

### Best-Hated of Farm Tasks

ON the spreaderless farm the thought of the great heaps of manure piling up constantly in barn yards, stables, and stalls, is a gloomy one. Those piles mean much disagreeable and hard work. Three times every bit must be handled. It must all be loaded onto high wagons. It must be raked off in piles in the fields. Then every forkful must be shaken apart and spread.

Compare that old-fashioned method with the spreader way. You pitch the manure into the spreader box, only waist high, drive out and—the machine does all the rest.

And, far more important, if you buy an I H C spreader, one ton of manure will go as far as two tons spread by hand, with the same good effect on the soil, and it will all be spread evenly.

### I H C Manure Spreaders

Deering and McCormick

are farm necessities. The man who uses one will get the price of it back in increased crops before its newness has worn off.

I H C spreaders are constructed according to plans in which every detail, every feature, is made to count. They are built to do best work under all circumstances, and to stand every strain for years. They are made in all styles and sizes, for small farms and large, low and high machines, frames of braced and trussed steel. Uphill or down, or on the level, the apron drive assures even spreading, and the covering of corners is assured by rear axle differentials. In all styles the rear axle is placed so that it carries near three-fourths of the load. This, with the wide-rimmed wheels with Z-shaped lugs, makes for plenty of tractive power. Winding of the beater is prevented by large diameter and the beater teeth are long, strong and chisel pointed.

A thorough examination of the I H C spreader line, at the store of the local agent who sells them, will interest you. Have him show you all these points and many more. Study the catalogues you can get from him, or, write the

## Barn Work Cut In Half—Dairy Profits Boosted! Coupon Brings Proof!

IF you are interested in saving half the work and time of cleaning your barn—if you want to save money by saving all the valuable liquid manure—by keeping your barn much cleaner and your stock free from disease—if you want to know how hundreds of other dairymen are accomplishing these things—send the coupon for our fine free book about Manure Carriers.

### BT Manure Carriers

have proved their value and superiority. They are easy to install—the track can be bent around curves without heat; the only tools needed are a hammer and wrench. The hangers button through holes in the I-beam track; can be suspended at any angle; only one style of hangers needed for any barn. The rounded surface of the track prevents accumulation of dirt or ice. The handwheel windlass makes it easy to raise and lower the tub when loaded; also serves as a clean handle with which you can run the loaded bucket out of the barn—keeps your hands from touching the manure. The tub holds half-a-ton of manure; made of 18-gauge galvanized iron, and strong enough to stand up to the work for 50 years. Carefully galvanized to hold all the liquid manure. Carrier dumps either way; is self-cleaning. You will be interested to know about the above and many other features of the BT Carriers. You will be interested in other BT Equipment. Free book tells all. Mail coupon for it to-day.

#### MAIL COUPON RIGHT NOW

Don't attempt stable-cleaning this winter without the BT Manure Carrier Outfit to help you. It will abolish all the monotonous drudgery. You can have it put up in the spare time this fall, it will pay for itself before winter is over, in labor-saving alone, and every year after stable-cleaning will be a pleasure for you or your help. But don't lose time—winter will soon be here. Get our illustrated book, No. 22, that tells about Manure Carriers, investigate all the facts and then decide. We'll send the book free if you'll fill in the coupon or send us your name and address on a post card. Address:
