at a *GIVEN PRESSURE* with a *GIVEN*  
**POWER** than any  
other Fan in the  
market.

For particulars address

**J. D. McEACHREN - - GALT, Ont.**

Rockwood, March 16th, 1893.

Mr. J. D. McEachren, Galt.

Dear Sir, In reference to the Drying and Ventilating Fans that you put in last fall they are working well, keeping the rooms dry and comfortable. The wool dries with cold water coil; is drying 500 to 600 lbs. of wool per day WITHOUT HYDRO EXTRACTOR, on 6 x 12 feet of netting. If the room was larger we are sure that the capacity would be much increased. The Fan in end of dye house keeps the steam well drawn off, and the alterations on cloth drier have enabled us to dry more than double the goods than we could formerly. We would make special note of the small amount of power required.

Yours truly, HARRIS & Co.
