

LOCKMAN'S PATENT

**Lock Stitch Shuttle
FAMILY**

SEWING

This Sewing Machine has met with greater success and larger sales than any other Sewing Machine in Canada. The Manufacturers, Messrs. Wilson, Bowman & Co, Hamilton, have made and sold in Canada over 5,600 since September last. The qualities that recommend this for family sewing over other makes and cause so large a sale are these:—

The Lockman works with a *Straight* Needle and Shuttle, using two threads, and makes the LOCK STITCH alike on both sides of the fabric sewn. The Stitch which time and experience has proved is the only really reliable one.

The Lockman works easily, fast, and makes little noise, and is so simple in its construction, that a child ten years old can use it with one lesson, or by printed instructions which accompany each machine.

The Lockman is first class, and works as well as the highest price Sewing Machine made, and is sold at the low price of \$32, with polished black walnut table with drawer and stand of most approved model in Iron
