HEROIC MISSIONS OF THE MACKENZIE

CONTINUED FROM LAST WEEK

IN THE RAPIDS We here mention rapide. We

should rather call the river one con-tinuous rapids, but there is a portion of some five or six miles inslength which merit special attention. They are called on that river "The Rapids." It was here that many of our 54 days on the river were passed. Here, we would reduce again and again our load, pull with all our might on the taut lines, spend whole days in such work and advance but a few hundred feet. After ten days at this laborious fack we menad at this laborious task, we managed to transport about one third of our treight. It took us only nine hours to ride back again on the swift current to the spot where we entered this portion of the river. Here we again renewed the labours of the previous trip. Finally we had won, our freight was landed above the rapids. But no, our difficulties were not over. We had yet to transfer the gasoline boat. It took us twelve Donations may be addressed to : days to get it through, and for at least three miles of the river we had to drag the boat along with block and tackle. Your Lordship can easily judge what labour that meant.

From the rapids to the lake, a distance of from 35 to 40 miles, we found the current very swift, but usually it was much deeper and the banks infinitely better for our task. In about a week's time we succeeded in carrying a little more than half our load to the point commonly called "La Peche."

OUR JOURNEY'S END

While at "La Peche" a three days' downfall of snow began, nor did it stop until it had covered the ground one foot and a half. In previous years the first snow usually this, however, did not, but remained with us in all its beauty. On the 4th of October Mr. and Mrs. John R. Dillon. On the 18th of October we left On the 18th of October we left "La Peche," bringing with us the remainder of our freight and taking with na also Mr. Boland and his with us also Mr. Boland and his CATHOLIC RECORD and Catholic Regisfamily, who just at present are our nearest nsighbours. The day follow-ing we crossed the Lake, but did not reach home. In the evening we cast anchor just out from the bay in which Father Frapsauce had been fishing. We put off the ordinary number of signalling shots, but had no reply. We all thought that the missionary had returned to the Mission. We set out thither and arrived on foot the evening of Oct. 21st. Poor Father Frapsauce was not there either, and we were never to see him again. May God's holy will be done! Oh, Monsignor, I need not tell you what a trial it was! Monday, 25th, not seeing Father Frapsauce return and having put all the provisions that might be exposed to loss in a safe place, I borrowed the dog team of Mr. Boland, left, accompanied by my little Esquimaux, to find him, Brother Meyer meantime

nothing that day; we could only recognize that the ice was broken into smaller pieces, but had not yet scattered. The next day, with Brother Meyer and Mr. Boland, I again visited the spot. This time we noticed something black rising slightly above the ice. Mr. Boland, who first caught sight of it, risked going out on the brittle and cracking ice. Having approached within twenty feet of the object, he recog-nized clearly the body of a dog. He also saw something beneath the ice which may have been the body of another dog or a caribou cap. He

which may have been the body of another dog or a caribou cap. He could go no farther, the ice being very had and the water deep. We were hoping that it would freeze solid. Our hopes were that day disappointed, however, as it broke upstill more and inally moved off into the great lake. The 30th I again sought the bay with Messrs. Boland and Arden and our Esquimaux. The ice was better though still danger. of Wm. Canning in his sixty-ninth year. The decrased was born in ous. All our searching was in vain. Across the transparent ics the bay appeared as usual. This bay is Scarboro where he spent practically all his life as a farmer. He is shallow, not more than three or four feet of water, with the exception of one spot about sixiy feet squera and not far from the bank, where the depth is about nine fest.
