Why is it that the deposits in the banks have increased to forward a stage of advagoement to the function of the iso on the receive of the servings banks. Why is it that the deposits in the banks have increased to forward a stage of the serving banks. Why is it that the deposits in the banks have increased to the therefore been able to realized the post of the country have been getting increased wages, the serving banks at Reference has been much of the Guint's fart with those of the serving to the serving banks at the serving bank we have therefore been able to serve more the serving bank we have therefore been able to serve more the serving bank we have therefore banks at the serving bank we have therefore banks at the serving bank we have therefore banks at the serving bank we have therefore been able to serve more the serving bank we have therefore been able to serve more the serving bank we have therefore besen able to serve more that the s
namber for Queens, re for North Nortokis in this House that in the consequence in- be avaings of the people. In the Lower reached that point in magnine that L have applied to other magnine that L have applied to other motimpoortine will apply to this—that I have applied to the savings other apply and that the savings other apply and that ary were of Lore magnine that the deposition the parks and that ary were of Lore creased expendiume reased expendiume reased expendiume the formation of the poople is more layely de- to nut functio
re for North Norfolk in this House that are addressing our manufactures that has been reached by the manufactures and bank stocks which we hope to arrive at by-and-bye. The savings of the reopice of Ontario and Quebee, which we hope to arrive at by-and-bye. The savings of the reopice of Ontario and which we hope to arrive at by-and-bye. The savings of the reopice of Ontario and which we hope to arrive at by-and-bye. The savings of the reopice of Ontario and which we hope to arrive at by-and-bye. The savings of the reopice of Ontario and which we hope to arrive at by-and-bye. The savings of the people is more labely de- tion. If i remember on the financial ques- the same provide as the tool. and the advantage, today, from the mome for ward a stage of advangement the same provide as the tool. and bases have increased reased expenditure (it is simply because house the good and accent and have therefore beans. Reaf to save more ack on the Govern- to the question of the hons. Reaf to save more and have therefore beans has been made to the chartered banks by has heat and have therefore beans has been made to the chartered banks by has been made to the chartered banks by has a stage of the Xorth-West, fairs of the country in the banks. Raw in how heat the soft the country in the banks. Raw in the same price for their they seem able to of the Xorth-West, fairs of the country is they seem able to of the country is they seem able to of the Xorth-West and to manufactures the banks that the reason the of was also made to or bonds in the Oil Country, and have to the same price of certain the socks in 1874, and compared the prices the socks in 1874, the stock of the present in itself, it is so com- start of the country is they seem able to of the Xorth West and to are worth so much more to-day than there duals are worth so much more to-day tha sint of the counter of the incover of the inde to bar. The
are addressing our induction of the counce in monitor of the counce in the one member and tion. If i remember and the quees nor the financial quees North-West and that the de question of the country is simply because the working in matters will apply to direct they did. To my mind no class in this Dominion de- reached so forward usaries, and bank stocks in the banks of the reople of Ontario and Provinces, or the money of the reople of Antario and the de with him devoted iton. If i remember on the financial quees- not the financial quees- not that the deposition in the saving is more largely de- its simply because the working income and the saving is more largely de- tis simply because the working income and the saving is more largely de- to not in the banks. Reference has a they did. If of markets were free to out that the increased The increased ex- the of the Covit's service development of the or out that the banks. Reference has a very great ison to them in this respect. The hon, member for Queens that socks in 1574, and compared the prive to the question of the exolution of the increased of the Ovit. West, and they quoted the prive they seem able to so fithe outprises the of gas; it is an ar- tered banks, at all events, are enjoying in to possess a large they see and bit to in the outprise the so construction of the income a statement to so dive or three of the leading banks for in its quoted at 135; to-day it is 184. In 1874, File contend with File douse and country, which will show that the bank of Montreal was quoted at 195; to-day it is so coth ther own private was quoted at 195; to-day it is so coth ther own the own private was supplied, by hwe also referred so of the members of the so due at 185; to-day it is 184. In 1874, File declar stock was quoted at 195; to-day it is quoted at 125; to-day it is 184. In 1874, File declar stock was quoted at 195; to-day it is quoted at 125; to-day it is 184. In 1874, File declar stock was quoted at 195; to-day it is quoted at 125; to-day it is 184. In 1874, four cr
