

*PLATE XXXVIII.*

*CUCULLÆA PONDEROSA* (page 294).

Figure 1. Side view, in outline, of the large and testiferous specimen from the east end of Maud Island, collected by Dr. Newcombe, and referred to in the text.

" 1 a. The same, also in outline, as seen from above, to show the breadth of the specimen, and the proportionate size of the large cardinal area.
