THE BIG BEND.

The news which we publish to-day from Big Bend is the most cheering of any intelligence yet received in the colony, not even excepting the announcement of the discovery of Cariboo. It is cheering, not so much because it has enabled a certain number of miners to take out large amounts of gold, but because it discloses to us the fact that the most extensive as well as least expensive mines yet opened out in British Columbia, or probably in any country north of California, are now discovered. So far as is yet known the gold region extends over a hundred miles; the sinking is shallow ; the ground rich ; and the mines comparatively easily reached. Here are facts that ought, under proper management, to attract the largest population that has yet visited the neighboring colony. From all the accounts we have received, and they are almost strangely unanimous, there is but one conclusion to come to, and that is that the greatest gold mining region in any This is no idle assertion. If we take th statements of those men who have had practical mining experience at Big Bend, we find that the average yield of the gold fields when

animals cannot attempt to cross it until the middle of May. Then when we come to the boat travel; out of the two hundred and fifty miles on the Columbia River, seventyfive are full of navigable difficulties. Counting the distance from where the steamer. lands the passenger to the mines, the navi- Plumper's Pass until Saturday mo gable reach on the Columbia River, and the road from Colville to Walla Walla, we have the total distance about five hundred and thirty miles, nearly three hundred of which is land travel. Now if we take the Fraser river route and set Yale against Walla Walla, we have to Kamloops lake one huns dred and fourteen miles of land travel; then

miles to the end of Shuswap lake ; and fro thence to the mines about seventy miles, giving altogether a distance of three hundred and thirty-four miles or nearly two hundred miles less than the Colville route. . When to this we add the very significant advantage of being able to reach the mines, which it is tion : said can be worked in March, nearly two months earlier in the year than can be done on the Oregon route, we may safely calculate in order to enable them to work during the whole winter. The Cornish Company

-A Southern paper gives the following ac-

count of the whereabouts of the leading officers of the late rebel army : General Loring is in Jackson (Miss.) with the intent to go to New Orleans and engage in mercantile pursuits, General Gardiner has taken up his residence in New Orleans, and gone into business with General Bragg. General Joe Johnston will probably receive the appointment of President of the principal railroad companies in Alabama or Georgia. General Hardee was the recipient in Mobile the other day of a handsome compliment in the shape of a dinner, tendered him by several of the United States officers on duty at that post. General Longstreet, who arrived in Mobile a tew days ago, has been pardoned by the President. General Lee has entered upon his duties as President of Washington College (Va). Jubal Early is an applicant for pardon. General Forrest is reported to be, managing a saw-mill somewhere in the interior of Mississippi. General Stewart, who commanded a corps in Hood's army, de-signs going to New Orleans to practice law.

many with his family. General John G. Walker is in England-so it is reported. Kirby Smith, at last dates, was at Matanzas, in bad health. General Hindman is prac- ing intelligence : ticing law in Mexico. The New Orleans Picayune says : "We catch a glimpse now

The steamer Enterprise arrived day after a splendid run of six New Westminster with 73 passen Cariboo Express. She was detained on the passage up by a snow storm and lay in Plumper's Pass until Saturday mo ning. The steamer Lillooet also arrived shortly before the Enterprise from New Westminster with about 40 passengers. The Columbian of Saturday co ntains no

the rear of the white men. A petition from the settlers to t ment on the subject was talked of FROM CARIBOO.

From a party who left Richfield two weeks ago we gather the following imforma-

Four companies were at work on the side hill, opposite Richfield, and had everything on the whole of the trade, if we make the proper exertions. nce of shot goin. ald make from \$4 along where they and three others hey reported that they could mak 55 a day to the hand sluicing w torked. John Maskintosh and the had gone thirty miles higher up the river to try the rich diggings supposed to exist ers and a

From Mr. D. W. Smith, who left Big Bend on the 15th November, we have the following interesting information respecting these promising diggings.

Mr. Smith, who has a claim on Carnes Oreek, where he has been working during the summer, came over the divide by the Govern-

very good for a mountain trail, and can be walked easily with a pack in two days. Small lake boats run from thence to Savana's ferry, which takes an additional two days.

THE BIG BEND DIGGINGS.

Mr. Smith, who was one of the pioneers of the diggings, having travelled with Carnes, after whom one of the creeks is named, and reached the diggings on the 30th April last, states from his experience that he is of opinion that a range of country, say from 100 to 120 miles, exists there that will pay from half an from \$10 to \$15 a day to the hand. The California Company were sinking a shaft on the line of the Cornish claim; they had struck five feet from the surface a stratum of gravel (already five feet deep, the bed rock being yet untouched), promoting

FRENCH CREEK.

