<u>Applicant</u>	<u>Station Location</u>	<u>Request</u>
Radio Rouyn- Abitibi, Ltee.	Rouyn, Que.	1000 watts on 900 kc with directional antenna.

Reason: It is the opinion of the Board that under Regulation 31-A of the Regulations of the Radio Act 1938 permission should be granted for multiple ownership in this particular case as:

1. The applicants wish to supply English program service to this bilingual area.
2. Multiple station ownership is the most economical way to provide such service.
3. English programs are desirable in this area.

Acadia Broadcast- ing Co. (per L.L. Rogers, J.F. Hirtle and D.P. Hill)	Bridgewater, N. S.	1000 watts on 1000 kc with directional antenna.
---	--------------------	--

Reason: There is no primary service in the area at present. The applicants have stated that they will control the company, jointly.

B. APPLICATIONS RECOMMENDED FOR REJECTION:

IT WAS RESOLVED

THAT the Minister of Reconstruction be advised that the Board of Governors of the Canadian Broadcasting Corporation recommends that the following applications be denied for the reasons indicated:

a) For Changes to Existing Stations:

<u>Station</u>	<u>Location</u>	<u>Request</u>
CFPR	Prince Rupert, B.C.	Frequency change <u>from</u> 1240 kc <u>to</u> 1220 kc.

Reason: The limitation to CFPR from CJOC, Lethbridge, Alta., would be greater than the present limitation on 1240 kc.

.... (C.R.McIntosh)	North Battleford, Sask.	Issue of licence in name of "Northwestern Broadcasting Co. Ltd."
------------------------	----------------------------	--

Reason: The applicant for the licence will not have control of the Company nor will there be any centralized control of the Company under the proposed distribution of stock. The applicant is not subscribing money to the Company for the stock he is to receive. The majority of shares in the Company and the majority of the directors are residents of Saskatoon, and in the opinion of the Board it is desirable that local community stations should be owned by residents of the community in which the station is to operate.
