amateur events to be held at St. John, N. B., July 1, 1909: 15 mile race. Town of Campbellton--For the following amateur events, to be held on July 1, 1909: 100 yards dash. 5 mile run, high and broad jumps. Pole vault, hop, step and jump. Shot put, hammer and discus. Farmers' Association, Antigonish, N. S.--For the following amateur events, to be held at Antigonish, N. S., July 1, 1909: 1 and 10 mile race. Sussex A. A. C., Sussex, N. B.--For the following amateur events to be held at Sussex, N. B., on July 7th, 1909: 5 mile race. F. W. MEYER, Hon. Secretary M. P. A. A. GEORGE MEREDITH'S WILL

AT THE SOUTH POLE.

Many interesting sidelights on the experiences of the Shackleton South Polar expedition continue to be given by the members of the company. For instance, Professor David, of Sydney University, on his return, related in the Melbourne Argus how the company kept entirely free from cold until two bales of clothing from London were unpacked. As soon as these were opened all took very severe colds. It must, he thinks, have been germs in the bales, as the atmosphere on the tundra is free from noxious germs. Professor David also states that during the winter they kept to the true day and night, although it was always dark except that at noon a faint twilight in the sky was visible. Of the magnetic pole Professor David says he gains to correct some mistaken popular impression. He said "The south magnetic pole is NOT AN ABSOLUTELY FIXED SPOT, but may be defined as a circular area about thirty miles in diameter, within which the absolute magnetic pole, is differently situated from time to time during different days and at different hours of the day. The pole moves round with a sort of waltzing movement. We made our determination with regard to the south magnetic pole by means of the Lloyd-Creak Dip-circle, a very fine instrument. It contains a number of magnetic needles arranged so that they can be tilted into a vertical position by a vertical force acting upon them. The nearer we got to the pole the more vertical the needles got. We made our determination partly by that and partly by the ordinary compass. The needles of the ordinary compass refuse to work. WHEN YOU ARE NEAR THE POLE." Mr. Bettram Armitage, of Victoria, another member of the expedition, states that the most remarkable effect of the cold which he noticed was the loss of the sense of touch in the fingers. It was almost complete. Suppose you wanted to look for a knife in your kit-bag, you would put your

FAIRVILLE PLAYERS BADLY WALLOPED

It was an amusing game, but that was all. The St. Josephs pulled out a victory over the Ancient Order of Hibernians team. The score at the conclusion of the performance stood 10 to 0. The Fairville team were equally humiliated by the absence of several of their regulars. The "subs" were, however, brought into the line and they finished their hits. Nesbitt was pitched a double and with one run the Clippers finished their hits. Nesbitt was pitched a double and with one run the Clippers finished their hits.

LIBERALS WIN A BIG VICTORY

CHARLOTTETOWN, P. E. I., July 7--The Liberals tonight are jubilant over the result of the bye-election in the first district of Queens, where Cyrus Crosby defeated John Myers, Conservative, by 69. The seat was vacated by the death of Hon. Matthew Smith, speaker, whose majority at the general election in 1908 was 81. The Conservatives made a determined effort to capture the constituency. Had they succeeded the standing parties would have been 16 to 14, and as another bye-election has to be held in the fourth district Trinity, where Hon. Joseph Reid returned at the general election by casting vote of sheriff resigned to run election over again. The Conservatives hoped to win that also and make parties 15 to 15. The total vote today was heavier than generally, every man being got out and both parties putting up a tremendous fight in this crucial contest which was virtually the general election in one district. The parties are now 16 to 13. TORONTO, July 7--The following young ladies graduated at MacDonald Institute, Guelph, today, in connection with Ontario Agricultural College: Teacher of domestic science, Katherine James, Charlottetown; Housekeeper, Mary B. Daniel, Pugwash; Home-makers, Gladys Foster, St. Andrews, N. B. and Frances MacKeay, Keewauke, Cracked.

ANCIENT BELLS OF BRITAIN. Often Quadrangular and Made of Thin Plates. There are several old bells in Scotland, Ireland and Wales. The oldest are the quadrangular, being made of thin iron plates which have been hammered and riveted together, says The London Globe. At the monastery of St. Gall, in Switzerland, the four-sided bell of the Irish missionary, St. Columba, who lived in the seventh century, is still preserved, but more ancient still is the bell of St. Patrick in Belfast, which is ornamented with gold and silver filigree work. The curfew bell is that about which most has been written and said. It has been thought that it was only used in England, but it was quite common on the continent in the middle ages. The ringing of bells by rope is still very popular in England, especially in the country, where almost every hamlet, however small, has its church with its peal of bells. The first real peal of bells in England was sent by Pope Calixtus III to King's College, Cambridge, and was for 200 years the largest peal in England. About the beginning of the year 1500 sets of eight bells were hung in a few of the large churches. In the middle of the 17th century a man named White wrote a famous work on bells, in which he introduced the system of numbering them 1, 2, 3, 4, etc. on slips of paper in different orders, according to the changes intended to be rung. It is calculated that to ring all the changes upon 24 bells at two strokes a second would take 117,000,000,000 years. One of the most famous bells in the world is the great bell of Moscow which now stands in the middle of a square in that city, and is used as a chapel. This bell was cast in 1525, but was in the earth for over 100 years, being raised in 1836 by the Emperor Nicholas. It is nearly 29 feet high, has a circumference of 60 feet, is two feet thick, and weighs almost 200 tons. The second Moscow bell, which is the largest bell in the world that is actually in use, weighs 125 tons. There are several bells extant which weigh ten tons and over, of which Big Ben, the largest bell in England, weighing between 45 and 14 tons, is one. Big Ben is, unfortunately, cracked.

He said "The south magnetic pole is NOT AN ABSOLUTELY FIXED SPOT, but may be defined as a circular area about thirty miles in diameter, within which the absolute magnetic pole, is differently situated from time to time during different days and at different hours of the day. The pole moves round with a sort of waltzing movement. We made our determination with regard to the south magnetic pole by means of the Lloyd-Creak Dip-circle, a very fine instrument. It contains a number of magnetic needles arranged so that they can be tilted into a vertical position by a vertical force acting upon them. The nearer we got to the pole the more vertical the needles got. We made our determination partly by that and partly by the ordinary compass. The needles of the ordinary compass refuse to work. WHEN YOU ARE NEAR THE POLE." Mr. Bettram Armitage, of Victoria, another member of the expedition, states that the most remarkable effect of the cold which he noticed was the loss of the sense of touch in the fingers. It was almost complete. Suppose you wanted to look for a knife in your kit-bag, you would put your

AT THE SOUTH POLE. Many interesting sidelights on the experiences of the Shackleton South Polar expedition continue to be given by the members of the company. For instance, Professor David, of Sydney University, on his return, related in the Melbourne Argus how the company kept entirely free from cold until two bales of clothing from London were unpacked. As soon as these were opened all took very severe colds. It must, he thinks, have been germs in the bales, as the atmosphere on the tundra is free from noxious germs. Professor David also states that during the winter they kept to the true day and night, although it was always dark except that at noon a faint twilight in the sky was visible. Of the magnetic pole Professor David says he gains to correct some mistaken popular impression.
