

... FOR ...

Diarrhoea, Dysentery,
Colic, Stomach Cramps, Cholera
Morbus, Cholera Infantum,
Seasickness,
Summer Complaint,
and all Looseness of the Bowels in
Children or Adults.

DR. FOWLER'S
Extract of
Wild Strawberry

is an instantaneous cure. It has been used in thousands of homes for sixty years, and has never failed to give satisfaction. Every home should have a bottle so as to be ready in case of emergency.

Mrs. GEORGE N. HARVEY, Roseneath, Ont., writes:
"I can recommend Dr. Fowler's Extract of Wild Strawberry as the best medicine I have ever used for Diarrhoea and all summer complaints. I always keep it in the house and praise it highly to all my friends."

THREE IMPORTED Shorthorn Bulls

Phone 68.

QUESTIONS AND ANSWERS. Miscellaneous.

WEED FOR IDENTIFICATION.

The weed enclosed by A. H., Huron County, Ont., is the English plantain (*Plantago lanceolata*), which is distinguished from the common plantain (*Plantago major*) chiefly by its long slender scape or flower stalk and its flower spikes, which are thick, short and dense instead of long and slender as are those of the common variety.

MASTER AND MAN.

Can you tell me if there is any publication on the law and customs between farmer and hired man? If so, give me name and address of publisher and price.

Ans.—Yes, books dealing with the subject are numerous. Write the Carswell Co., Ltd., Toronto, or the Canada Law Book Co., Toronto, for a catalogue.

CEMENT HOG TROUGHS.

I am putting in a new hogpen, and was putting in cement troughs. I have heard that they will wear the rough off the hogs' tongues. Is there anything in it?

Ans.—Cement hog troughs are in use on many farms, and we have never heard of any harmful effect of the kind mentioned, or of any kind. If others have we shall be pleased to have it reported to us.

CHICKEN DEBILITATED BY LICE.

Our chickens were troubled with lice and were dying. We put sulphur in coops and on old hens, and have seen none since, but chickens continue to die. We feed bread, hard-boiled egg, a little soft feed (chop and corn meal), until they are a few weeks old. Now they seem to have bowel trouble, some passing blood, and most of them much water in droppings. They go around with wings drooping and have a hoarse squeak, which they keep up most of the time. We have used a poultry preparation, scalded milk and pepper and ginger. The ginger seems to help them most. Coops are clean and moved often, and chickens not let out till dew is mostly gone.

Middlesex Co., Ont.

Ans.—It is doubtful whether much can be done to help the chickens. The attack of lice might have been the cause of the trouble. I would suggest that the correspondent thoroughly examine these chickens again, and make sure that they are free from lice, especially look carefully around the head. If any head lice are found, an application of butter would be found useful. Once a chicken becomes weakened when very small, it does not usually amount to much afterwards. In the opinion of a great many growers, a stunted chicken is worse than no chicken at all, for it appears to be subject to all the ailments that chickens are likely to have.

I would recommend the following method of feeding: In place of feeding hard-boiled egg and bread, I would feed bread and milk, with the milk fairly well squeezed out of the bread. Bread and milk and wheat, with a good supply of grit, charcoal and meat meal—the latter would not be essential on the ordinary farm, where there is an abundance of skim milk and insects—will grow first-class chickens, providing they are kept free of lice.

With this special lot of chickens, I would suggest that they be fed Johnny-cake made of about 2½ quarts bran, 2½ quarts corn meal, 2 quarts ground oats with the hulls sifted out, a handful of coarse bone meal, and a handful of beef scrap. You can mix this together dry, and rub in about half a dozen infertile eggs, or eggs of any kind, so long as they are good. To this add a heaping teaspoonful of baking soda and a teaspoonful of pure cider vinegar. This should be mixed thoroughly, and will require three or four hours' baking under ordinary circumstances. This can be fed two or three times a day.

Where diarrhoea takes the nature of a bloody discharge, as mentioned in the letter, the use of mercury chloride is recommended. The only formula I have at hand is a homeopathic one, which is 8 X tablets, 6 to 12 in each pint of drinking water, according to the severity of the case. I presume that the druggists would be able to supply these or their equivalent.

W. R. GRAHAM, Poultry Manager,
Ontario Agricultural College,

Antiseptic and Healing.

THERE ARE SCORES OF WAYS IN WHICH EVERY FAMILY FINDS USE FOR

Dr. Chase's Ointment

Dr. Chase's Ointment is so pure and clean, so remarkably soothing and healing and leaves the skin so soft, smooth and clear that it becomes a pleasure to use it.

Though best known because of its extraordinary control of the most torturing itching skin diseases, such as eczema, salt rheum, psoriasis and tetter, it should not be forgotten that Dr. Chase's Ointment will not injure the most delicate skin, but is in reality a skin beautifier of great value.

Dr. Chase's Ointment is used with splendid results as a cure for:

Chilblains and frostbites.
Chapped hands and face.
Sore and inflamed eyelids.
Poisoned skin.
Scald head and baby eczema.
Sore feet and toes.
Pimples and blackheads.
Rough, red skin.
Hives and insect bites.
Barber's itch.
Scalds and burns.
Itching peculiar to women.
Ringworm and pinworms.
Old sores and bed sores.

Especially where there are small children scarcely a week passes in which Dr. Chase's Ointment would not prove useful.

By noting the cures reported from time to time in this paper, you will find that Dr. Chase's Ointment is one of the greatest healing preparations known to science, frequently curing eczema and psoriasis when all other means have failed.

Sixty cents a box, at all dealers, or Edmanson, Bates & Co., Toronto.