the bon. member and while in the Lower Provinces, own the function of the savings banks. Were it is an and have therefore bear able to available to the savings banks. Were it is simply because the working me of the poiled in the savings banks. Were it is simply because the chartered banks bave increased wages, on the Govern- the money of the people is more largely dependence of the savings banks. May is it is simply because the chartered banks bave money to nut in the banks. Reference has been much of the for bear able to save money to nut in the banks. Reference has been much of the Civil Service that the increased experiment of the of the North-West, and they quoted the prices of the Saving's that they of the North-West, and they quoted the prices of the Saving's that they show a siso referred banks at all events, are enjoying a not posses a large of the class of the country have easo referred to the quotes the large export of of their capital. In 1874, the stock of the large respired was simply be asso made is too the old Country, and not the of the large respired was simply be asso made is too the old Country, and not the order of the large respired was simply be asso made is too the old Country, and not the order of the large respired to the there have the second the second water of the second water of the second water of the second water at the the prices of the market of New Brunswick, the farmers of New Brunswick, the farmers of New Brunswick, the farmers of the second water of the second water of the second water of the second water of the the order of the second water of the second wa

eman said the queer North-West and that ary were of lators in the financial queer on. gentlemen op- ack on the Govern- crassed expenditure Civil Service. Have out that the large banks have increased to ut in the banks. Reference has been made to the chartered banks by hon. gentle- nade to the chartered banks by hon. gentle- made to the chartered banks by hon. gentle- made to the chartered banks by hon. gentle- bank stocks in 1874, and compared them with how set of 1878. It would have been much how fill is stocks in 1874, and compared them with how gentleman had compared the prices of the of the North-West, lairs of the country or efficient manner, to the quest is an ar- n to possess a large they seem able to sy have also referred set of the arguit, it is so there would to the stands to due the the members of New Brunswick was supplied. When he quotes that large export of certain being the outcome of the employment given in itself, it is so com- stock stood at 133; to-day it is 1874, the sole of the dist they were due for the set of the sing in 1874, the sole of the dist they were due for the set of the sing the outcome of the employment given is is quoted at 200. In 75, Bank of Toronto to due for the resent high prices was been used the word to the alson was also made they owed to the alson was also made the toro Inland. Re- ment to Donator is the sole are of Langel at the the armers of New Brunswick, the figures he mank of Montreal was quoted at 130; to-day it is quoted at 200. In 75, Bank of Toronto took stood at 133; to-day it is 184. In 1874, the sole of the is quoted at 200. In 75, Bank of Toronto to due bonds in the Old Country, and an hor- gentleman stated that the reason our bonds the money market of England is open to the bank were at the is prosen in the banks, at all ere colar is the to on that point. As was stated world. True, they are open to the other colories as well as to ourselves? Why is it that our hey were some years ago? It is simply be- tause we are nof under the necessity of ging into the
ary were of uore that the deposits in the banks have increased the price of the Gountry have been getting increased wages, and have therefore been able to save money to put that the deposits in the way banks. A way is it is country have been getting increased wages, and have therefore been able to save money to put that the deposits and they quoted the prices of the country have been getting increased wages. The increased even of the country have been getting increased wages, and have therefore been able to save money to put the banks have been much for the country have been getting increased wages. The increased even of the country have been getting increased wages. The increased even of the country, if that the farmers of New Brunswick have those of 1578. It would have been much for the country, if that hone gentleman had compared the prices of these stocks in 1874, with those of the present ime; and I will give the House the quotation of the party that comprises tered banks, at all events, are enjoying a great measure of prosperity, that prosperity for their capital. In 1874, the stock of the Bank of Montreal was quoted at 130; to-day it is quoted at 200. In '78, Bank of Toronto stock stood at 133; to-day it is (16, down in the 016 country, and an hon; is on ot, so my mind, correctly remarked were attheir present high prices was because the surplus of the farmers of New Brunswick, the figures he has given do not, to my mind, correctly removes the world to the money market of Eugland is open to the other colonies as well as to ourselves? Why is it that our bonds are world. True, they are open to the other colonies as well as to ourselves? Why is it that our bonds are worth so much more to-day than they were some years ago? It is simply because we have a surplus and are the solves were have not hore the coday that the maxweit more and was it not ano?
