

SECTION SKILLS AND THEIR IMPORTANCE

In this section you will learn about:

■ **IBIsys Login and Logout Procedures**

The login procedure may be performed as you begin your SIGNET session or later. The IBIsys logout procedure must be completed before closing the Window's Program Manager. Otherwise, the IBIsys Login program will not allow you to EXIT Windows.

■ **The Mail Manager Window**

The Mail Manager window is one of the two basic windows used in ICONDESK. Most mail activities are performed from within this window. A Folders List window displays your folders.

■ **The Browse Window**

The Browse Window, the second of two basic windows, is where you can read your messages. Windows' multiple selection techniques allows the browsing of many messages.
