NEW MILLINERY

Judging from the crowds we have had the fore part of the week, people like to attend Gray & Parker's millinery openings, and many complimentary remarks were uttered in favor of this season's showing. No matter what the style, we pick out the really nice hats from the great wholesale openings. Good taste always rules at this store, and every year people are surprised to see in what new guise appears this same sense of the suitable, the tasteful and the distinctive. Have you seen our New Hats?

It Leaves the Skin Tingling With Health

There is a wonderful difference in soaps. Have you ever noticed how one kind leaves the skin soft and white while another may leave it red and rough?

Both soaps looked alike, perhaps. But the difference was in the material. Let us tell you what we put into Infants' Delight, then decide if you can continue with common soap. Ceylon is an island in the Indian Ocean, and from there we bring pure cocoanut oil 12,000 miles

table oil, and often pay double what we might pay. But our oil is pure enough for your table. These oils are doubly boiled and then milled by our own special process, after which they fall like

flakes of snow into enormous bins. Then they are crushed under a weight of 30 tons to press out the moisture. Next they pass through granite rollers and come out in miles of silky ribbons. Finally they are dried eight times

and then stamped into cakes. Could you imagine a more delightful soap than this? It lathers into a rich, creamy foam. It wears as thin as a wafer. It leaves the skin as soft as velvet and as smooth

as satin. It is the very utmost in perfect soap. The perfume is the delicate scent of the roses. We pay \$100 a pound for pure Otto of Roses, but it requires 3,000 pounds of rose leaves to make a single ounce. The fragrance is simply exquisite—it brings the breath of a million flowers. Use a single cake and learn how delightful it really is—it costs no more than the common, so why not have the best?
