Sugar Shortage.

The following interesting item recently appeared in "Bradstreets":

"The blight placed upon the European

sugar-beet crop by the war, could hardly

have come at a more unfavorable time

as far as the supply of raw material is

concerned. The market of the Cuban

crop does not begin in large volume till

February, and with the exception of

Java, the plant in all cane-growing

countries is only beginning to mature.

The Cuban crop of the past season was

large, giving an estimate surplus of 57,-

000 tons over 1913. On the other hand,

available supplies of raws in Hawaii and

Porto Rico are said to be smaller if any-

thing than a year ago. The European

sugar industry is without doubt one of

those apt to be hit hardest by the war.

With the possible exception of Russia, the

season's crop is likely to be largely, if

not entirely, destroyed or lost. More-

over, for the next year at least, the pro-

duction of sugar beet in Europe will be

seriously interfered with. Hence, greater

production in the cane-growing countries

and the beet-growing sections of North

America is almost imperative. This may

result in considerable benefit to the beet-

sugar industry in Canada, as in addition

to the home market, Greece, Norway,

Sweden, and other allied or neutral

countries must be supplied."

There is a point in this for Canadian

beet growers. There is no reason why

this industry should not be pushed in

this country at the present time, and

next year should see an increased acreage

of beets put in on the beet-growing land

of this country.

Trade Topic.

IT COULDN'T BE DONE.

Somebody said that it couldn't be done,

but he, with a chuckle, replied that

"maybe it couldn't," but he would be

one who wouldn't say so till he'd tried.

So he buckled right in, with a trace of

a grin on his face—if he worried he hid

it. He started to sing as he tackled

the thing that couldn't be done—and he

did it. Somebody scoffed: "Oh, you'll

never do that; at least, no one ever has

done it"; but he took off his coat and he

took off his hat, and the first thing he

knew, he'd begun it. With a lift of his

chin and a bit of a grin, without any

doubting or quibbling, he started to sing

as he tackled the thing that couldn't be

done—and he did it. There are thou-

sands to tell you it cannot be done,

there are thousands to prophesy failure;

there are thousands to point out to you,

one by one, the dangers that wait to

assail you. But just buckle in with a

bit of a grin, then take off your coat

and go to it. Just start in to sing as

you tackle the thing that "cannot be

done"—and you'll do it.—Exchange.

REMOVED THE PROUD FLESH

And Healed the Wound with But Three Applications

You could not have a better proof of the value of Egyptian Liniment than is given by the experience of Mr. C. A. Holden of Montreal, in his letter.

"My pony received a deep cut across the back of her leg below the hock joint. After trying several remedies, without any beneficial results, I was induced to try Douglas' Egyptian Liniment. Proud flesh had formed the size of a hickory nut. After three applications it was entirely healed, which I consider marvellous, as a small artery had been cut, which spurted blood every time the wound was disturbed.

I cheerfully recommend Egyptian Liniment to all horsemen."

The way Douglas' Egyptian Liniment cleans out and heals a festering wound is simply marvellous.
