

A Belated Shipment of Job Embroideries

has arrived and is on sale this week at very special prices. We wish to clear away every yard of it this month and have marked them at specially close prices for quick selling.

**Think of Buying
the Daintiest Embroidery
at 10 cts. per yard.**

The variety is large, commencing at the low price of 3c. per yard and ranging up to 25c. for Embroideries 27 inches wide.

When we say

"INVICTUS" Shoes of Geo. A. Slater fame are dependable we mean that they will stand wear and tear and retain their shape. Like old and trusted friends they may always be relied upon. They are "THE BEST GOOD SHOE."

Our New Wall Papers ARE ON DISPLAY

and they present a striking example of our ability to gather the highest class goods and to sell them at ordinary prices.

**Distinctiveness in the Papers
themselves and Value in
their prices we strove for**

and secured. We are now showing all the new 1914 designs.

Marshall Bros.

At the House

Mr. Clift presented a petition from the inhabitants of Millertown, asking that they be given representation in the Assembly; last year they were not included in any electoral district, and did not enjoy the franchise of voting in October last. Petitions were also presented by Mr. Jennings, asking that Boyd's Cove be made a port of call; that legislation be passed prohibiting the cutting of timber on Chapel's Island, except for the purpose of the fishery; also asking for money to repair roads and bridges, by Mr. Stone, asking for \$500 for the construction of a bridge at Hodge's Cove, and for \$40 for the construction of a road at Old Perlican; by Mr. Bennett from Blackhead asking that the people there be given the privilege of sinking codnets; by Mr. Emerson, asking for a pension for Patrick Lane, doorkeeper; also by Mr. Hickman, asking for the allocation of sums of money in relation to various public matters in the District of Bay de Verde.

The House then resolved itself into Committee of the Whole on Supply.

Mr. Clift thought it unfair for the Finance Minister to proceed right away in the absence of the leader of the Opposition, the latter gentleman, he had reason to believe was prepared to make some comments. Besides it was only yesterday that the Supplemental Supply was submitted and hon. members had not sufficient time to digest them. He asked that the matter be deferred which was agreed to, and the Committee rose.

The Bills relating to the Workmen's Compensation Act; an Act to regulate the employment, food and lodgings of men in logging camps; an Act entitled "Representation in the House of Assembly and the Powers and Privileges thereof"; and an Act to provide for the Investigation of Combines and Monopolies, were deferred.

The House then went into Committee on the Sealing Bill.

Mr. Emerson took objection to sub-section (f) of Section 2, which says that "Cooks shall be prohibited from doing any other work than cooking," on the grounds that in the event of the sealers being a good distance away from the ship, or in any case of emergency, the Captain was unable to call upon the cooks or stewards to do any other work, under a penalty of \$500, hence he asked that this clause be stricken out.

Mr. Higgins endorsed what the previous speaker said, and contended that all men go to the ice for what is in the voyage, and no one signs on as regular cooks.

Mr. Coaker, the introducer of the Bill, replied that the section regarding the duties of cooks had been thoroughly discussed and agreed upon by the F.P.M. in Convention at Greenspond, and that all outfitters and owners, except the N.B. Produce Co., agreed with that Section. The men generally who go to the seal-fishery, ask that cooks be prevented from handling seals, as they had enough to do if they did it properly. Besides Mr. Coaker pointed out, that this practice has been in vogue for the past two years, and the frivolous objections raised by some members was because they had had a chat with some of the captains who could not see eye to eye with those responsible for introducing the clause. In his opinion the main object of cap-

How New Zealand

Abandoned the Policy of the Market-Place.

An Optimist's Account of the Results of the Social Policy of New Zealand—Its Remarkable Land Policy.

A striking article on "The Social Policy of New Zealand" appears in the Colonial Journal, based on H. H. Lusk's new book on "Social Welfare in New Zealand" (W. Heinemann, 6s.).

"New Zealand has led the way in democracy, and its numerous economical innovations have been carefully watched and largely imitated. To-day the community is represented by its admirers as the first one that has ventured to deny the conclusions and disregard the teachings of commercialism. Its main object is to secure that every member of the society shall obtain a fair and full share of the profits arising from his exertions."

The Prime Minister gave notice that he would on Wednesday submit Resolutions in relation to the White Slave Traffic.

Wife—"Very slippery coming home, was it not?"
Hubby—"Oh, very."
Wife—"Couldn't keep your feet, I suppose?"
Hubby—"Oh, yes, I did manage to keep them; but they changed places with the back of my neck several times."

President Cantley Says:

that the profits of the Nova Scotia Steel & Coal Company for the past year were the greatest on record.

Although the annual report for 1913 has not yet been published, we understand from reliable sources that the earnings applicable to interest on the 6 p.c. Debenture Stock will be about \$900,000—which represents protection five-fold.

Our present quotation is \$98.00 a share with 6 p.c. interest from January 1st. At this the yield is 6 1-10 p.c. Cash or \$10 payments—"as you like it."

Hubby—"Oh, very."
Wife—"Couldn't keep your feet, I suppose?"
Hubby—"Oh, yes, I did manage to keep them; but they changed places with the back of my neck several times."

A Challenge to the Social System.

"It is obvious that this standard of individual welfare raises a challenge to the usual social system. It conflicts with the commercial spirit, the methods of individualism, and laissez faire policy generally. In the present work it is claimed that it has been no visionary ideal; not only it the programme one reflecting a high moral standard, but it has resulted in an increase of individual well-being for the people and of wealth for the nation that is wholly unprecedented in the annals of history."

