THE ROTTEN DEAL OUR FARMERS ARE GETTING.

By W. R. Morson. \

In twelve months, American farmers sold to Canadian cities and towns, \$73,000,000 of agricultural products. In the same twelve months, Canadian farmers sold to American cities and towns \$42,000,000, a difference of \$31,000,000. This means that \$31,000,000 went to American farmers that justly belongs to the Canadian farmers. The reason this has happened and the reason it happens every year is that there is no proper thought or supervision of our affairs in the farmers' interest, and we intend to protest against any Government in power, be they Liberal or Conservative, so long as this state of affairs continues. To show why this money has gone to American instead of Canadian farmers, we need only examine the following rates of duty which show that we make no serious attempt to keep our markets for the Canadian farmer while the United States keep theirs for their own. We give some industrial items also to show how much more encouragement is given to production and employment in the U. S. than is given in Canada.