n. gentlemen op ack on the Govern reased expenditure Country have been getting increased wages men opposite, and they quoted the prices of bank stocks in 1874, and compared them with those of 1878. It would have been much bank stocks in 1874, and compared them with those of 1878. It would have been much fairer to this House and the country, if the these stocks in 1874 with those of the prices of the country in the banks. It would have been much bank stocks in 1874 with those of the prices of these stocks in 1874 with those of the prices of these stocks in 1874 with those of the prices of these stocks in 1874 with those of the prices of these stocks in 1874 with those of the prices of these stocks in 1874 with those of the prices of these stocks in 1874, the stock of the great measure of prosperity, that prosperity they seem able to stock stood at 138; to-day it is 184. In 1874, the stock of the farter to their capital. In 1874, the stock of the Bank of Montreal was quoted at 130; to-day ther semail matter is quoted at 200. In '78, Bank of Toronto hen compared with the stock stood at 135; to-day it is 184. In 1874, the stock of the stock stood at 138; to-day it is 184. In 1874, the stock of the stock stood at 138; to-day it is 184. In 1874, the stock of the stock stood at 138; to-day it is 41. It is ference was also made to the prices of our bonds in the Old Country, and an hor- gentleman stated that the reason our bonds in the Old country, in dan hor- gentleman stated that the reason our bonds in the outcor market of England is open to the world. The, they are open to the world. The they are difference was also made the world act were they not open to the other colonie is were at their present high prices was because the money market of England is open to the world. The, they are open to the world. The they are open to the world. The they are open to the source of the anone, was also made they were some years ago? It is simply because we have a surplus and are ing into the market to borrow money- ing into the m
Civil Service. Have made to the banks. Reference has been made to the chartered banks by hon, gentle matered banks of the country of the Civil Service development of the fairs of the country of the North-West, fairs of the country of the North-West, fairs of the country of the worth sees tooks in 1874, and compared the prices of bong gentleman had compared the prices of those eof 1878. It would have been much fairs of the country or efficient manner. to the question of the party that comprises the of gas; it is an ar- in to possess a large they seem able to by have also referred es of the members of ther small matter in itself, it is so com- ben compared with e House and country, if the solo value for their capital. In 1874, the stock of the sore able to by have also referred es of the members of the sore able to by have also referred es of the members of the sore able to by have also referred es of the members of ther small matter in itself, it is so com- ben compared with e House and country, ee Ministry had to in the Outdat at 00: In '78. Bank of Toronserity the sore able to bas given do not. to my mini, correctly re- present the surplus of the farmers of New Brunswick, break and the rather ason our bonds is to our bonds in the Old Country, and an hon- ker et their present high prices was because the world. True, they are open to the other colonies is well as to ourselves? Why is it that on they were they not open to the other colonies is well as to ourselves? Why is it thave not the farmers of New Brunswick, break and the farmers of New Brunswick have not the farmers of the broak the world contario has well as to ourselves? Why is it that on they were some years ago? It is simply be- daus the of the itouse for that the members for de stange portion of the as well as to ourselves? Why is it that on they were some years ago? It is simply be- daus were are not under the necessity of the the to any
The increased ex- of the Civil Service development of the p of the North-West, fairs of the country ore efficient manner, to the question of the party that comprised the e stocks in 1874 with those of the prices of these stocks in 1874 with those of the prices of these stocks in 1874 with those of the prices of these stocks in 1874 with those of the prices of these stocks in 1874 with those of the prices of these stocks in 1874 with those of the prices of those see a shield that the the stock of the great measure of prosperity, that prosperity the surplus that they had after the mar- tered banks, at all events, are enjoying a the stock stood at 133; to-day it is 184. In 1874, the stock stood at 133; to-day it is 184. In 1874, the stock stood at 135; to-day it is 184. In 1874, the stock stood at 135; to-day it is 184. In 1874, the stock stood at 135; to-day it is 184. In 1874, the stock stood at 135; to-day it is 184. In 1874, the stock stood at 135; to-day it is 184. In 1874, the stock stood at 135; to-day it is 184. In 1874, the owner warket of England is open to the stock stood at 135; to-day it is 184. In 1874, the owner warket of England is open to the stock stood at 135; to-day it is 184. In 1874, the owner warket of England is open to the stock stood at 135; to-day it is simply be the monery market of England is open to the swell as to ourselves? Why is it that our they owel to the swell as to ourselves? Why is it that our they owel to the instree of Inland Re- his time to Ontario thar were they not open to the other colonies as well as to ourselves? Why is it that our they owell to the infinite or of under the necessity of going into the market to borrow money- singly because we have a surplus and read the figures of the hong gen- tema would seem to indicate. Then there is the shipping industry. That matter has been so very ably dealt with by the hon. member for Westmorland, that very little is is the shipping industry. That matter has been so very ably dealt with by the hon enter the to say on that poin
development of the fairer to this House and che country, if that fairs of the North-West, fairs of the country ore efficient manner, to the question of the party that comprises to so faw or three of the leading banks for these stocks in 1874 with those of the present time; and I will give the House the quota- tions of two or three of the leading banks for these stocks in 1874, the stock of the so fahe members of the so compared with e House and country, and to the manswick, the figures he have not have the control of their own market of the surplus that they had after the mark- tered banks, at all events, are enjoying a great measure of prosperity, that prosperity they seem able to of the mombers of the so fahe members of the so compared with e House and country, and to the money market of England is open to the sist on to ourselves? Why is it that our bonds are worth so much more to-day that they were dis- they owed to the asion was also made ister of Inliand they were dis- the to Outario have in the figures of the farmers of New Brunswick, because a large portion of the and was it not ne- sing into the market to borrow money- sing into the market to bo