On this creek two companies of 12 to 15 men remained when Mr. Smith left, intending to winter there, sufficient provisions having been brought in to maintain them by Messrs, Smith and Ladner. From 250 to 300 men BURNES' CREEK. Mollerd & Co., had commenced finding pay. Two days before our informant left they had picked up a nugget weighing \$52. The Columbian has the following : The steamers Onward and Lulleget and Yale left they had picked up a nugget weighing \$52. The Columbian has the following : The steamers Onward and Lillooet arrived from Yale last evening with respectively 75 and 35 passengers. Our advices from Cari-boo are to the 22d inst., but are unimportant. The weather was sharp and pleasant—two inches of snow having fallen. Six claims were still being worked wirk for the state of the st rock gravel from 8 to 10 feet down. A com-pany working in the gravel, from one to two miles above, averaged from an ounce and a half to two ounces a day to the hand in get-ting out their tail-race, when their wheel froze up, without expecting to reach the bed rock this fall. Shep. Bayley's Do, three in num-the had cot dut as much as \$1600, getting the had cot dut as \$1600, g

about fifty miles apart, the latter being low down. McCulloch Greek also empties in Gold Greek. Judging from the experience of last Spring the diggings can be worked, early as March, as the earliest prospecto found the ground though covered with and could self when they preved there in Ap

quite soft when they arrived there in April Messrs. Smith (of Smith & Ladner), Ro-mano and McNiel intended engaging a mail each to blaze out a pack trail from the ter each to blaze out a pack trail from the ler-minus of the Government trail on the Colum-bia to French Creek, good feed for animals existing all the way. The shortest and best route to the diggings is decidedly up the Fraser. The Kamloops and Shuswap Lakes, on which the British Columbian Government intend having a steamer placed are not gene-rally frozen over beyond March, while the lakes on the Columbia River are not open till

about 100 miles in h and has fine prairie lands on either side pro fucing five hay. Four men reported havin discovered something in the neighborhood o French Oreck which they would not ex-change for the best discovery in the country. They refused to disclose the secret until they

had made themselves secure. A miner who left Big Bend after our in-formant told him that six feet of snow lay on the Divide when he crossed over, and was still falling. One-third of the miners who were at the

diggings belong to Colville, and had returned to winter there. A big rush was expected to

the diggings in the spring. Mr. Perry reported having discovered silver ore on Moberly Creek.

PROVISIONS.

The following were the ruling prices of provisions at Big Bend :- Bacor, \$1 50 B b; Flour, \$80 B 100 lbs; Sugar. \$1 50 B b; Coffee, \$1 50 B lb; Tea \$3 B lb; Butter, \$2 B lb: Beef, 65c B lb. From another informant just arrived from

Kamloops we learn that Romano had reached French Creek with 25 mules laden with provisions, which would be a great boon to the

miners at Big Bend. At Kamloops several parties were organ-ising pack trains to convey provisions, drawn by dogs, to Big Bend during the winter. A fine opportunity presents itself here for spec-ulators to make a clean sweep of the super-

fluous canine species. Messrs. Dewdney and Mowberly had both

15 feet deep, coarse and heavy gold being found wherever it was reached. A map who sunk a hole about 4 feet deep 15 miles up peared that the prisoner went to the St. George hotel at 2 o'clock on the morning of ect of the

RY WOOTTON. Postmaster.

opened is computed at from half an ounce to nces a day per hand. It is need to say that no gold mining country in the world can equal this. California nor Auso tralia, nor Montana nor Idaho, cannot pretend to a comparison. Let us, therefore, make the most of our position. Let us take a leaf from our American neighbors and advertise our mineral wealth. Portland got the lion's share, and still gets it, of all the traffic north of her State. When she had the longest route to the Rock Creek, the Kootenay, and even the Big Bend, she managed to secure nearly all the travel and all the traffic that went to those places. At present our advantages over Oregon in competition for supplying any mining region in British Columbia are beyond question ; and yet the enterprise of our neighbors is gradually counterbalancing this good fortune. As we informed our readers a few days ago, a steamer is built and no doubt now running between Colville and within thirty miles of French Creek. This brings Walla Walla within pretty easy distance of the new gold fields, and will no doubt give the Oregon people a monopoly of the traffic, if a steamer is not placed on the Shuswap and Kamloops lakes by April next. If this latter be done; if Mr. Wright who, we believe, has obtained the exclusive privilege of putting on a sleamer, can manage to ran his boat early in the spring, we shall have all the travel; and it will be immense. if the two Governments only see that the advantages of our position as well as the richness and inexpensive character of our new mines, are laid properly before the California public. If we can show to the California miner that for a reasonably small amount he can reach Victoria and from thence to the gold fields in nine or ten days, and that these gold fields when reached will afford him the opportunity of making from eight te sixty dollars a day, we shall have a large and energetic population travelling through this city as soon as spring sets in. And we can show all this. With direct steam communication, we bring the miner from San Francisco in four days ; five or six more will then take him to Carnes and French creeks, where, unless all the narratives from the energetic class of men who have been working these this summer are false, he will be able to make more money, with a less expenditure, than in any other gold region in the world. Let us not, therefore, lose sight of the position in which we stand. From Walla Walla to Colville is a distance of two hundred and

fifty miles of a very bad country. Fifty

and then, on the street, of several other officers who held the rank of Brigadier or Major General in the late Confederate army, who are hard at work now at one or snother branch of business. The majority of them are old residents, either of the city or the State?

