George Fulljames, the p.f., has been wanted for a few days on a charge of robbing a countryman named Robert Sargent, at Victoria park. There is also another man implicated. At 11 30 on Saturday night Officer Sleemin saw the light-weight standing Queen and York streets. He standing Queen and York streets. He was taken into custody on a warrant, Fulljames said that if the officer would allow him to walk along without the nippers he would go quietly. The policeman consented to this, and while they were passing Yonge and Alice streets on the way to No. 2 station Fulljames made a breast along Alice street. Sleemin was joined in the chase by Officer Thompson. The escaping prisoner ran along Alice street to Terauley and down the latter thoroughfare. Sergeant Stark, who was coming up the street, heard the fast falling feet of the pursued and the pursuers and kept himself in readiness. Fulljames ran square into his arms and was soon behind the bars.

A. H. DIXON & SON,

307 KING STREET LWEST TORONTO CANADAN

WHAT IS CATARRH ? Catarrh is a muco-purulent discharge caused by the presence and development of the vegetable parasite anneba in the internal lining membrane of the nose. This parasite is only developed under favourable circumstances, and these are: morbid state of the blood, as the blighted corpuscle of tubercle, the germ poison of syphilis, mercury, texcemea, from retention of the effeted matter of the skin, suppressed perspiration, badly ventilated sleeping apartments, and other poisons that are germinated in the blood. These poisons keep the internal lining membrane of the nose in a constant state of irritation, ever ready for the deposit of the seeds of these germs, which spread up the nostrils and down the fauces or back part of the mouth, causing ulceration of the throat; up the eustachian tubes, causing deafness; burrowing in the vocal cords, causing hoarseness; usurping the proper structure of the bronchial tubes, ending in pulmonary consumption and death.

A great variety of symptoms are present in this affection, which are modified by the specific poison which gives rise to it, to wit:—tubercle, syphilis, mercury, suppressed function of the skin and toxcemea generally, but they consist chiefly of languor, lassitude, debility, mal-assimilation, derangement of secretions, great depression of the nervous system, with or without fever; aching; a bruised or beat feeling all over; shivering; confused feelings in the head; cerebral disturbance.

The want of proper respiratory function of the skin and the locar pressure of the parasite give rise to coryza, tonsilitis, sneezing, a sense of fullness, stuffing of the passages, soreness in swailowing, irritative cough, tightness of chest, dry or moist rales, hemorrhages.

There may be a discharg: quite heavy if the parasite causes great nervous irritation,

There may be a discharg: quite heavy if the parasite causes great nervous irritation, which promotes secretion. It may be dry if the nultiplication and duplication of the parasite is active. The increased pargent odor of ozena is never present until the spores or roots of the germ penetrate to the cartilages of the nose, then the parasitical formation makes rapid inroads into the healthy structure of the nose.

30 Catarrh is usually met in three stages, First—A simple parasitical development of the internal lining membrane of the nose, with or without a discharge. Second—Where the roots or spores or sporules of the amoeba have penetrated to the bone or cartilages-ozena. Third—Where the parasite has spread and propagated by millions in the nose, posterior nares, up the custachian tubes, down the lauces, vocal cords and bronchi, causing excessive parasitical ulceration and destruction of tissue, the parasite mapping the normal structure.

The mode of propagation is by contagion, or infection, or both—hence its prevalence in families, districts, etc. The parasite develops itself rapidly, so much so that millions are elaborated in a short space of time. The effect of this formation upon the nervous system is to impair vital force, produce general nervous irritation, a depreciation of the vasomotor nerves. Cold in itself cannot produce Catarrh, it simply produces an irritation, a field for the propagation of the parasite. A large percentage of our population are affected with Catarrh, and its effects are not only ulceration and destruction of the larynx with loss of voice, a usurpation of the bronchial or pulmonary consumption and death. The vegetable parasite is the simplest living form known that lives upon one may is structureless, consisting of semi-fluid material; large or small in size, these masses can move in any direction and propagate indefinitely; these parasites may breed, feed and propagate upon the structure themselves.

Many attempts have been made to discover a cure for this distressing disease, by t

proved by the success that has attended our treatment thus far.

We have certificates of cures, many of them in cases of very long standing, that had baffled all the preparations of the day, as well as the medical profession; and we have never yet failed to give every satistaction in a single case. Every attention is given to patients, and we spare no trouble in cases of very long standing.

The remedy and apparatus, which is so simple that a child can readily understand it, is furnished to the patient, and the treatment can be applied without loss of time or interference with occupation. To those who are suffering from deafness caused by catarrh, we would say that the

To those who are suffering from deafness caused by catarrh, we would say that the above treatment has been successful in restoring the hearing in a great number of cases, where the patient was almost entirely deaf.

Our experience for the past eighteen years demonstrates beyond a doubt that the greater majority of cases, no matter whether standing for one year or forty years, are permanently eured by one treatment—cures effected over a year ago being cures still. A very small percentage of cases require a second treatment, and a third is not necessary in more than two es out of a hundred.

