JNO. DEACON, Co. J. W. S. SENKLER, Co. J.

SEPTEMBER.—There has been so much said and written about clover as a fertilizer that it may not be out of place to record a statement we find taken from the New England Homeste id, a reliable and useful paper. About twenty years ago a man obtained by lease a tract of land for a term of years, most of which was exhausted and worn-out rye land. One field of ten acres was sown with rye when he took it. The lessee gave it a coat of ashes, and a good sprinkling of clover seed. The rye yielded six but hels per acre; it was so thin that the clover had sufficient room to grow. The next season the clover covered the ground completely, and was allowed to remain on the ground the whole season. In the spring of the second year the whole was plowed in, and the field planted with corn, which yielded forty-seven bushels to the acre. It has remained a fertile field to the present time, and is very valuable land. Clover is therefore a fertilizer.

Conveyancers will find everything in the way, Special Papers, Blank Deeds, Mortgage Forms, &c., at HART'S. The begin 4th, en