AN UNWELCOME VISITOR .- An affair occurred lately at the President's house. A man somewhat inebriated called and desired to see the President. He was boisterous and officer Crook refused him admittance up stairs. He became very disorderly and was put out of the Executive mansion. When about fifty feet from the door he turned and drew a revolver on the officer, when the

guard made a lunge at him with his bayonet, and he was captured and taken before Justice Walker, who fined him the enor-The gross dividends yielded by this claim since the first week in October have been mous sum of \$2,000 for carrying concealed weapons. Having no money he was comabout \$11,000 to the interest, the various ex-penses incurred reducing that amount to mitted. He gave his name as Robbins Sumner, and said he was a brother of General about \$6000. Sumner. He came from Alexandria, and The foreman of the Cornish Company told his name is probably an alias.

THE ROUTE TO BIG BEND .- We understand that Mr. Wright has obtained the contract offered by the British Columbian is considered a good hydraulic claim. Government for the construction of a steamboat to ply between the western extremity of Kamloops Lake and the upper or eastern end of Shuswap Lake, in connection with some men busy at work at it. the wagon road proposed to be made from Ashcroit or thereabouts to Savana's Ferry through the winter. on Kamloop's Lake. The contractor will have the exclusive privilege of conveying passengers and freight at fixed rates bereached the Creek on the 23d. Mr. Ormandy, the messenger was met on his way up at tween those points. 'It is further stated that Mr. Wright will at once procure the Soda Creek. necessary machinery from this quarter or San Francis

ON THE TRACK-We lears from passengers by the Enterprise that a clue has been discovered to the murderer of the Scotchman named John Morgan, an employe of the Telegraph Company, who it will be remembered was recently butchered at the side of his camp, below Soda Creek. It appears that an Indian known as Yale Jim, who had been engaged in packing, offered a watch for sale to Mrs. Ritchie, of Canoe Creek, that was deed was covered over when he sigued it. recognised as the property of the deceased. Information was conveyed to William's Oreek, and the constable immediately started the Creek on the 25th. Mr. Farron came with a party of others all the way from Soda Creek to Yale in a cance. in oursuit of the culprit. He describes the river scenery as grand be-yond description, but the trip is too danger-AN OLD TRUMP .- In Plattsburg, recently,

from Lillooet we learn that two miners who had been prospecting on Bridge River only sixteen miles from Lillooet had just returned French and Carnes' creeks are large creeks. about thirty miles long having plenty of pay

the 30th of November and asked to see Mrs. Bendixen, and went into her room saying that she (Mrs. Bendixen) had spoken ill of her, and threatening to "spoil the pretty face of Mrs. Bendixen" and to kill the prosecutor she having a dagger with her and leaving two im. pressions of it on the door of the bed room. On a former occasion, the prisoner had drawn a dagger on Mr. Bendixen.

Mr. Bendixen did not appear. Mr. Pemberton said it was a very serious charge and one that he could not pass over lightly; he should remand the prisoner until Monday, taking bail for her appearance, two sureties in the sum of \$250 and herself in the sum of \$500, and would issue a summons for the appearance of Mr. Bendixen.

The accused said she could disprove the charge; that it was 10 o'clock at night when she went to the St. George, not two in the morning.

A GENERAL SMASH UP-The late storms, we regret to say, will be the occasion of considerable loss and inconvenience to the Telegraph Company. From Oregon our last advices stated that the wires were down on both sides of Portland, the only portions in working order being the few miles between Portland and Fort Vancouver. From British Columbia we learn that the gales have torn the wires to shreds in innumerable places between Yale and New Westminster, while Puget Sound advices state that a similar state of affairs existed between Seattle and New Westminster. Under all these circumstances we are afraid that we shall have, for some time to come, to trust for news from the East to the arrival of the Active and coasting vessels.

LAST OF THE MOHICANS .- The only person left to perpetuate the family name of Daniel Webster is his grandson, Ashburton Webster, a son of Fletcher Webster, who is

a very promising young man now in the American navy. Fletcher Webster left two sons and a daughter, the last still living. Edward Webster, Major, who died in Mexico, left no children. There are four other grandchildren by his much beloved Julia, bearing the name of Appleton. This is all of the family of Daniel Webster.

GERMAN IMMIGRANTS .- A Kansas paper reports that two thousand families of Germans and of German descent from Berks county, Pennsylvania, and from the city of St. Louis, have selected extensive tracts of land in the valley of the Solomon, through their agent, Captain Brunswick. The lands selected are in Western Kansas, and are said to be as fine as any in that State.