How It Came About.

"It was not, however, the study of the higher morality or for the matter of that, any abstract ideas that led to the well-known economic measures of

Nurse's Years of Experience

Proves Dr. Chase's Kidney-Liver Pills. Best Treatment for Kidney and Stomach Troubles.

The trained nurse has even greater opportunities than the doctor himself to watch the action of medicine in specific cases.

For years the writer of this letter has been recommending the use of Dr. Chase's Kidney-Liver Pills among her patients, and is firmly convinced that no treatment is so prompt and effective. This is the most valuable evidence obtainable, and we believe that all who know Mrs. Duffy will appreciate it to the full, knowing that she would not recommend anything in which she had not the fullest confidence.

est, there was a credit balance of

\$50,040.
"The number of 'selectors' provided for was 5,060, or with their families nearly 17,000. The improvements made by these tenants by the end of 1910 were valued at over £2,000,000, an important asset in the wealth of the country. It is said that the money paid by way of purchase power was almost invariably reinvested in the country, a circumstance which indicates that capital was not alarmed by the process."

Among other helpful schemes are mentioned money advanced for building houses, old age pensions, industrial arbitration.

Back to the Land.

"The result of these and other measures has certainly been to bring about that modern desideratum—the engagement of a larger proportion of the population in country pursuits. In twenty years after 1890 the number of farms was doubled, and the agricultural population of the country increased by one-third, so that there was a clear gain to agriculture notwithstanding the influences which have steadily in most places throwing men into the towns."

"In the face of all the prophecies of evil the price of land in New Zealand steadily goes up. The causes of this rise have nothing to do with politics; they are largely mechanical, viz., the freezing-chamber and the milking machine, but they have fitted most conveniently into the scheme of closer settlement. Formerly sheep were only wanted for their wool and tallow, and this industry could only be carried on profitably with large flocks on large areas; the sheep were left to get what they could out of the grass and little agriculture was practiced. The freezer has altered all that. Small farmers keep breeding ewes and improve the feed with roots. Similarly the dairy industry has gone up by leaps and bounds now that the small holder can embark upon it, and the high cultivation which he can give provides the necessary crops of succulent fodder to supplement the pastures."

How It All Pays.

"In the meantime it is clear that the New Zealand policy has not, as was apprehended, in some quarters, driven capital away. In 1890 there was invested in factories and workshops about a million and a quarter; in 1910 the amount was £17,500,000. Nothing reasons so impartially as money, and the increase was fully justified by the output. The increase in the value of manufactures in the twenty years is estimated at about three hundred and fifty per cent. In other words a country which has by statutes established shorter hours and higher wages, besides raising the age of young workers, has had a development which has not been approached by any other country. (To be continued.)"

An Obstinate Case.

"I used to suffer with sore nose, a trouble I found very difficult to deal with for a long time. Ordinary ointments seemed to avail little. The inside of the nose would get somewhat better, and then, at the first cold, it would become as bad as ever."

"Are you all right now, then?"
"Yes, indeed after I had used Zylex a few times, things came easier; and a little perseverance effected a perfect cure. If any symptoms of the trouble appears again, a single application fixes it. Zylex costs 50 cents a box, at your druggist's, and you should always have a box at hand. It's useful in all kinds of skin troubles."—Feb 13, 1914.

THE WAY TO SUCCESS.

A youthful aspirant applied to a successful author for advice as to how to succeed in literature. "You need indomitable perseverance, a typewriter, and a mangle" was the reply.

"Do you mean I had better take in washing?" asked the aspirant.
"Nonsense! You need the mangle to take the creases out of your manuscript. Mangle them well, and then, unless the editors have burned them with cigarette ash, no one can tell they have been out before."

McMurdo's Store News.

WEDNESDAY, Feb. 18, 1914.

Infants' Delight Soap is a really delightful Soap for babies, for whom of course it is specially made. It contains no free alkali, but is perfectly bland and emollient. It is also exquisitely perfumed. There is a growing demand for this fine Soap. Price 15 cents a cake; box of three cakes 40 cents.

The Eugenic Feeding Bottle is one of the most complete and practical we have seen. It is so easily cleaned and of such convenient shape that it instantly appeals to mothers and nurses. The nipples and valves are formed of the finest and toughest transparent rubber. A brush goes with each bottle. Price 40 cents each.

By the Way.

It is reported in Glasgow that the British makers of galvanized sheets have joined a combination which will control production. Each member of the combination will be allotted a specified amount of the total manufacture, but there will not be any official selling prices.

A Russian newspaper man named Brushkovsky, who is an amateur detective, and who worked up the case against Mendel Belis, was sentenced in St. Petersburg on Dec. 26th to imprisonment for one year in a fortress for keeping his seat when the national anthem was being played recently. The charge against him was les majeste.

At an inquest held in London into the death of an English aviator named Slack, who was killed in an automobile accident on Dec. 21st, the question was raised whether or not it is safe for an aviator to drive an automobile. Slack lost his life through speeding. It is contended that the tremendous speed at which the aviator is accustomed to travel in the air makes it difficult if not impossible for him to judge the pace at which he is going on the road.

We have in stock the following brands of Hockey Sticks, viz:

BOYS' CHAMPION. IMPERIAL. EMPIRE. STILL'S SPECIAL. STILL'S DEFENCE. MIC-MAC.

Art Ross' Ex-SPECIAL. Art Ross' AMATEUR. Art Ross' GOAL.