The most offensive odour, hoarseness, loss of voice, headaches, languor, weak eyes, etc.,

The most offensive odour, hoarseness, loss of voice, headaches, languor, weak eyes, etc., caused by Catarrh, are removed by one treatment.

Sufferers are particularly requested not to confound our remedy with patent medicines, quack, or advertising doctors' nostrums—it is neither—but an honest cure for Catarrh, as thousands who have been cured can testify.

We have been offered heavy inducements by numerous patent medicine dealers to allow them to sell our remedy to Druggists throughout the United States and Canada, as there is an extensive enquiry for it from all parts of the country. But after giving their propositions our serious consideration we have come to the conclusion that we cannot do this, there being so many different stages of Catarrh, the remedy must be prepared expressly for the patient after receiving a description of the case in order to effect a cure. Old and young, male and female, all require different treatment, and were we to place our remedy in the hands of the druggists we would be forced to prepare it all alike, in which case it would fail continually in effecting a cure, and the consequences would be that our remedy (invaluable when properly prescribed) would soon be classed among the patent medicine humbugs now on the market.

N:B.—As we wish to avoid the very appearance of quackery, we do not publish a long list of certificates of cures, such being the system employed by quacks and dealers in all hinds of nostrums, but prefer that the remedy shall stand upon its merits. At the same time we think that the public are entitled to references as to our reliability and integrity before forwarding their money for the remedy, and we submit the following well known names of Toronto (Canada) business men:—Wm. Norris & Son, Wholesale Piano Dealers; E. H. Tallmadge & Co., Wholesale Druggists; Hunter & Co., Wholesale Picture Dealers; Taylor, & Wilson, Cigar Manufacturers; Stuart W. Johnston, Retail Druggist.

In writing to either of the above, a stamped directed envelope should be enclosed to The following letters are samples of many received by us, and which go to show that, our treatment effects a rapid and permanent cure:

A. H. Dixon, Esq., 307 King St., West.

ТОКОНТО, Dec. 27, 1881. Mr. A. H. Dixon, No. 307 King St., West. Mr. A. H. Dixon: DEAR SIR, -I deem it my duty, in the DEAR SIR,—As you asked me to write and report my condition after using your remedy for catarrh, I would say that I have interest of those who are suffering from catarrh, to state that I suffered from this catarrh, to state that I suffered from this dreadful disease in a very aggravated form for a period of fifteen years. I was under the treatment of (here comes the name of a prominent specialist and physician, which, for obvious reasons, is omitted) for a year, he having guaranteed me a cure, without deriving the slightest benefit. I have also tried other treatments with a similar result, and which had the effect of thoroughly discouraging me. Finally, hearing that you had a cure for this disease, I called my out, and was treated by your method or, the 7th of November, 1880, and in ten days thereafter I was completely cured by one treat remedy for catarrh, I would say that I have had a very satisfactory experience with your treatment. As I informed you when I first called, mine was a very aggravated case of over ten year's duration, the discharge and odour being something frightful, so much so that I was obliged at times to isolate myself from society. I have placed myself at different times under the treatment of five different eminent English physicians and specialists in the Old Country, and after a treatment of greater or less length they pronounced me incurable. I certainly never received a particle of benefit from any quarter until I tried your treatment, three weeks after commencing which, I was entirely rid of my catarrh, and am now a after I was completely cured by one treat ment, and I have had no return of th disease since that time, which is now over entirely rid of my catarrh, and am now a wound man. Your cure is a perfect boom year ago. Judging from the effects of your treatment on myself, I am satisfied that to sufferers from this chronic complaint, and I do not think that you will ever meet yours is the only treatment for catarrhy which will effect a permanent cure.

I remain yours truly,

Wilson McWhinney,

Waterford, Ont. a case that you cannot cure. I shall shortly some of your remedy to a near friend in Scotland who is suffering similarly.

Yours very truly, J. M. NICHOLSON, Winnipeg, Man.

A. H. Dixon, Esq., 307 King St., West.

DEAR SIR,—We take pleasure in stating that our junior partner, who had for years been troubled with catarrh, was successfully cured by three treatments of your remedy. The catarrh was much aggravated with continual dropping into the threat, accompanied by loss of voice, hawking and spitting and blocking up of the nostrils, all of which we are pleased to say disappeared almost immediately after the remedy was applied. Your remedy is certainly an invaluable one and we hope all who may be suffering from this disagreeable disease will vive it a trial as we are satisfied they will find it a complete success. Yours very truly,

Wholesale Piamos and Organs, No. 8 Adelaide St., East. THOROLD, Nov. 1, 1881. A. H. Dixon, Esq., Toronto: SIR,—I have great pleasure in informing you that after one treatment of your catarrh remedy, I am entirely recovered. I suffered from the disease for over three years, and during the last few months the catarrh was most aggravated. In fact, I scarcely had my handkerchief out of use for a moment. It is now six months since I was cured, and there is no return of the complaint. I rethere is no return of the complaint. I regard my recovery as a wonderful one.

I remain, yours truly,

[Signed] FRANCIS BROWN, Some time Superintendent of the Mail building, Toronto.
