of certificated instances, they have even rescued sufferers from the very verge of an untimely grave, after all the deceptive nostrams of the day had uterly failed; and to many thousands they have permanently secured that uniform enjoyment of health, without which life itself is but a partial blessing. So great, indeed, has their efficacy invariably and infallibly proved, that it has appeared scarcely less than miraculous to those who were acquainted with the beautifully philosophical principles upon which they consequently act. It was to their manifest and sensible action in purifying the springs and channels of life, and enduing them with reand channels of life, and enduing them with re-newed tone and vigor, that they were indebted for
