A Table for Telling the Weather Through all the Lunations  
of each Year, for Ever.

This table is the result of many years actual observation; the whole being constructed on a due consideration of the attraction of the Sun and Moon in their several positions respecting the Earth, and will, by simple inspection, show the observer what kind of weather will most probably follow the entrance of the Moon into any of its quarters, and that so near the truth as to be seldom or never found to fail.

If the New Moon, the First Quarter, the Full Moon, or the Last Quarter, happens

MOON.	TIME OF CHANGE.	IN SUMMER.	IN WINTER.
Between midnight and 2 <sup>1</sup> / <sub>2</sub>	Fair.	Hard frost unless the wind be south or west.	
In the morning,		Snow, and stormy.	
Between 2 and 4 morning	Cold, with frequent showers.	Rain.	
" 4 and 6 morning	Rain.	Stormy.	
" 6 and 8 morning	Wind and rain.	Cold rain if wind be west.	
" 8 and 10 morning	Changeable.	Snow, if east.	
" 10 and 12 morning	Frequent showers.	Snow or rain.	
Between 12 o'clock noon, and 2 P.M.	{ Very rainy.	Fair and mild.	
Between 2 and 4 P.M.	Changeable.	Fair.	
" 4 and 6 P.M.	Fair.	Fair and frosty if wind N. or N.E.	
" 6 and 8 P.M.	{ Fair if wind N.W. Rainy if S. or S.W.	Rain or snow, if S. or S.E.	
" 8 and 10 P.M.	Ditto.	Ditto.	
10 and midnight	Fair.	Fair and frosty.	

Observations.—1.—The nearer the times of the Moon's change, first quarter, full and last quarter, are to midnight, the fairer will the weather be during the seven days following.

2.—The space of this calculation occupies from ten at night till two next morning.

3.—The nearer to midday or noon the phases of the moon happen, the more foul or wet weather may be expected during the next seven days.

4.—The space of this calculation occupies from ten in the forenoon to two in the afternoon.— These observations refer principally to the summer, though they affect spring and autumn nearly in the same ratio.

5.—The moon's changes, first quarter, full, and last quarter happening during six of the afternoon hours—*i.e.*, from four to ten, may be followed by fair weather; but this is mostly dependent upon the wind, as is noted in table.
