BUSINESS NOTICE.
'The Scientific Journal and Serviyors' Magazine is published at Ottawacity on the first day of every month for four ( $\$ 4$ ) dollars a year, payable strictly in advance; and half price to Surveying and Engineering students.

Tae Scientific Journal and Survetors' Magazine shall be exclusively devoted to the interests of the Surveying and Engineering professions in British North America; and shall discuss, examine and criticize all subjects affecting these inlerests-mental or ma-terial-except religıous or political squabblcs, dogmas or controversies, nove of mheh sinall ever bave access to its pages.

The Scientifle Joermal and Surimpors Magazine shall form a record of all transactions connected with these pursuits, and a depository of information relating thereto ; and consquently indispensable to Surveyors aind Engineers
'Ime Scientifio Jolrnal a.d. Scrulyurs' Magazine sball labor to remove all legal disabilities that stand in the way of the social progress of Surveyors and Engineers. It shall labor to sire Surveyors the sole conirol and management of their professional affairs, such as is now enjoyed by lawyers, doctors, Su. It shall labor to give Engineers a legal stutus with such privileges as are sought for Surveyors. It shall labor to secure for scientific men 3 system of practical education suitable to their callings, whereby their future may be alike advantageons to the publie, an honor to the state and a credit to themselves. It shal. labor to establish in this city, the capital of British America, a Narional Obserfatory, where the rising gencration may have the means of perfecting themselves in those stadies so essential to their future
usefnlness; and which is so difficult, if not impussihio, to attain at present in the Provinces. It siall labor to give Surveyors and Engineers that preferment to which their education and training entitle them-to secure the patronage of the Crown Lands and Pablic Works Departments : and which should ." the public interest exclusively belong to them.

The Sementific Journal and Surveyors Magazine shall advocate an entire change in the present expensive, uncertain and unsatisfactury mode of deciding questions of disputci Boundary; and establish in its stead a tribunal founded on a scientific knowledge of the issues involved; and shall labor assidiously to the accomplishment of this end.

Each numbur shall contain an article on Practical Astronomy, so far as that science is necessary in surveying operations in Canada; and a monthly Jphemeris of the sun and some of the principal fixed stars (particularly Polaris) for determining Latitude, tine and Azimuth, computed to the meridian $75^{\circ}$ west of Greenwich ard $45^{\circ}$ N. Latitude, which is nearly the geographical position of Ottara ; and which from its central situation is mostly adapted for all Canada without interpolation.

Each number shall contain a studente' department, consisting of useful remarks and practical hints to young surveyors.

Each number shall contain plates and descriptions of surveying, engineering, drawing and plotting instruments; together with notices of new inventions, alterations and improvements, and reviews and notices of new books.

The Scientific Jourval and Surveyors' Magazner shall from time to time contain no-
