Airmen Now Safe

Paris, Dec. 18.—An invention which the author claims will do away with aviation fatalities is being tested by M. Mayoux in Paris. It is a parachute composed of compressed air and which is placed between the pilot and the stern rudder. In case of collapse it is automatically shot from the tube by means of compressed air and opens instantly. A successful exhibition carried out from the top of Eiffel Tower was witnessed by a large crowd this week. A dummy of the weight of a man being brought safely to earth.
