London, May 22.—The sitting of the House of Commons last night was marked by scenes of the wildest disorder, growing out of a motion by Sir Henry Cambbell-Bannerman to adjourn the House in order that he might discuss the charge against Premier Baicour of having violated his pledge not to deal with the subject of Calonial preference without first appealing to the country. Alfred Lyttelton, Secretary of State for the Colonies, was put to the Edward leader, but

Aired Lyttelton, Secretary of State for the Colonies, was put up to reply to the Liberal leader, but the members of the Opposition shouted down his every attempt to speak, even after the Premier had desanaded a hearing for the accretary. Finally the Speaker, after he had desanaded a hearing for the accretary. Finally the Speaker, after he had desanaded a hearing for the accretary. Finally the Speaker and the Accretance of the first time a new rule empowering him to adjourn the House in cases of grave discreter.

The matter came up at the afternoon sitting, when Fremier Balfour, replying to questions said he did not consider himself pledgal to inaction in regard to Colonial references, except so far as Parliamentary action was concerned. He references in the first accombined 'Official regard to Colonial conference in 1986.

The Speaker had been unable to sesure even a semblance of order after howis and counter howis lasting over an hour.

The action of the Speaker and the scenes in the House created a tremendous sensation in the lobbies.

Except when Sir Henry Campbell-Bannerman taunted him with being the sole cause of the disorder, and Mr. Balfour flashed rather an angry reply, the Fremier was most composed throughout the sitting.

The Liberal leaders, after adjournment, held a conference, and it is expected that a vote of censure on Premier Balfour will be moved to-day by Sir Henry Campbell-Bannerman.

London, May 23.—It is understood that a Colonial conference will meet at London early in 1906.

Bad State of Health.

Belleville, May 22.—Rielly has not yet been released, but it is understood that the Dominion authorities are moving toward securing his release. His health is very bad, it is said, and pre-liminary papers, which included a doctor's report, filled out a few days ago, state that if Reilly is kept incarcerated he will either die before completing his term or else become mentally deranged.

Reilly has been working in the fall kitchen and waiting on aged inmates.

Now in General Assembly. Now in General Assembly.
Winona Lake, Ind., May 23.—The Cumberland Presbyterian Church was voted into the General Assembly here yesterday amid a storm of applause, without a speech and without a dissenting vote. It was the final action of the General Assembly on one of the greatest questions which has come before it since the Civil war, and brings back into that organization a branch which went out during the war because of differences over negro slavery.

There were eight men injured—Robert Fisher, engineer, whose wife died a few weeks ago; Robert Reilly, wife and family; Oliver Chevalier, wife and family; Joseph Doe, wife and family; Joseph Doe, wife and family; James Bailey, John Kelly and George St. Pierre.

Those who are injured will recover, with the exception, perhaps, of Engineer Fisher, who is badly scalded. Fisher had closed down the engine to permit of some slight repairs being made to one of the draw ropes. It is said he carried a heavy, pressure of steam on the bolier, and that the safety valve was performing its functions. In order to reduce the pressure he had blown out a pertion of the het water and started the injectors. Those accustomed to sollers state that in all probability for much cold water was injected. There were but two persons in the engine room at the time of the accident, the engineer and Welsh, who sat on a little stool smoking his pipe. He was struck on the head by a piece of the flying boiler.

Escaps Was Miraculeus.

That more deaths did not result from the accident is miraculous, as the big structure is a mass of ruins, and an iron brace from the dome of the helier was carried fully one hundred redaway, striking the xoes of the Nelbergall general store, two stories high, cutting a large liels in the same and finally landing on the ground. A large square piece of timber was carried on a similar distance and landes in the back yard of a boarding house only a few feet from a boy, who was splitting wood. The shock was felt to a greater degree a mile away than right in the village. A horse and earl standing word from the ruins with scarcely, a mark on them. Fostunately for the employes, the boiler, which was located in the southeast corner of the building, traveled eastward in its flight. In the mill were incated two boilers. One of them, not in use, was filled with water ready for use. If was thrown out of the mill about fifty feet, and lites there intact.
