

MANDATE FOR THE INITIAL VISIT TO A FACILITY
PRODUCING SCHEDULE [2] CHEMICALS

1. Title and number of the decision by the Technical Secretariat on the grounds of which the initial visit to the facility in question is to be made.
2. Composition of the inspection team:
 - A specialist in monitoring (team leader)
 - A specialist in chemical engineering
 - A specialist in monitoring and measuring instruments and automation
 - A specialist in physical and chemical methods of analysis.
3. Duration of the initial visit: 3-5 days.
4. Purpose of the initial visit:
 - To verify information provided concerning the facility to be inspected;
 - To study the process-flow diagram and the material-flow diagram prepared by the facility's management and to define the key monitoring points and the methods and technical means for monitoring.
5. Elaboration on the basis of the specific characteristics of the facility in question of proposals concerning the number, intensity, duration, timing and mode of international systematic inspections.
6. Elaboration of a draft agreement on international systematic monitoring of the facility in question.
7. Preparation and submission to the Technical Secretariat of a report on the results of the initial visit to the facility and transmission of a copy of that report to the representative of the receiving State.
